List of Tables	v
List of Figures	vii
Acknowledgements	ix
Thesis Abstract	xi
 Part I	 1
1.1 Introduction	1
1.2 Literature survey on empirical infrastructure studies based on production functions.	7
1.3 Outline of the thesis.	16
 Part II Essays	 17
 1. Assessing the Contribution of Public Capital to Private Production: Evidence from the German Manufacturing Sector.	 19
1.1 Introduction	20
1.2 Specification	21
1.3 Econometric issues and results.	23
1.4 Conclusions.	38
Appendix Essay 1. 1A. Data	43

Contents

2. The Contribution of Transport and Human Capital Infrastructure to Local Private Production: A Partial Adjustment Approach	45
2.1 Introduction	46
2.2 Partial Adjustment Model	47
2.3 Empirical Implementation	49
2.3.1 Description of the Data	49
2.3.2 Analysis	53
2.4 Summary and conclusions	63
 3. (with Olivier Cadot and Lars-Hendrik Roller)	
A Political Economy Model of Infrastructure Allocation: An Empirical Assessment	65
3.1 Introduction	66
3.2 Theory	70
3.2.1 Efficient provision of a public input	71
3.2.2 Influence activities and inefficient policies	74
3.2.3 A model of regional infrastructure allocation	76
3.3 Empirical Implementation	81
3.3.1 Data and Summary Statistics	81
3.3.2 Baseline estimates	84
3.4 Concluding Remarks	95
 4. (with Achim Kemmerling)	
Political Economy of Infrastructure Investment Allocation: Evidence from a Panel of Large German Cities	99
4.1 Introduction	100
4.2 Determinants of Local infrastructure policies in Germany	102
4.3 Hypotheses and structure of the model	105
4.3.1 Production function	105
4.3.2 Infrastructure investment function	106
4.3.3 Grant allocation function	108
4.4 Empirical implementation	109
4.4.1 Data	109
4.4.2 Results	115
4.5 Summary and Conclusions	121

5. Regional Infrastructure Policy and its Impact on Productivity: A Comparison of Germany and France	123
5.1 Introduction	124
5.1.1 Related literature	126
5.2 A comparison of infrastructure policies in Germany and France . . .	128
5.2.1 The different frameworks of infrastructure policy in Germany and France	131
5.2.2 Can regional policies work in principle? Some preliminary considerations	134
5.3 Empirical analysis	137
5.3.1 Productivity effects of regional road infrastructure in Germany and France	137
5.3.2 Empirical determinants of the regional allocation of road infrastructure investment	144
5.4 Summary and conclusions	149
Appendix Essay 5. 5A. Data	151
 Part III Concluding Remarks	 155
 Bibliography	 174
