List of Examples xvii

Preface xxi

1 The Basics 1

1.1 Objectives 1

1.2 Essential Arithmetic Principles 2

1.3 Notation, Notation, Notation 4

1.4 Basic Terms 6

1.4.1 Indexing and Referencing 10

1.4.2 Specific Mathematical Use of Terms 13

1.5 Functions and Equations 18

1.5.1 Applying Functions: The Equation of a Line 26

1.5.2 The Factorial Function 29

1.5.3 The Modulo Function 32

1.6 Polynomial Functions 33

1.7 Logarithms and Exponents 34

1.8 New Terminology 41

1.9 Chapter Appendix: It's All Greek to Me 49

2 Analytic Geometry 51

2.1 Objectives (the Width of a Circle) 51

2.2 Radian Measurement and Polar Coordinates 51

2.3 What Is Trigonometry? 54

2.3.1 Radian Measures for Trigonometric Functions 59

2.3.2 Conic Sections and Some Analytical Geometry 62

2.4 New Terminology 75

3 Linear Algebra: Vectors, Matrices, and Operations 82

3.1 Objectives 82

3.2 Working with Vectors 83

3.2.1 Vector Norms 93

3.3 So What Is the Matrix? 100

3.3.1 Some Special Matrices 101

3.4 Controlling the Matrix 106

3.5 Matrix Transposition 115

3.6 Advanced Topics 117

3.6.1 Special Matrix Forms 118

3.6.2 Vectorization of Matrices 119

3.7 New Terminology 125

4 Linear Algebra Continued: Matrix Structure 132

4.1 Objectives 132

4.2 Space and Time 133

4.3 The Trace and Determinant of a Matrix 139

4.4 Matrix Rank 146

4.5 Matrix Norms 149

4.6 Matrix Inversion 151

4.7 Linear Systems of Equations 157

4.8 Eigen-Analysis of Matrices 160

4.9 Quadratic Forms and Descriptions 167
4.10 New Terminology 170

5 Elementary Scalar Calculus 178
5.1 Objectives 178
5.2 Limits and Lines 178
5.3 Understanding Rates, Changes, and Derivatives 182
5.4 Derivative Rules for Common Functions 189
5.4.1 Basic Algebraic Rules for Derivatives 189
5.4.2 Derivatives of Logarithms and Exponents 196
5.4.3 L'Hospital's Rule 200
5.4.4 Applications: Rolle's Theorem and the Mean Value Theorem 202
5.5 Understanding Areas, Slices, and Integrals 204
5.5.1 Riemann Integrals 205
5.6 The Fundamental Theorem of Calculus 209
5.6.1 Integrating Polynomials with Antiderivatives 211
5.6.2 Indefinite Integrals 217
5.6.3 Integrals Involving Logarithms and Exponents 218
5.6.4 Integration by Parts 219
5.7 Additional Topics: Calculus of Trigonometric Functions 225
5.7.1 Derivatives of Trigonometric Functions 225
5.7.2 Integrals of Trigonometric Functions 226
5.8 New Terminology 228

6 Additional Topics in Scalar and Vector Calculus 235
6.1 Objectives 235
6.2 Partial Derivatives 235
6.3 Derivatives and Partial Derivatives of Higher Order 239
6.4 Maxima, Minima, and Root Finding 241
6.4.1 Evaluating Zero-Derivative Points 245
6.4.2 Root Finding with Newton-Raphson 247

	6.5	Multidimensional Integrals	250
	6.6	Finite and Infinite Series	256
		6.6.1 Convergence	259
	6.7	The Calculus of Vector and Matrix Forms	266
		6.7.1 Vector Function Notation	266
		6.7.2 Differentiation and Integration of a Vector Function	268
	6.8	Constrained Optimization	271
	6.9	New Terminology	277
7	**Probability Theory**		284
	7.1	Objectives	284
	7.2	Counting Rules and Permutations	285
		7.2.1 The Binomial Theorem and Pascal's Triangle	289
	7.3	Sets and Operations on Sets	291
		7.3.1 General Characteristics of Sets	292
		7.3.2 A Special Set: The Empty Set	295
		7.3.3 Operations on Sets	295
	7.4	The Probability Function	306
	7.5	Calculations with Probabilities	308
	7.6	Conditional Probability and Bayes Law	312
		7.6.1 Simpson's Paradox	315
	7.7	Independence	317
	7.8	Odds	321
	7.9	New Terminology	323
8	**Random Variables**		330
	8.1	Objectives	330
	8.2	Levels of Measurement	330
	8.3	Distribution Functions	334
		8.3.1 Randomness and Variables	337
		8.3.2 Probability Mass Functions	338

8.3.3 Bernoulli Trials 339
8.3.4 Binomial Experiments 340
8.3.5 Poisson Counts 344
8.3.6 The Cumulative Distribution Function: Discrete Version 347
8.3.7 Probability Density Functions 350
8.3.8 Exponential and Gamma PDFs 351
8.3.9 Normal PDF 354
8.3.10 The Cumulative Distribution Function: Continuous Version 356
8.3.11 The Uniform Distributions 358
8.4 Measures of Central Tendency: Mean, Median, and Mode 361
8.5 Measures of Dispersion: Variance, Standard Deviation, and MAD 365
8.6 Correlation and Covariance 367
8.7 Expected Value 370
8.8 Some Handy Properties and Rules 372
8.9 Inequalities Based on Expected Values 378
8.10 Moments of a Distribution 380
8.11 New Terminology 383

9 Markov Chains 392
9.1 Objectives 392
9.2 Defining Stochastic Processes and Markov Chains 393
9.2.1 The Markov Chain Kernel 397
9.2.2 The Stationary Distribution of a Markov Chain 401
9.3 Properties of Markov Chains 405
9.3.1 Homogeneity and Periodicity 405
9.3.2 Irreducibility 407
9.3.3 Recurrence 409
9.3.4 Stationarity and Ergodicity 413

9.3.5 Reversibility 417
9.4 New Terminology 419
