# **TRANSITION** INTO AN **INNOVATIVE ENTERPRISE**

Maribor, 2007

# Contents

Preface.....	7
<b>PART I: METHODOLOGICAL INTRODUCTION TO THE BOOK.....</b>	<b>15</b>
1 Systems thinking and requisite holism.....	17
1.1 The selected problem and viewpoint.....	17
1.2 Systems thinking and approach.....	18
1.3 Dialectical system, requisite holism, and the Dialectical Systems Theory (DST).....	19
1.4 Essence of the Dialectical Systems Theory (DST).....	20
1.5 The six components and relations making the Dialectical Systems Theory.....	21
1.6 Application of requisite holism / dialectical system in this book.....	25
<b>PART II: ROOTS OF THE CURRENT REALITY.....</b>	<b>27</b>
2 Development economics' view at the way from the institutional to the real ransition in latecomer countries, such as Slovenia.....	29
2.1 The selected problem and viewpoint of consideration.....	29
2.2 Slovenia as a CEEC.....	29
2.2.1 Kingdom of Yugoslavia - a bad image of the capitalistic entrepreneurship, innovation, and democracy despite a promising model.....	30
2.2.2 Tito's Yugoslavia - centralism for too long due to bad inherited experience and abusing power holders.....	32
2.2.3 Transition from pre-industrial to innovative society via enlightened absolutism in both kingdom and Tito's Yugoslavia ...	33
2.2.4 Lack of holism — way toward dissolution of Yugoslavia.....	35
2.2.5 The current institutional changes - not systemic enough, if lacking innovation of VCEN of many and of management and governance.....	35
2.2.6 Some suggestions.....	37
2.3 The need for and definition of an innovative society in CEEC.....	38
2.4 The way toward an innovative society in Slovenia: Freeing the entrepreneurship is not enough.....	43
2.5 VCEN, and ethics of interdependence as a factor of transition from the pre-industrial to the modem society.....	49

2.6 Empirical picture of attitudes about innovation in Slovenia..... 54

2.7 Government poorly responds to the detected VCEN problems in Slovenia.... 59

2.8 Lack of transfer and absorption capacity for knowledge in Europe.....60

2.9 Businesses absorb government suggestions and knowledge  
from research organizations sometimes only.....62

2.10 Again: Government'must innovate itself first..... 64

2.11 Some concluding remarks..... 65

**PART III: ETHICAL ASPECTS OF TRANSITION.....67**

3 Innovation of ethics as a base for economic development•- Case of Slovenia .... 69

3.1 The selected problem and viewpoint of consideration.....69

3.2 A short look at Slovenia in terms of the current transition.....70
