<i>List of Figures</i>	xvii
<i>List of Tables</i>	xix
Introduction	j
<i>Scope of development economics</i>	
<i>Organization of the book</i>	
1. A Theoretical Framework for Economic Development	9
1.1 Development of the Social System	9
1.1.1 <i>A model of dialectic social development</i>	9
1.1.2 <i>A historical example</i>	11
1.1.3 <i>Marx and new institutionalism</i>	14
1.2 The Theory of Induced Innovation*	16
1.2.1 <i>Induced technological innovation</i>	16
1.2.2 <i>Induced institutional innovation</i>	19
1.2.3 <i>Logic of political market</i>	21
1.2.4 <i>Historical path dependency</i>	24
1.3 Developing Economies in the Light of the Theoretical, Framework	25
2. A Comparative Perspective on Developing Economies	29
2.1 Economic Growth and Structural Change	31
2.1.1 <i>Per capita GNP and its growth</i>	31
2.1.2 <i>Changes in industrial structure</i>	33
2.2 Investment, Saving, and Prices	35
2.2.1 <i>Investment and saving in economic growth</i>	35
2.2.2 <i>External debt and inflation</i>	38
2.3 Accumulation of Human Capital	41
2.3.1 <i>Improvements in education and health</i>	41
2.3.2 <i>Regional differences in the level of education</i>	43

* General readers not interested in technical detail may wish to skip sections marked with an asterisk (⌂)

- 2.4 Population, Natural Resources, and Foods
 - 2.4.1 *Population pressure on natural resources*
 - 2.4.2 *Population growth vs. food supply*
- 3. Population Growth and the Constraint of Natural Resources
 - 3.1 Population Growth in Economic Development
 - 3.1.1 *Historical changes in world population*
 - 3.1.2 *Demographic transition*
 - 3.1.3 *The case of India*
 - 3.2 Economic Theories of Population Growth
 - 3.2.1 *The Malthusian model*
 - 3.2.2 *The household utility maximization model**
 - 3.3 Theories of Resource Constraint on Economic Growth
 - 3.3.1 *From Malthus to the Club of Rome*
 - 3.3.2 *The Ricardo model**
 - 3.3.3 *The dual economy model**
- 4. Breaking the Resource Constraint.
 - 4.1 Potential of Science-Based Agriculture
 - 4.2 A Perspective on the Green Revolution
 - 4.2.1 *Development and diffusion of modern varieties*
 - 4.2.2 *Conditions for technology transfer*
 - 4.2.3 *External and internal land augmentation*
 - 4.3 Barriers to Induced Innovation
 - 4.4 Development via Natural Resource Slack
 - 4.4.1 *Colonialism and the vent-for-surplus theory*
 - 4.4.2 *The staple theory*
 - 4.4.3 *The Dutch disease*
- 5. Capital Accumulation in Economic Development
 - 5.1 From Adam Smith to Marx
 - 5.1.1 *Capital in Adam Smith*
 - 5.1.2 *Ricardo revisited*
 - 5.1.3 *The Marx model of capitalist development**

5.2	Development Theories and Policies after World War II	111
5.2.1	<i>The theory of balanced growth</i>	112-
5.2.2	<i>Application of the Harrod-Domar model*</i>	113
5.2.3	<i>The model of low-equilibrium trap*</i>	113
5.2.4	<i>Development theories and policy choice</i>	115
5.3	Growth Accounting Test	116
5.3.1	<i>The growth-accounting equation*</i>	117
5.3.2	<i>The relation with the Harrod-Domar model* , * •</i>	119
5.3.3	<i>Source's of the modern economic growth</i>	121
5.4	Changes in the Pattern of Economic Growth	123
5.4.1	<i>A historical extension of growth-accounting</i>	124
5.4.2	<i>A trap in the Marx-type growth</i>	127
6.	Patterns and Sources of Technological Progress	132
6.1	The Marx vs. the-Kuznets Pattern of Economic Growth	132
6.1.1	<i>Stylization of the two patterns</i>	133
6.1.2	<i>Trends in the rates of saving, interest, and wages</i>	135
6.2	Technological Conditions of the Two Growth Patterns	139
6.2.1	<i>The shift in the industrial technology regime</i>	139
6.2.2	<i>The shift in the demand structure</i>	140
6.2.3	<i>Borrowed technology and the Marx-type growth</i>	142
6.3	Searching for the Sources of Technological Progress	143
6.3.1	<i>Accounting for total factor productivity growth*</i>	144
6.3.2	<i>Schumpeter and centrally planned economies</i>	147
6.3.3	<i>Conditions of borrowing technology</i>	150
6.4	Theoretical Supplements to Technological Progress*	151
6.4.1	<i>Increases in the capital-labour ratio and shifts in the production function «</i>	152
6.4.2	<i>The classification of technological change</i>	153
6.4.3	<i>Changes in the trends of factor prices and shares</i>	155
6.4.4	<i>Possibilities for induced innovation</i>	156
6.4.5	<i>Interpretation by the meta-production function</i>	158
6.4.6	<i>Mathematical analysis of changes in factor shares</i>	160

