|                                                               |      |
|---------------------------------------------------------------|------|
| <i>List of Figures</i>                                        | vii  |
| <i>List of Tables</i>                                         | viii |
| <i>Preface</i>                                                | xi   |
| <i>Acknowledgments</i>                                        | xii  |
| <br>                                                          |      |
| 1. Basic Concepts                                             | 1    |
| 1.1 Introduction                                              | 1    |
| 1.2 Foundations of Cost-Benefit Analysis                      | 3    |
| 1.3 Shadow Prices and the Discount Rate                       | 11   |
| 1.4 Different Methods                                         | 15   |
| Appendix 1.1 Interpersonal and Inter-temporal Weights         | 23   |
| <br>                                                          |      |
| 2. Foreign Exchange                                           | 28   |
| 2.1 The Classification of Goods                               | 28   |
| 2.2 Pricing Marginally Traded Goods                           | 30   |
| 2.3 The Shadow Price Ratio of Foreign Exchange                | 31   |
| 2.4 More Realistic Assumptions                                | 45   |
| 2.5 Domestic and Foreign Exchange Numeraires                  | 54   |
| Appendix 2.1 A Simple General Equilibrium Derivation          | 58   |
| <br>                                                          |      |
| 3. Labor                                                      | 62   |
| 3.1 The Shadow Price of Labor                                 | 62   |
| 3.2 Dual Labor Markets                                        | 71   |
| 3.3 Other Special Cases                                       | 84   |
| 3.4 The UNIDO and the Little-Mirrlees Shadow Prices for Labor | 90   |
| <br>                                                          |      |
| 4. Land                                                       | 92   |
| 4.1 Introduction                                              | 92   |
| 4.2 No External Effects                                       | 92   |
| 4.3 Usable Land as a Partially Produced Good                  | 96   |
| 4.4 Other Issues                                              | 97   |
| 4.5 External Effects                                          | 99   |
| <br>                                                          |      |
| 5. Fiscal Resources                                           | 102  |
| 5.1 The Problem                                               | 102  |

|     |                                                                  |     |
|-----|------------------------------------------------------------------|-----|
| 5.2 | Implications of Simple Models                                    | 103 |
| 5.3 | A Simple Partial Equilibrium Example                             | 105 |
| 5.4 | Fiscal Policy and Net Fiscal Effects                             | 110 |
| 5.5 | Empirical Studies                                                | 113 |
|     | Appendix 5.1 A Simple General Equilibrium Derivation             | 114 |
| 6.  | Produced Goods                                                   | 116 |
| 6.1 | The Rationale for Using Input-Output Techniques                  | 116 |
| 6.2 | A Numerical Example                                              | 121 |
| 6.3 | Cost Structures for Marginally Produced Goods                    | 123 |
| 6.4 | Preparing the Input-Output Table                                 | 126 |
| 6.5 | Nonproduced Inputs in the Input-Output Table                     | 135 |
| 6.6 | Using Existing Input-Output Tables                               | 139 |
| 6.7 | Estimating <i>spr</i> s without an Input-Output Table            | 143 |
| 6.8 | Some Empirical Results                                           | 144 |
|     | Appendix 6.1 Inputs in Fixed Supply and Partially Produced Goods | 149 |
| 7.  | Using and Updating Shadow Prices                                 | 152 |
| 7.1 | Pricing Project Outputs                                          | 152 |
| 7.2 | Pricing Project Inputs                                           | 157 |
| 7.3 | Using Shadow Prices to Calculate More                            | 159 |
| 7.4 | Updating the Estimates                                           | 164 |
|     | Appendix 7.1 Derivation of Expressions (7.16) and (7.17)         | 175 |
| 8.  | Shadow Prices for Colombia                                       | 177 |
| 8.1 | Introduction                                                     | 177 |
| 8.2 | Methodological Approach                                          | 180 |
| 8.3 | The Use of Marginal Cost Estimates                               | 187 |
| 8.4 | Investment and Consumption Conversion Factors                    | 192 |
| 8.5 | Updating the Matrix                                              | 195 |
| 8.6 | Foreign Exchange                                                 | 198 |
| 8.7 | Labor                                                            | 209 |
| 8.8 | Results                                                          | 225 |
|     | Appendix 8.1 The Preparation of the Input-Output Table           | 242 |
