| Preface | • |
|---------|---|
|---------|---|

| 1 Introductory Topics, I: Algeb | ra 1 |
|--|------|
| 1.1 The Real Numbers | 1 |
| 1.2 Integer Powers | 4 |
| 1.3 Rules of Algebra | 10 |
| 1.4 Fractions | 16 |
| 1.5 Fractional Powers | 21 |
| 1.6 Inequalities | 26 |
| 1.7 Intervals and Absolute Values | 32 |
| Review Problems for Chapter 1 | 35 |
| 2 Introductory Topics, II: Equations | 37 |
| 2.1 How to Solve Simple Equations | 37 |
| 2.2 Equations with Parameters | 40 |
| 2.3 Quadratic Equations | 43 |
| 2.4 Linear Equations in Two Unknowns | 49 |
| 2.5 Nonlinear Equations | 52 |
| Review Problems for Chapter 2 | 54 |
| 3 Introductory Topics, III: Miscellaneous | 55 |
| 3.1 Summation Notation | 55 |
| 3.2 Rules for Sums. Newton's Binomial | |
| Formula | 59 |

| 3.3 Double Sums | 64 |
|------------------------------------|-----|
| 3.4 A Few Aspects of Logic | 66 |
| 3.5 Mathematical Proofs | 72 |
| 3.6 Essentials of Set Theory | 74 |
| 3.7 Mathematical Induction | 79 |
| Review Problems for Chapter 3 | 81 |
| 4 Functions of One Variable | 83 |
| 4.1 Introduction | 83 |
| 4.2 Basic Definitions | 84 |
| 4.3 Graphs of Functions | 90 |
| 4.4 Linear Functions | 94 |
| 4.5 Linear Models | 101 |
| 4.6 Quadratic Functions | 104 |
| 4.7 Polynomials | 112 |
| 4.8 Power Functions | 119 |
| 4.9 Exponential Functions | 121 |
| 4.10 Logarithmic Functions | 127 |
| Review Problems for Chapter 4 | 132 |
| 5 Properties of Functions | 135 |
| 5.1 Shifting Graphs | 135 |
| 5.2 New Functions from Old | 140 |
| 5.3 Inverse Functions | 144 |
| 5.4 Graphs of Equations | 151 |
| 5.5 Distance in the Plane. Circles | 154 |
| | |

| 5.6 | General Functions | 158 |
|------|-------------------------------------|-----|
| | Review Problems for Chapter 5 | 161 |
| 6 D | ifferentiation | 163 |
| 6.1 | Slopes of Curves | 163 |
| 6.2 | The Derivative. Tangents | 165 |
| 6.3 | Increasing and Decreasing Functions | 171 |
| 6.4 | Rates of Change | 173 |
| 6.5 | A Dash of Limits | 177 |
| 6.6 | Simple Rules for Differentiation | 182 |
| 6.7 | Sums, Products, and Quotients | 186 |
| 6.8 | Chain Rule | 193 |
| 6.9 | Higher-Order Derivatives | 198 |
| 6.10 | Exponential Functions | 203 |
| 6.11 | Logarithmic Functions | 207 |
| | Review Problems for Chapter 6 | 213 |
| 7 D | erivatives in Use | 215 |
| 7.1 | Implicit Differentiation | 215 |
| 7.2 | Differentiating the Inverse | 223 |
| 7.3 | Linear Approximations | 225 |
| 7.4 | Polynomial Approximations | 230 |
| 7.5 | Taylor's Formula | 234 |
| 7.6 | Why Economists Use Elasticities | 238 |
| 7.7 | Continuity | 242 |
| 7.8 | More on Limits | 247 |
| 7.9 | Intermediate Value Theorem. | |
| | Newton's Method | 255 |
| 7.10 | Infinite Sequences | 258 |
| 7.11 | Indeterminate Forms and | |
| | L'Hôpital's Rule | 261 |
| | Review Problems for Chapter 7 | 266 |
| 8 Si | ngle-Variable | |
| 0 | ptimization | 269 |
| 8.1 | Introduction | 269 |
| 8.2 | Simple Tests for Extreme Points | 272 |
| 8.3 | Economic Examples | 276 |
| 8.4 | The Extreme-Value Theorem | 281 |
| 8.5 | Further Economic Examples | 287 |
| 8.6 | Local Extreme Points | 291 |
| 8.7 | Inflection Points | 297 |
| | Review Problems for Chapter 8 | 302 |