7. Income Distribution and Environmental Problems

7.1 Economic Growth and Income Distribution

7.1.1 *Personal distribution and functional distribution*7.1.2 *Indicators of inequality*7.1.3 *The inverted-U-shape hypothesis*

7.2 Causes of Inequality

7.2.1 *Changes in factor shares*7.2.2 *The dual economic structure*7.2.3 *Agriculture-non-agriculture income differential*7.2.4 *On the redistribution of incomes and assets*

7.3 Economic Stagnation and Poverty

7.3.1 *Income distribution effects of the Green Revolution*7.3.2 *A comparison of two villages in Indonesia*

7.4 Environmental Problems in Economic Development

7.4.1 *The environmental problems in developing economies*7.4.2 *Rural poverty, and environmental destruction*7.4.3 *Industrialization and environmental pollution*7.4.4 *Lowering the peak of the inverted-U-shape curve*7.4.5 *Toward global coordination*

8. Market and State

8.1 The Economic Functions of the Market and the State

8.1.1 *Efficiency of the competitive market*8.1.2 *Market failure*8.1.3 *Government failure*8.1.4 *On the choice of economic system*

8.2 Around the Infant Industry Protection Argument

8.2.1 *Market failure in dynamic economy*• .. 8.2.2 *Ricardo vs. List*8.2.3 *The Listian trap*8.2.4 *The import-substitution industrialization policy*

8.3 The Rise and Fall of Developmentalist Models

8.3.1 *The limit of information and the role of ideology*8.3.2 *Defeat of the old developmental market economies*

8.3.3	<i>Collapse of the centrally planned economies</i>	• •	217
8.3.4	<i>Trap of the populism</i>		220
8.4	Rise of the New Developmental Market Economies	,	222
8.4.1	<i>The system of new. developmental market economies</i>		222
8.4.2	<i>The source of success</i>		224
8.4.3	<i>Beyond achieving the catch-up goal</i>	" ••	230
8.5	An Emerging New Paradigm	•	233
8.5.1	<i>The structural adjustment policy by IMF and the World Bank</i>	' ..	234
8.5.2	<i>Renaissance of Latin America?</i>		235
8.5.3	<i>On the effectiveness of Structural Adjustment Policy</i>		236
9,	The Role of Community in Economic Modernization		241
9.1	The Economic Functions of Community	•	242
•	9.1.1 <i>Prisoner's dilemma</i>		243
	9.1.2 <i>Trust as a social capital</i>		244
	9.1.3 <i>Supply of local public goods</i>		246
9.2	Rural Organizations in Developing Economies	'	247
	9.2.1 <i>Dominance of peasants</i>		247
	9.2.2 <i>Management of common-property resources</i>		251
	9.2.3 <i>Landlord-tenant relations</i>		254
9.3	Economic Rationality in Community: A Perspective from Philippine Villages		257
	9.3.1 <i>Labour hiring by peasants</i>	'	259
	9.3.2 <i>Income and work-sharing</i>	'	260
	9.3.3 <i>Changes in the sharing system</i>		262
	9.3.4 <i>The role of community norm</i>		264
	9.3.5 <i>Egoism and altruism</i>	•	265
9.4	The Community Failure and its Correction	•	266
	9.4.1 <i>Localized trust and co-operation</i>	' •••	266
	9.4.2 <i>Mutual cover-up and logrolling</i>	'	268
	9.4.3 <i>Is community inflexible?</i>	'	269

10. Tradition and Modernization: A Concluding Remark

10.1 *Institutional Innovation for Technology Borrowing*

10.2 *The Experience of Japan*

10.3 *Multiple Paths to Economic Modernization*
