# **Nonlinear Dynamics and Heterogeneous Interacting Agents**

**Springer**

# Contents

## Part I Learning in Computational and Laboratory Experiments

The Implementation of the Taring Tournament: A Report <i>Jasmina Arifovic</i>	3
Expectations Structure in Asset Pricing Experiments <i>Giulio Bottazzi, Giovanna Devetag</i>	11
Learning in a "Basket of Crabs": An Agent-Based Computational Model of Repeated Conservation Auctions <i>Atakelty Hailu, Steven Schilizzi</i>	27
On the Benefit of Additional Information in Markets with Heterogeneously Informed Agents - an Experimental Study <i>Jiirgen Huber, Michael Kirchler, Matthias Sutter</i>	41

## Part II Games and Strategic Interactions

Crowd Effects in Competitive, Multi-Agent Populations and Networks <i>Neil F. Johnson, Sehyo C. Choe, Sean Gourley, Timothy Jarrett, Pak Ming Hui</i>	55
Local Minority Game and Emergence of Efficient Dynamic Order <i>Hiroshi Sato, Akira Namatame</i>	71
Agents with Heterogeneous Strategies Interacting in a Spatial IPD <i>Frank Schweitzer, Robert Mach, Heinz Mühlenbein</i>	87

## **XII      Contents**

Complexity Leads to Benefits: Pareto-Improving Chaos in a Heterogeneous Duopoly Market <i>Yasuo Nonaka</i>	<b>103</b>
 <b>Part III Innovation, Networks and Learning Dynamics</b>	
On Novelty and Heterogeneity <i>Ulrich Witt</i>	<b>123</b>
'Collective Innovation' in a Model of Network Formation with Preferential Meeting <i>Nicolas Carayol, Pascale Roux</i>	<b>139</b>
Population Learning in Random Games with Endogenous Network Formation <i>Giorgio Fagiolo, Luigi Marengo, Marco Valente</i>	<b>155</b>
Growth and Coalition Formation <i>Davide Fiaschi, Pier Mario Pacini</i>	<b>171</b>
The Topology of Shareholding Networks <i>Stefano Battiston, Diego Garlaschelli, Guido Caldarelli</i>	<b>189</b>
 <b>Part IV Statistical Physics Approaches</b>	
A New Model of Labor Dynamics: Ultrametrics, Okun's Law, and Transient Dynamics <i>Masanao Aoki, Hiroshi Yoshikawa</i>	<b>203</b>
A Finitary Characterization of the Ewens Sampling Formula <i>Domenico Costantini, Ubaldo Garibaldi, Paolo Viarengo</i>	<b>221</b>
Statistical Properties of Absolute Log>Returns and a Stochastic Model of Stock Markets with Heterogeneous Agents <i>Taisei Kaizoji</i>	<b>237</b>
 <b>Part V Asset Price Dynamics</b>	
Asset Price Dynamics and Diversification with Heterogeneous Agents <i>Carl Chiarella, Roberto Died, Laura Gardini</i>	<b>251</b>

An Asset Pricing Model with Adaptive Heterogeneous Agents and Wealth Effects <i>Carl Chiarella, Xue-Zhong He</i>	269
The Red Queen Principle and the Emergence of Efficient Financial Markets: An Agent Based Approach <i>Sheri Markose, Edward Tsang, Serafin Martinez Jaramillo</i>	287
Price Formation in an Artificial Market: Limit Order Book Versus Matching of Supply and Demand <i>Marco Raberto, Silvano Cincotti, Christian Dose, Sergio M. Focardi, Michele Marchesi</i>	305
Fraudulent Agents in an Artificial Financial Market <i>Enrico Scalas, Silvano Cincotti, Christian Dose, Marco Raberto</i>	317
