

Dietmar Hornung

Investment, R&D, and Long-Run Growth

Springer

o

Contents

Introduction	1
I An Outline of Related Research	5
1 Literature on R&D-Based Growth	7
2 Evidence that Suggests a Broader View	13
2.1 Physical Capital's Role in the Growth Process	13
2.2 Physical Capital and Imperfect Competition	18
2.3 Investment Externalities vs. R&D Externalities	21
II Product Differentiation due to R&D	23
3 Expanding Product Variety	25
3.1 Technology	27
3.1.1 Final Output	27
3.1.2 R&D	28
3.2 Laissez-faire Outcome	29
3.2.1 Intermediate Market	29
3.2.2 Asset Market	31
3.2.3 Steady-State Growth	33
3.3 Social Planner's Solution	37
3.4 Policy Implications	40
3.5 Discussion	41
4 Improving Product Quality	43
4.1 Technology	44
4.1.1 Final Output	44
4.1.2 RfED	45

4.2	Laissez-faire Outcome.	48
4.2.1	Intermediate Market.	48
4.2.2	Asset Market.	49
4.2.3	Steady-State Growth.	51
4.3	Social Planner's Solution.	53
4.4	Policy Implications.	55
4.5	Discussion.	56
 III Product Differentiation due to Investment		59
5	The Ramsey Model with Imperfect Competition	61
5.1	Technology.	63
5.2	Laissez-faire Outcome.	64
5.2.1	Intermediate Market.	64
5.2.2	Asset Market.	66
5.2.3	Equilibrium Dynamics.	67
5.3	Social Planner's Solution.	70
5.4	Policy Implications.	71
5.5	Discussion.	72
6	A Generalized AK Model	73
6.1	Technology.	75
6.2	Laissez-faire Outcome.	76
6.2.1	Intermediate Market.	76
6.2.2	Asset Market.	77
6.2.3	Steady-State Growth.	78
6.3	Social Planner's Solution.	78
6.4	Policy Implications.	80
6.5	Discussion.	81
7	Learning-by-Doing and the Decline in the Relative Price of Capital	83
7.1	Technology.	84
7.1.1	Final Output.	84
7.1.2	Capital Good.	85
7.2	Laissez-faire Outcome.	87
7.2.1	Intermediate Market.	87
7.2.2	Asset Market.	87
7.2.3	Steady-State Growth.	88
7.3	Social Planner's Solution.	89
7.4	Policy Implications.	92
7.5	Discussion.	93

IV	R&D Revisited	95
8	R&D's Exhaustion Effect	97
8.1	Technology	99
8.1.1	Final Output	99
8.1.2	R&D	100
8.2	Laissez-faire Outcome	101
8.2.1	Intermediate Market	101
8.2.2	Asset Market	103
8.2.3	Steady-State Growth	104
8.3	Social Planner's Solution	104
8.4	Policy Implications	108
8.5	Discussion	109
9	Quality Ladders and Excessive Growth	111
9.1	Technology	111
9.1.1	Final Output	111
9.1.2	R&D	113
9.2	Laissez-faire Outcome	114
9.2.1	Intermediate Market	114
9.2.2	Asset Market	115
9.2.3	Steady-State Growth	116
9.3	Social Planner's Solution	117
9.4	Policy Implications	120
9.5	Discussion	121
10	Growth without Scale Effects	123
10.1	Technology	125
10.1.1	Final Output	125
10.1.2	R&D	126
10.2	Laissez-faire Outcome	127
10.2.1	Intermediate Market	127
10.2.2	Asset Market	128
10.2.3	Steady-State Growth	129
10.3	Social Planner's Solution	130
10.4	Policy Implications	132
10.5	Discussion	132
V	Two-Stage Input Differentiation	133
11	R&D and Physical Capital	135
11.1	Technology	137
11.1.1	Final Output	137
11.1.2	R&D and Capital Good	139

11.2 Laissez-faire Outcome	140
11.2.1 Input Markets	140
11.2.2 Asset Market	145
11.2.3 Steady-State Growth	146
11.2.4 Equilibrium Dynamics	147
11.3 Social Planner's Solution	152
11.4 Policy Implications	156
11.5 Discussion	158
12 Skilled Workers: Schooling and Specialization	161
12.1 Technology	162
12.1.1 Final Output	162
12.1.2 Schooling and Capital Good	164
12.2 Laissez-faire Outcome	165
12.2.1 Input Markets	165
12.2.2 Asset Market	169
12.2.3 Steady-State Growth	170
12.3 Social Planner's Solution	171
12.4 Policy Implications	173
12.5 Discussion	174
Concluding Remarks	175
Appendices	177
A A Suggestive Procedure to Eliminate Scale Effects	177
B Stability of the Steady-State Equilibrium in the Ramsey Model with Imperfect Competition	180
C Stability of the Steady-State Equilibrium in the Models with Two-Stage Input Differentiation	181
D Equilibrium Dynamics with High a in the Models with Two- Stage Input Differentiation	183
References	185
