
Industrializing Knowledge

University-Industry Linkages in Japan and the United States

**edited by Lewis M. Branscomb, Fumio Kodama,
and Richard Florida**

Contents

Preface	ix
About the Authors	xiii
I Contrasting Two Systems of University-Industry Links	
1 University Research as an Engine for Growth: How Realistic Is the Vision? <i>Fumio Kodama and Lewis M. Branscomb</i>	3
2 Comparing University-Industry Linkages in the United States and Japan <i>Gerald Hane</i>	20
II Assessing the Two Systems	
3 The American University System as a Performer of Basic and Applied Research <i>Irwin Feller</i>	65
4 Coauthorship Linkages between University Research and Japanese Industry <i>Kenneth Pechter and Sumio Kakinuma</i>	102
5 An Inter-industrial Comparative Study of R&D Outsourcing <i>Fujio Niwa</i>	128
6 Public Financing of University Research in Japan <i>Yoshiyuki Ohtawa</i>	157

7	Trends in Scientific Publications in Japan and the United States	180
	<i>Masamitsu Negishi and Yuan Sun</i>	
III Sociological and Historical Perspectives		
8	Bridging the Gap: The Evolution of Industry-University Links in the United States	203
	<i>Henry Etzkowitz</i>	
9	The Hesitant Relationship Reconsidered: University-Industry Cooperation in Postwar Japan	234
	<i>Takehiko Hashimoto</i>	
10	University-Industry Collaboration in Japan: Facts and Interpretations	252
	<i>Hiroyuki Odagiri</i>	
IV Incentives and Barriers: Technology Transfer Dynamics		
11	The Effects of the Bayh-Dole Act on U.S. University Research and Technology Transfer	269
	<i>David C. Mowery, Richard R. Nelson, Bhaven N. Sampat, and Arvids A. Ziedonis</i>	
12	Intellectual Property Rights and University-Industry Technology Transfer in Japan	307
	<i>Robert Kneller</i>	
13	Lack of Incentive and Persisting Constraints: Factors Hindering Technology Transfer at Japanese Universities	348
	<i>Mariko Yoshihara and Katsuya Tamai</i>	
14	The Innovation Agent and Its Role in University-Industry Relations	365
	<i>Shingo Kano</i>	
15	Venture Capital and the Commercialization of Academic Technology: Symbiosis and Paradox	385
	<i>Josh Lerner</i>	

16	University-Industry Cooperation in Biomedical R&D in Japan and the United States: Implications for Biomedical Industries	410
	<i>Robert Kneller</i>	
17	The Impact of the Internet on University-Based Research and Innovation in the United States and Japan	439
	<i>Y. T. Chien</i>	
V Distributional Issues: University Roles in Regional and National Development		
18	Why Older Regions Can't Generalize from Route 128 and Silicon Valley: University-Industry Relationships and Regional Innovation Systems	473
	<i>Michael S. Fogarty and Amit K. Sinha</i>	
19	The Regional Economic Impact of Public Research Funding: A Case Study of Massachusetts	510
	<i>Amy B. Candell and Adam B. Jaffe</i>	
20	The Growing Sophistication of Research at a Time of Broadened Participation in Higher Education	531
	<i>Shinichi Yamamoto</i>	
21	Public Policies for Japanese Universities and the Job Market for Engineers	547
	<i>Seiritsu Ogura and Hiroto Kotake</i>	
VI Public Policies for the Global Economy		
22	The Industrial Perspective on University-Industry Relationships in Japan and the United States	579
	<i>Sheryl Winston Smith</i>	
23	Engine or Infrastructure? The University Role in Economic Development	589
	<i>Richard Florida and Wesley M. Cohen</i>	
	Index	611
