INTRODUCTION

Purpose of this manual	1
Justification for assigning economic values to non-market effects	2
A guide to the manual	6

PART I: CONCEPTS

1. The foundations of economic valuation	13
1.1 The uses of economic valuation	13
1.2 The nature of economic valuation and economic efficiency	16
1.3 Economic valuation and other values	18
1.4 Economic valuation when there are no markets	20
1.5 Economic valuation and the demand curve	22
1.6 Willingness to pay and willingness to accept	24
1.7 Total economic value and aggregation	28
1.8 Stated preferences and public participation	38
ANNEX 1.1 Benefits transfer and stated preference techniques	42
ANNEX 1.2 Use of stated preference in UK environmental policy: the case of the aggregates levy	52
ANNEX 1.3 Discounting	55
2. Commissioning a stated preference study	61
2.1 Defining the context	62
2.2 Is economic valuation necessary and credible?	65
2.3 Choosing between economic valuation techniques	74
2.4 Commissioning a valuation study: a checklist	78
2.5 A typical workplan for a stated preference study	84

PART II: STATED PREFERENCE TECHNIQUES

3.	Population, sample and survey mode	89
3.1.	Defining the target population	89
3.2	The need for and the importance of sampling	93
3.3	The sampling frame	94
3.4	Choosing the sample	96
3.5	Choosing the survey mode	101
3.6	Choosing the sample size	107
4.	Designing a contingent valuation questionnaire	112
4.1	Useful lessons from other disciplines	113
4.2	The stages of designing a contingent valuation questionnaire	116
4.3	Pre-testing	151
4.4	The main survey	156
ANNEX 4.1	Writing survey questions	157
5.	Analysis of contingent valuation data	173
5.1	Contingent valuation data sets	174
5.2	Specification of the bid function	182
5.3	Estimating mean and median WTP	191
5.4	Models for testing the validity of WTP values	195
5.5	Models for benefits transfer exercises	196
5.6	Conclusions	197
•	ANNEX 5.1 Econometric estimation of the bid function	199
•	ANNEX 5.2 Estimating mean and median WTP	224
6.	Designing a choice modelling questionnaire	248
6-1	What is choice modelling?	249
6.2	Main choice modelling approaches	250
6.3	Common design stages	258
6.4	Advantages and disadvantages of choice modelling relative to other economic valuation techniques	269
7.	Analysis of choice modelling data	277
7.1	Choice experiments	278
7.2	Contingent ranking	289
7.3	Contingent rating	290
•	7.4 Paired comparison	294

8.	Validity and reliability	•	296
8.1	Preferences, values and validity		297
8.2	Responses to survey questions: some basic issues	•	298
8.3	Value types and their consistency with economic theory		300
8.4	Overview of the validity problem and types of validity' testing		304
8.5	Content validity		305
8.6	Construct validity	—	313
8.7	Reliability	•	334-
8.8	Summary of factors relevant to determining validity and reliability		336
9.	Aggregation		343
9.1	Conditions for valid aggregation		344
9.2	Aggregation approaches	•	347
10.	Reporting		359
10.1	Objectives		359
10.2	Methodology		360
10.3	Literature review		360
10.4	Population and sampling strategy	•	360
10.5	Questionnaire design and implementation		361
10.6	Results		362
10.7	Validity testing	•	363
10.8	Aggregation and implications		363
10.9	Annexes		364

PART III: FURTHER ISSUES

11.	Combining revealed and stated preference techniques	•	367
11.1	Why combine revealed and stated preference techniques		367
11.2	Random utility models combining stated preference and revealed preference data		368
11.3	Contingent behaviour panel data models of price changes		369
11.4	Contingent behaviour models of environmental quality changes	^	371
11.5	Conclusions		374.
ANNEX 11.1	Random utility models combining stated preference and revealed preference data		376

12.	Cautions, caveats and future directions	378
12.1	The standard neo-classical model of preferences	378
12.2	Elicitation and response mode effects	380
12.3	The disparity between WTP and WTA	385
12.4	Scope, embedding and sequencing effects	392
12.5	'Other-regarding' issues; altruism and reciprocity	398
12.6	Conclusions	402
	<i>Bibliography</i>	405
	<i>Glossary</i>	434
	<i>Index</i>	445
