<i>Preface</i>	xi
<i>Notes on contributors</i>	xii
1 The mainstreaming of cycling policy	1
<i>Hugh McClintock, University of Nottingham</i>	
1.1 Introduction	1
1.2 Health and transport	2
1.3 Environmental policy	4
1.4 Urban quality of life	4
1.5 Road safety	5
1.6 Sustainable development	8
1.7 National and regional contrasts in levels of cycle use	9
1.8 The role of public policy in the development of cycling policy	13
1.9 References	14
2 The development of UK cycling policy	17
<i>Hugh McClintock, University of Nottingham</i>	
2.1 Introduction	17
2.2 Landmarks in UK cycling policy development: 1970s to early 1990s	18
2.3 National Cycling Strategy	19
2.4 The development of technical guidance for cycle infrastructure	20
2.5 The 1998 Integrated Transport White Paper and Local Transport Plans	21

2.6	Revised planning policy guidance on land use and transport planning.	23
2.7	Assessment of UK cycle policy experience: some challenges for the future	24
2.8	References	33
3	Promoting cycling through ‘soft’ (non-infrastructural) measures	36
	<i>Hugh McClintock, University of Nottingham</i>	
3.1	Introduction	36
3.2	Cycling to work and to education	38
3.3	Cycle use for shopping trips	41
3.4	Cycle parking.	41
3.5	Leisure cycling.	42
3.6	Other cycling promotion initiatives	43
3.7	Partnership, leadership and the importance of a co-ordinated approach to cycling promotion.	45
3.8	Monitoring of cycle use and learning from experience	46
3.9	References	46
4	Making space for cyclists – a matter of speed?	50
	<i>Michael Yeates, Architect and Urbanist, Cyclists’ Urban Speedlimit Taskforce, Brisbane, Australia</i>	
4.1	Introduction	50
4.2	The policy position regarding cycling	52
4.3	Urban planning and traffic in towns.	52
4.4	The Australian context	54
4.5	Safety	55
4.6	Integration – or separation?	56
4.7	Speed management in Australia.	60
4.8	Where to start first?	61
4.9	The local town centre as just one of the first steps?	62
4.10	Sharing a safer main street?	63
4.11	Sharing a safer main street? A concept from Denver, Colorado	64
4.12	Bicycle-friendly streets in Brisbane	64
4.13	Sharing a safer main street in practice	66
4.14	Bicycle-friendly streets in New South Wales?	66
4.15	Where to from here?	67
4.16	The future	69
4.17	References	70
5	Homezones and traffic calming: implications for cyclists	72
	<i>Graham Paul Smith, Joint Centre for Urban Design, Oxford Brookes University, Oxford</i>	
5.1	The homezone idea	72

5.2	Who is the homezone/ <i>woonerf</i> for?	73
5.3	Popularity of the homezone	73
5.4	National policy.	74
5.5	Inherent disadvantages of the hierarchical system.	76
5.6	Induced traffic and reducing traffic	77
5.7	Case study: De Strijp	78
5.8	The homezone: a conclusion	83
5.9	Notes	84
5.10	References	85
6	Developing healthy travel habits in the young:	
	Safe Routes to School in the UK.	86
	<i>Jo Cleary, Cleary Hughes Associates, Hucknall, Nottingham</i>	
6.1	Introduction	86
6.2	Redressing the decline	87
6.3	Central government action	91
6.4	How are the issues being addressed?	93
6.5	Routes to School travel plan	94
6.6	Cycling to school	95
6.7	Notes	99
6.8	References	99
7	The UK National Cycle Network: a millennium project.	100
	<i>John Grimshaw, Director, Sustrans</i>	
7.1	Introduction	100
7.2	The development of a national Network.	102
7.3	The growth of the Network	103
7.4	Usage of the Network	106
7.5	The future	109
7.6	References	109
8	Cycling with public transport: combined in partnership, not conflict	110
	<i>Dave Holladay, Transport Management Solutions, Glasgow</i>	
8.1	Introduction	110
8.2	Journey profile – assessing the potential.	112
8.3	Cycle access to and from railway stations	115
8.4	Providing short and long term cycle parking at stations	116
8.5	Parking for regular users – all day/all night	118
8.6	‘Bicycle stations’ and cycle hire facilities.	121
8.7	Cycle parking at suburban stations and bus/tram stops	123
8.8	Park-and-ride schemes – and the corruption of their use	123
8.9	Carriage of bikes on trains	125
8.10	Carriage of bikes on trams and light rail	129
8.11	External interface between bikes and trams	130

8.12	Carriage of bikes on buses and taxis	133
8.13	Sharing road space with buses	138
8.14	The paperwork – audits and conditions of carriage	138
8.15	Promotion	139
8.16	Conclusion	140
8.17	References	140

