COLLABORATIVE INTERNET OF THINGS (C-IOT)

FOR FUTURE SMART CONNECTED LIFE AND BUSINESS

Fawzi Behmann

Kwok Wu

## Contents

**Foreword**

**About the Authors**

**Preface**

1. **Introductions and Motivation**
   1.1 Introduction
   1.2 The Book
      - 1.2.1 Objectives
      - 1.2.2 Benefits
      - 1.2.3 Organization
      - 1.2.4 Book Cover
      - 1.2.5 Impact of C-IoT
      - 1.2.6 Summary
   1.3 C-IoT Terms of References
      - 1.3.1 Introduction
      - 1.3.2 Need for IoT Framework
      - 1.3.3 C-IoT Domains and Business Applications Model
      - 1.3.4 Roadmap of IoT
      - 1.3.5 C-IoT Platform/Developer Community
      - 1.3.6 C-IoT Opportunities for Applications, Solutions, and Systems
   1.4 The Future
      - 1.4.1 General Trends
      - 1.4.2 Point Solutions
      - 1.4.3 Collaborative Internet of Things
      - 1.4.4 C-IoT and RFID
      - 1.4.5 C-IoT and Nanotechnology
      - 1.4.6 Cyber-Collaborative IoT (C²-IoT)
      - 1.4.7 C²-IoT and Ebola Case
      - 1.4.8 Summary
   References
## 2 Application Requirements

### 2.1 C-IoT Landscape

- **2.1.1 C-IoT Model and Architecture Layers**
- **2.1.2 C-IoT Model and Enabling Technologies**
- **2.1.3 Definition of Key Elements**
- **2.1.4 Requirement Considerations**
- **2.1.5 C-IoT System Solution – Requirement Considerations**

### 2.2 Application Requirements – Use Cases

### 2.3 Health and Fitness System for Individual/Industry/Infrastructure (Lead Example)

- **2.3.1 Landscape**
- **2.3.2 Health & Fitness Sensing Requirements**
- **2.3.3 Health & Fitness Gateway Requirements**
- **2.3.4 Health & Fitness Service Requirements**
- **2.3.5 Health & Fitness and Solution Considerations**
- **2.3.6 Health & Fitness and System Considerations**
- **2.3.7 Health & Fitness and Hospitals**

### 2.4 Video Surveillance, Drone, and Machine Vision

- **2.4.1 Landscape**
- **2.4.2 Video Surveillance – across Home, Industry, and Infrastructure**
- **2.4.3 Video Surveillance Sensing Requirements**
- **2.4.4 Video Surveillance Gateway Requirements**
- **2.4.5 Video Surveillance Services**
- **2.4.6 Example: Red-Light Camera – Photo Enforcement Camera**
- **2.4.7 Conclusion**

### 2.5 Smart Home and Building

- **2.5.1 Landscape**
- **2.5.2 Requirements**
- **2.5.3 Smart Home & Building Sensing Requirements**
- **2.5.4 Smart Home & Building Gateway Requirements**
- **2.5.5 Smart Home & Building Services**

### 2.6 Smart Energy

- **2.6.1 Landscape**
- **2.6.2 Requirements**
- **2.6.3 Smart Energy and Sensing Requirements**
- **2.6.4 Smart Energy and Gateway Requirements**
- **2.6.5 Smart Energy – Services**
- **2.6.6 The Smart Energy App**
- **2.6.7 Smart Energy and Network Security**

### 2.7 Track and Monitor

- **2.7.1 Landscape**
- **2.7.2 Track and Monitor – Sensing Requirements**
2.7.3 Track and Monitor – Services 107
2.7.4 Track and Monitor – Solution Considerations 108
2.7.5 Track and Monitor Examples 108

2.8 Smart Factory 109
2.8.1 Factory Automation – Robot 109
2.8.2 Industrial 110
2.8.3 Service Robot 112

2.9 Others (Smart Car, Smart Truck, Drone, Machine Vision, and Smart City) 113
2.9.1 Smart Car 113
2.9.2 Smart Roadside 119
2.9.3 Drone 121
2.9.4 Machine Vision 123
2.9.5 Smart City 124

References 128

3 C-IoT Applications and Services 131
3.1 Smart IoT Application Use Cases 132
3.1.1 Health Monitoring – Individual Level (Fitness/Health-Tracking Wearables) 134
3.1.2 Health Monitoring at Business Level (e.g., Clinic and Homes for the Elderly) 137
3.1.3 Home and Building Automation – Individual Level (Smart Home) 146
3.1.4 Smart Energy and Smart Grid 158
3.1.5 Smart Energy Gateways 172
3.1.6 Industrial and Factory Automation 182
3.1.7 Smart Transportation and Fleet Logistics (Connected Cars – V2X: V2V, V2I) 185
3.1.8 Smart City 189

3.2 Smart IoT Platform 190
3.2.1 Smart IoT Software Gateway Platform 191
3.2.2 Smart Sensor Fusion Software Platform 195

3.3 Secured C-IoT Software Platform 196
3.3.1 Overview 197
3.3.2 C-IoT Security – Example of Smart Energy 197
3.3.3 Securing NAN (Metrology-to-Concentrator) 199
3.3.4 Securing Home Area Network (HAN) 201
3.3.5 Securing WAN (Concentrator-to-Substation/Utility Servers) 203
3.3.6 Platform Solution for Concentrator 203
3.3.7 Platform Solution for Substation/Utility Servers 204
3.3.8 Network Topology and IP Addressing: WAN 204
3.3.9 Security on the Concentrator and Utility Servers 204
3.3.10 Summary on C-IoT Security 205

References 207

4 IoT Reference Design Kit 209
4.1 Hardware Equipment List for the Demonstration 210
4.2 Software Required for Demonstration 210
4.3 Safely Power Off the Reference Platform 214
4.4 ZigBee Home and Building Automation 215
  4.4.1 Troubleshooting ZigBee Home and Building Automation 217
4.5 Network Video Recorder (NVR) for Video Surveillance 217
  4.5.1 Troubleshooting NVR 219
4.6 Internet 3G Broadband Gateway 219
4.7 UPNP 220
4.8 Digital Living Network Alliance (DLNA) Media Server 221
  4.8.1 Set Up Reference Platform as DLNA Server 221
  4.8.2 Set Up DLNA Clients 222

References 223

5 C-IoT Cloud-Based Services and C-IoT User Device Diversity 225
5.1 C-IoT Cloud-Based Services 225
  5.1.1 Introduction and Drivers to C-IoT Service Platform 225
  5.1.2 Classes of C-IoT Cloud Computing 227
  5.1.3 C-IoT Innovative and Collaborative Services 228
  5.1.4 The Emerging Data Center LAN 229
5.2 C-IoT User Device Diversity 231
  5.2.1 Introduction 231
  5.2.2 C-IoT Developers/Platform 232
  5.2.3 Wearable Devices – Individual 234
  5.2.4 Harvesting (Self-Powered Nodes) – Infrastructure Applications 235
  5.2.5 Embedded Devices and Servers 235
  5.2.6 Performing Sentiment Analysis Using Big Data 236
  5.2.7 IBM Watson for Cognitive Innovations 237
  5.2.8 Far-Reaching Consequences 237
  5.2.9 C-IoT (Collaborative IoT) 238

References 238

6 Impact of C-IoT and Tips 239
6.1 Impact on Business Process Productivity and Smart of Digital Life 239
  6.1.1 Individual 239
  6.1.2 Industry 240
  6.1.3 Infrastructure 241
