
MACROECONOMIC THEORY AND POLICY

2nd Edition

William H. Branson

Princeton University

Harper & Row, Publishers

New York, Hagerstown, Philadelphia, San Francisco, London

Contents

Part I

An Introduction to Macroeconomics	1
1 Actual and Potential GNP: Fluctuations and Growth	3
The Development of Macroeconomics / Actual and Potential Output / An Analytical Approach to Macroeconomics	
2 A Review of the National Income and Product Accounts	13
Some Principles Behind the Accounts / The Circular Flow of Product and Income / GNP on the Product Side / GNP by Type of Income, and National Income / The Disposition of National Income / Summary of the GNP Identity / The Government Sector in the Accounts / GNP as a Welfare Measure	
3 Introduction to Income Determination: The Multiplier	32
The Saving-Investment Balance / Planned and Realized Investment / The Tax, Consumption, and Saving Functions / Determination of Equilibrium Income / Derivation of the Expenditure Multiplier / Conclusion to Part I	

Part II

National Income Determination: The Static Equilibrium Model

49

4 Demand-Side Equilibrium: Income and the Interest rate

51

Equilibrium Income and the Interest Rate in the Product Market / Equilibrium
Income and the Interest Rate in the Money Market / Equilibrium in the
Product and Money Markets / Income and the Price Level on the Demand
Side

X 5 An Introduction to Monetary and Fiscal Policy

71

Fiscal Policy Effects on Demand / Monetary Policy Effects on Demand / The
Interaction of Monetary and Fiscal Policies

6 Supply-Side Equilibrium: Output and the Price Level

93

The Simple Depression Model / The Demand for Labor / The Supply of
Labor / Equilibrium in the Labor Market / Aggregate
Supply in the Short Run and Long Run / Supply-Side Disturbances

7 Equilibrium in the Static Model

123

Determination of Equilibrium y , N , r , and P / Reaction to Demand
Disturbances / Real Labor Income and Average Productivity (A
Digression) / Reaction to Supply Disturbances

8 Search, Wage Rigidity, and Unemployment

146

Labor-Market Search and Employment / Equilibrium Unemployment in the
General Keynesian Model / Wage Rigidity in the Aggregate Labor Market /
Local Wage Rigidities and Aggregate Unemployment / Summary: An Eclectic
View of Unemployment

9 Monetary, Fiscal, and Incomes Policy in the Static Model

164

Monetary and Fiscal Policy in the Static Model / Fiscal and Monetary
Multipliers in the Static Model / Incomes Policy in the Static Model /
Incomes Policy and Excess Demand / Conclusion to Part II

Part III

Sectoral Demand Functions and Extensions of the Static Model

181

10 Consumption and Consumer Expenditure

183

Background: Cross Sections, Cycles, and Trends / Three Theories of the Consumption Function / Choice Structure and Disequilibrium / The MPS Model / The Wealth Effect in the Static Model / Conclusion: Some Implications for Stabilization Policy

11 Investment Demand

214

The Present Value Criterion for Investment / The Marginal Efficiency of Investment / Investment Demand and Output Growth / The User Cost and Liquidity Effects / Lags in Investment Demand / Investment in the Static Model / Stability and the Slope of the IS Curve / Conclusion: Investment Demand and Monetary and Fiscal Policy

12 The Demand for Money

243

The Regressive Expectations Model / The Portfolio Balance Approach / The Transactions Demand for Money / Money as a Consumer's and Producer's Good / Empirical Estimates of Income and Interest Elasticities

13 The Supply of Money

267

The Instruments of Monetary Policy / The Mechanism of Monetary Expansion / The Determinants of the Money Supply / Empirical Estimates of Interest Elasticity / The Money Supply in the Static Model / Conclusion: The Relevance of Interest Sensitivity of the Money Supply

14 Monetary and Fiscal Policy in the Extended Model

281

The Static Model Extended / The Effects of Fiscal Policy Changes / The Effectiveness of Monetary and Fiscal Policy: Monetarists and Fiscalists / Tax Rate Changes and the Budget Deficit / Fiscal Stimulus and Deficit Financing

15 The Foreign Sector and the Balance of Payments

311

The Current Account and Product Market Equilibrium / The Capital Account and Balance-of-Payments Equilibrium / Balance-of-Payments Adjustments

and the LM Curve / Balance-of-Payments Adjustment Policy with Fixed Rates / Flexible Exchange Rates / The Domestic Economy as a Price Taker / Conclusion: Likely Developments to 1980

16 Macroeconomics When Markets Do Not Clear

by John Muellbauer and Richard Portes

337

The Reappraisal of the Foundations of Macroeconomics / Some Analytic Preliminaries for the "Reappraisal" Model / Microeconomic Foundations for the Reappraisal Model / The Complete Model / The Model in a Small Open Economy / The Importance of Time and the Future / Comparative Statics, Multipliers, and Dynamics / The Model and Actual Economies / Conclusion: Some Future Research in Macro Theory

Part IV

Medium-Term Dynamics: Between Static Equilibrium and Long-Run Growth

373

17 Inflation, Productivity, and Income Distribution

375

Inflation in the Static Model / Wages, Prices, and Productivity / The Wage-Price Guideposts and Income Distribution / Appendix to Chapter 17: The Uses of Logarithms / The Natural Constant e / Natural Logarithms / Point Elasticities

18 Inflation and Unemployment in the 1970s

397

The Relation of Wage Changes to Unemployment: The Phillips Curve / Inflation Since the Mid-1960s / Antiinflation Policy

19 Introduction to Stock Adjustment Dynamics

415

Money Finance of the Budget Deficit / Introduction of Wealth Effects / Bond Finance of the Deficit and Crowding Out / Interaction Between the Government Budget and the Balance of Payments / A General View of Asset Stock Adjustment

20 Trend Growth in the Static Model

439

Assumptions Underlying Trend Growth / Trend Growth of Output and Prices / Trend Growth of the Money Supply / Product Market Equilibrium and the Budget / The Monetary-Fiscal Policy Mix Along Trend / Fiscal Drag and the Full-Employment Surplus / Public Debt with Trend Growth

Part V

Long-Run Growth with Full Employment 457

21 Introduction to Growth Models 459

The Stylized Facts of Growth / Basic Assumptions of One-Sector Growth Models / The Harrod-Domar Condition for Equilibrium Growth

22 The Basic Neoclassical Growth Model 472

The Constant Returns Production Function / Equilibrium Growth in the Neoclassical Model / The Neoclassical Model with Technical Progress / Multiple Equilibria in the Neoclassical Model

23 The Basic Model Extended: Varying Savings Assumptions 491

The Classical Saving Function / The Characteristic Equations of a One-Sector Growth Model / The Kaldor Saving Function / The Ando-Modigliani (A-M) Consumption Function

24 The Golden Rule and an Introduction to Optimal Growth Models 506

The Basic Neoclassical Model Once More / Saving and Consumption in Growth Equilibrium / Phelps' Golden Rule of Accumulation / Optimal Growth Turnpikes / Conclusion

25 Medium-Term Growth and "The Measure of Our Ignorance" 523

Output Growth, Input Growth, and the Constant>Returns-to-Scale Production Function / Neutral Disembodied Technical Progress / Labor-Augmenting Disembodied Technical Progress / Capital-Embodied Technical Progress

Index 539