9 Planning for more cycling: the York experience bucks

the trend	143
----------------------------	-----

James Harrison, City of York Council

9.1	Introduction	143
9.2	The Transport Strategy	143
9.3	Funding of cycle infrastructure	144
9.4	The cycle network	145
9.5	City centre bridges	147
9.6	The ‘magic roundabout’	147
9.7	The Millennium Bridge	149
9.8	Marketing	150
9.9	Reducing social exclusion	150
9.10	Maintenance	151
9.11	Monitoring	151
9.12	Safety	152
9.13	Usage and targets	152
9.14	Future aspirations	153
9.15	Summary	154

10 Planning for cyclists in Edinburgh 155

Richard Williams, City of Edinburgh District Council

10.1	Introduction	155
10.2	Conversion of old railway lines	155
10.3	A 30 year plan	158
10.4	Following the water	159
10.5	Following the bus	160
10.6	Other traffic management measures including cycle parking	161
10.7	Safe Routes to School	163
10.8	Traffic calming	164
10.9	SPOKES	165
10.10	A network approach	166
10.11	New projects for a new millennium	166
10.12	Cycle policies	168
10.13	Benchmarking	169
10.14	Cycle use	169

11 Nottingham	171
<i>Hugh McClintock, University of Nottingham</i>	
11.1 Introduction	171
11.2 Development of the Greater Nottingham cycle network	173
11.3 The Greater Nottingham cycle-friendly employers project	175
11.4 Wider changes in the national and local transport planning context	179
11.5 Other cycling policy initiatives	181
11.6 Cycling controversies	183
11.7 Monitoring of cycle use	185
11.8 Conclusions: some future challenges	186
11.9 References	190
12 An efficient means of transport: experiences with cycling policy in the Netherlands	192
<i>Ton Welleman, Fietsberaad (Dutch Cycling Council)</i>	
12.1 Introduction	192
12.2 Geographical background to cycling in the Netherlands	193
12.3 The history of bicycle use and bicycle policy in the Netherlands	194
12.4 Dutch bicycle policy during the twentieth century	195
12.5 1990–1999: the Bicycle Master Plan period	198
12.6 Bicycle use	201
12.7 Cyclists' safety	201
12.8 The combination of public transport and bicycle	205
12.9 Bicycle parking facilities and theft prevention	207
12.10 Conclusion	207
12.11 Plans for future bicycle policy at a national level	207
13 German cycling policy experience	209
<i>Wolfgang Bohle, Planungsgemeinschaft Verkehr, Hanover</i>	
13.1 Introduction	209
13.2 Promotion of cycling by municipalities and federal states	210
13.3 Cycling to work: promotion of cycling by enterprises	218
13.4 Comment: relevant German cycling policy experiences	220
13.5 Notes	221
13.6 References	222
14 Urban cycling in Denmark	223
<i>Thomas Krag, Consultant, Copenhagen</i>	
14.1 Introduction	223
14.2 Decrease in cycling – with exceptions	223
14.3 History	224
14.4 National Cycling Strategy	225

14.5	Cycle tracks and paths	225
14.6	Traffic safety	227
14.7	The national cycling city of Denmark	228
14.8	Copenhagen – city for cyclists.	230
14.9	The City Bike – a positive publicity project.	233
14.10	Notes	236
15	Traffic calming on the national road network to improve cycling conditions in small towns in Poland: the case of Kobylnica Slupska on National Road 21.	237
	<i>Andrzej Zalewski, Lodz University of Technology, Poland</i>	
15.1	Introduction	237
15.2	National context of bicycle use in Poland	237
15.3	Case of Kobylnica	239
15.4	Final conclusions	249
15.5	References	250
16	Padua: a decade to become a cycle city	251
	<i>Marcello Mamoli, Istituto Universitario di Architettura di Venezia, Italy</i>	
16.1	Introduction	251
16.2	The development of a cycling strategy.	252
16.3	Key requirements for the cycling network	253
16.4	Implementation	258
16.5	The current situation.	259
16.6	Notes.	261
17	US bicycle planning	263
	<i>Andy Clarke, Association of Pedestrian and Bicycle Professionals, Washington DC</i>	
17.1	Introduction	263
17.2	Future prospects	265
17.3	Obstacles	269
17.4	New directions	271
17.5	Conclusion.	272
17.6	References	273
18	Increasing cycling through ‘soft’ measures (TravelSmart) – Perth, Western Australia.	274
	<i>Colin Ashton-Graham, Government of Western Australia, with Gary John, Bruce James, Werner Brög and Helen Grey-Smith</i>	
18.1	Introduction: the Western Australia situation	274
18.2	Perth policy context	275
18.3	Infrastructure approach (Perth Bicycle Network)	276

18.4	Non-built approach (TravelSmart)	277
18.5	Project history	281
18.6	Methods.	282
18.7	Programme evaluation	286
18.8	Next steps	288
18.9	References	288
Appendix: Sustainable urban travel: contacts and websites.		290