| 9 Integration | 305 |
|--|-----|
| 9.1 Indefinite Integrals | 305 |
| 9.2 Area and Definite Integrals | 311 |
| 9.3 Properties of Definite Integrals | 317 |
| 9.4 Economic Applications | 321 |
| 9.5 Integration by Parts | 328 |
| 9.6 Integration by Substitution | 332 |
| 9.7 Infinite Intervals of Integration | 335 |
| 9.8 A Glimpse at Differential Equations | 341 |
| Review Problems for Chapter 9 | 347 |
| 10 Financial Topics: Interest | |
| Rates and Present Value | 349 |
| 10.1 Interest Periods and Effective Rates | 349 |
| 10.2 Continuous Compounding | 353 |
| 10.3 Present Value | 355 |
| 10.4 Geometric Series | 357 |
| 10.5 Total Present Value | 362 |
| 10.6 Mortgage Repayments | 367 |
| 10.7 Investment Projects | 372 |
| Review Problems for Chapter 10 | 374 |
| 11 Functions of Several | |
| Variables | 377 |
| 11.1 Functions of Two Variables | 377 |
| 11.2 Partial Derivatives with Two Variables | 381 |
| 11.3 Geometric Representation | 387 |
| 11.4 Surfaces and Distance | 394 |
| 11.5 Functions of More Variables | 397 |
| 11.6 Partial Derivatives with More Variables | 402 |
| 11.7 Economic Applications | 406 |
| 11.8 Partial Elasticities | 408 |
| Review Problems for Chapter 11 | 410 |
| 12 Tools for Comparative | |
| Statics | 413 |
| 12.1 A Simple Chain Rule | 413 |
| 12.2 Chain Rules for n Variables | 418 |
| 12.3 Implicit Differentiation | 422 |
| 12.4 Elasticity of Substitution | 429 |
| 12.5 Homogeneous Functions of | |
| Two Variables | 432 |
| 12.6 General Homogeneous and Homothetic | |
| Functions | 437 |
| | |

| 12.7 | Linear Approximations | 442 |
|-------|--------------------------------------|-----------------|
| 12.8 | Differentials | 446 |
| 12.9 | Systems of Equations | 450 |
| 12.10 | Differentiating Systems of Equations | 454 |
| | Review Problems for Chapter 12 | 460 |
| 13 N | Multivariable Optimization 4 | 1 63 |
| 13.1 | Two Variables | 463 |
| 13.2 | Local Extreme Points | 471 |
| 13.3 | Linear Models with | |
| | Quadratic Objectives | 477 |
| 13.4 | The Extreme-Value Theorem | 485 |
| 13.5 | More Variables | 491 |
| 13.6 | Comparative Statics and | |
| | the Envelope Theorem | 495 |
| | Review Problems for Chapter 13 | 499 |
| 14 (| Constrained Optimization | 501 |
| 14.1 | The Lagrange Multiplier Method | 501 |
| 14.2 | Economic Interpretations of | |
| | the Lagrange Multiplier | 507 |
| 14.3 | Why the Lagrange Multiplier | |
| | Method Works | 510 |
| 14.4 | Sufficient Conditions | 515 |
| 14.5 | More Variables and More Constraints | 518 |
| 14.6 | Comparative Statics | 525 |
| 14.7 | Nonlinear Programming: A Simple Case | 530 |
| 14.8 | More on Nonlinear Programming | 536 |
| | Review Problems for Chapter 14 | 544 |
| | | |
| | | |

15 Matrix and Vector Algebra 547

| 15.1 Systems of Linear Equations | 547 |
|---|-----|
| 15.2 Matrices and Matrix Operations | 551 |
| 15.3 Matrix Multiplication | 555 |
| 15.4 Rules for Matrix Multiplication | 559 |
| 15.5 The Transpose | 566 |
| 15.6 Gaussian Elimination | 568 |
| 15.7 Vectors | 574 |
| 15.8 Geometric Interpretations of Vectors | 578 |
| 15.9 Lines and Planes | 583 |
| Review Problems for Chapter 15 | 587 |
| 16 Determinants and | |
| Inverse Matrices | 589 |
| 16.1 Determinants of Order 2 | 589 |
| 16.2 Determinants of Order 3 | 593 |
| 16.3 Determinants of Order n | 597 |
| 16.4 Basic Rules for Determinants | 600 |
| 16.5 Expansion by Cofactors | 605 |
| 16.6 The Inverse of a Matrix | 608 |
| 16.7 A General Formula for the Inverse | 614 |
| 16.8 Cramer's Rule | 618 |
| 16.9 The Leontief Model | 621 |
| Review Problems for Chapter 16 | 625 |
| Appendix: Geometry | 627 |
| The Greek Alphabet | 629 |
| Answers, Odd-Numbered | |
| Problems | 630 |
| Index | 670 |
| muex | 0/9 |
