

Sami Relander

Towards approximate reasoning on new software product company success potential estimation

A design science based fuzzy logic expert system

HELSINKI SCHOOL OF ECONOMICS
ACTA UNIVERSITATIS OECONOMICAE HELSINGIENSIS

CONTENTS

1. INTRODUCTION.....	7
1.1 <i>Background</i>	7
1.1.1 Research phenomenon.....	9
1.1.2 Research problem.....	10
1.2 <i>Motivation and research gap</i>	12
1.3 <i>Goals and delimitations</i>	14
1.3.1 Research questions.....	15
1.3.2 Delimitations.....	15
1.4 <i>Key term definitions</i>	16
1.4.1 Estimating success potential.....	17
1.4.2 Approximate reasoning and perception-based information.....	18
1.5 <i>Philosophical foundations</i>	79
1.5.1 Ontology, epistemology and the interpretivist paradigm.....	19
1.5.2 Design science.....	< 21
1.6 <i>Methodological approach and research design</i>	22
1.7 <i>Overview of fuzzy logic</i>	24
1.8 <i>Research context</i>	25
1.8.1 The Finnish software product industry.....	26
1.8.2 The Finnish venture capital industry.....	27
1.9 <i>Study outline</i>	28
2. PREVIOUS RESEARCH AND INITIAL MODEL DEVELOPMENT.....	30
2.1 <i>Overview and review methodology</i>	30
2.2 <i>Business success (potential) estimation models</i>	32
2.2.1 Descriptive and linear statistical studies from the 1980s.....	32
2.2.2 Multicriteria evaluation investigations from the 1990s onwards.....	36
2.3 <i>Mainstream theories of success and derived success factors</i>	41
2.3.1 Industrial organization and competitive strategy.....	42
Success factor 1: Industry attractiveness.....	44
Success factor 2: Market characteristics.....	45
2.3.2 The resource-based view and its derivatives.....	46
Success factor 3: Knowledge resources.....	48
Success factor 4: Dynamic capabilities.....	50
2.3.3 Business strategy and timing.....	51
Success factor 5: Business strategy.....	53
Success factor 6: Timing and order of entry.....	55
2.3.4 Human and social capital theory.....	57
Success factor 7: The lead entrepreneur.....	59
Success factor 8: Management team characteristics.....	61
2.4 <i>First version of model and chapter summary</i>	63
3. CONTENT ANALYSIS BASED MODEL REFINEMENT.....	68
3.1 <i>Overview of content analysis with self-organizing maps</i>	68
3.2 <i>Carrying out the empirical research</i>	69
3.2.1 Data sampling.....	70
3.2.2 Data collection.....	71
3.2.3 Data analysis.....	72
3.3 <i>Second version of the success potential estimation model</i>	78
3.3.1 Industrial organization and competitive strategy.....	79
3.3.2 The resource-based view and its derivatives.....	80

3.3.3 Business strategy and timing.....	82
3.3.4 Human and social capital theory.....	83
3.4 <i>Second version of model and chapter summary</i>	85
4. DESIGN SCIENCE BASED FUZZY EXPERT SYSTEM CREATION.....	88
<i>4.1 Reasons to use fuzzy logic.....</i>	88
4.1.1 Advantages of fuzzy logic.....	89
4.1.2 Possible issues with fuzzy logic.....	91
4.1.3 Fuzzy logic in relation to probability theory.....	91
<i>4.2 Key concepts.....</i>	93
4.2.1 Fuzzy sets.....	94
4.2.2 Linguistic variables.....	95
4.2.3 Membership functions.....	96
4.2.4 IF-THEN rules.....	97
<i>4.3 Building the fuzzy expert system.....</i>	98
4.3.1 System overview.....	99
4.3.2 Key building steps.....	101
Problem definition and appropriateness of fuzzy logic.....	101
Identification of all important variables and their ranges.....	102
Establishment of membership functions.....	102
Decision on an appropriate amount and combination of IF-THEN rules.....	104
Defuzzification method selection.....	108
System testing and calibration.....	109
<i>4.4 Using and evaluating the fuzzy expert system.....</i>	109
4.4.1 Using the application.....	110
4.4.2 Evaluating the fuzzy expert system as a technological artifact.....	113
<i>4.5 Chapter summary.....</i>	116
5. DISCUSSIONS AND CONCLUSIONS.....	119
<i>5.1 Research summary.....</i>	119
<i>5.2 Key findings and contributions.....</i>	124
<i>5.3 Implications.....</i>	127
5.3.1 For theory and scholars.....	127
In relation to high level, broad theories.....	128
In relation to previous academic papers.....	129
5.3.2 For entrepreneur-managers and VCs.....	130
For entrepreneur-managers.....	131
For venture capitalists’	132
<i>5.4 Limitations and generalizability.....</i>	133
5.4.1 Limitations.....	134
5.4.2 Generalizability.....	136
<i>5.5 Reliability and validity.....</i>	138
5.5.1 Reliability.....	138
5.5.2 Validity.....	140
<i>5.6 Possible future research.....</i>	142
<i>5.7 Concluding comments.....</i>	145
APPENDIX A: RESEARCH PARTICIPANTS.....	148
