Essays on Economic Integration

Haris Munandar Erasmus University Rotterdam 1 December 2006

Contents

Ac	Acknowledgements v								
1	Introduction								
	1.1	Motiva	ation and structure of the thesis.	. 1					
		1.1.1	The limiting distribution of production	. 1					
		1.1.2	Zipf's law for an integrated economy.	2					
		1.1.3	Human capital formation and income inequality.	4					
		1.1.4	Monetary integration and exchange rates dynamics.	5					
	1.2	1.2 Contributions of the thesis							
	1.3	Outlin	e of the thesis.	9					
2	A new perspective on convergence: implication of economic integration								
	on t	the lim	iting distribution of production	11					
	2.1	Introd	uction	11					
	2.2 Output and factor shares in integrated economies.		it and factor shares in integrated economies.	15					
		2.2.1	Equalization of rates of return	. 15					
		2.2.2	Productivity calculation	17					
		2.2.3	Differences in technology and barrier to factor mobility.	17					
	2.3	Implications of equal-share relationship							
	2.4	4 Empirical analysis							
		2.4.1	Testing the theory: regression specification	. 20					
		2.4.2	Summary of data	. 23					
		2.4.3	Estimation results.	30					
	2.5	Concl	uding remarks	31					
3	Characterizing a fully integrated economy: empirics and consequences								
	of Zipf's law								
	3.1	Introd	luction	35					
	3.2	Equal	ity of output and factor shares in integrated economies	37					
	3.3	Rank-	share distribution and Zipf's law.	39					

	3.3.1	Empirical specification	41
	3.3.2	Problems with OLS estimates.	.42
	3.3.3	Estimation results.	.44
	3.3.4	Equal-share relationship.	.45
	3.3.5	Limiting distribution of shares	.49
3.4	Conclu	iding remarks.	.52
Hun	nan ca	pital formation and income inequality: the significance of	
endo	ogenou	s labor supply and capital markets integration	55
4.1	Introdu	uction	.55
	4.1.1	Education, openness and income inequality.	56
	4.1.2	Heterogeneous agents and overlapping generations economy.	.57
	4.1:3	Model characteristics!	.59
4.2	Human	n capital formation	.60
	4.2.1	Preferences and technology.	.60
	4.2.2	Competitive equilibrium	.63
	4.2.3	Income at the future date.	.65
	4.2.4	Absence of parental participation	.66
	4.2.5	Endogenous labor supply and lack of human capital as determinants	
		of poverty trap	.67
	4.2.6	Cross-family variation of endogenous labor supply	69
4.3	Capita	al markets integration •.	.70
	4.3.1	Comparing two economies under autarky	.70
	4.3.2	Equilibrium under capital markets integration	71
4.4	Endog	genous labor supply, openness and income inequality	.73
4.5	Initial	endowments, public education and education technology as sources	
	of inco	ome inequality under endogenous labor specification	.76
4.6	Nume	rical simulation	.79
4.7	Concl	uding remarks.	.82
4.A	Proofs	s and derivation	.83
Mo	netary	integration and exchange rates dynamics: the euro introduc-	
tior	and a	non-euro currencies	91
5.1	Introd	luction.	.91
5.2	The in	ntroduction of the euro \ldots	93
	5.2.1	Monetary integration in Europe.	.94
	5.2.2	Non-euro countries	<u>95</u>
5.3	Data	description	.99
5.4	Dyna	mic conditional correlation models.	.103

	5.5	Empirical results	.107
	5.6	Sensitivity analysis.	.118
	5.7	Concluding remarks.	.123
6	Sun	nmary and further research	125
A	A Data methods and sources		
	A.I	Data construction of output, physical capital and human capital	.129
	A.2	Statistics of the Netherlands for simulation of the human capital formation	
		model	.132
	A.3	Data explanation and sources of exchange rates.	.133
