*Preface* ..... xi

*Contributor contact details* ..... xiii

Introduction: talking the talk but not walking the walk ..... xv  
*Rodney Tolley, CAST (The Centre for Alternative and Sustainable Transport), UK*

Part 1 Principles ..... 1

1 Ecological footprints and urban transportation ..... 3  
*William Rees, University of British Columbia, Canada*

2 The relevance of climate change to future policy on walking and cycling ..... 20  
*Mayer Hillman, Policy Studies Institute, UK*

3 The role of non-motorised modes in an environmentally sustainable transport system ..... 32  
*Karst Geurs and Bert van Wee, National Institute for Public Health and the Environment, The Netherlands*

4 Walking in a historical, international and contemporary context ..... 48  
*Peter Newman, Murdoch University, Australia*

5 Does anyone walk anymore? ..... 59  
*Werner Brog and Erhard Erl, Socialdata, Germany, and Bruce James, Government of Western Australia, Australia*

6 The decline of everyday walking in the UK: explanations and policy implications ..... 70  
*Rachel Goodman, Stoke-on-Trent City Council, UK, and Rodney Tolley, CAST (The Centre for Alternative and Sustainable Transport), UK*

7	Visions for city traffic and mobility . . . . .	84
	<i>Rolf Monheim, University of Bayreuth, Germany ,</i>	
8	Winning back public space . . . . .	97
	<i>Jan Gehl and Lars Gemz0e, Royal Danish Academy of Fine Arts, Denmark</i> *	
9	Formal indicators of social urban sustainability. . . . .	107
	<i>Sergio Porta, Polytechnic of Milan, Italy</i>	
10	The role of cycling for women. . . . .	123
	<i>Ursula Lehner-Lierz, veloiconsidt, Switzerland .</i>	
11	The potential of non-motorised transport for promoting health. . . . .	144
	<i>Nick Cavill, Cavill Associates, UK</i>	
12	The walking economy. . . . .	159
	<i>Ian Napier, IN Partnership Consulting Pty Ltd, Australia</i>	
13	Planning for cycling supports road safety. . . . .	172
	<i>Roelof Wittink, I-ce Interface for Cycling Expertise, The Netherlands</i>	
14	Walking and its relationship to public transport . . . . .	189
	<i>Carmen Has's-Klau, Environmental and Transport Planning, UK</i>	
15	Perceptions of walking - ideologies of perception. . . . . ; . . . .	200
	<i>Daniel Sauter, Urban Mobility Research, Switzerland</i>	
16	Attitudes to walking and cycling . . . . .	210
	<i>Son/a Forward, Swedish Road and Transport Research Institute, Sweden</i>	
17	Overcoming the attitude barriers to greater cycle use. . . . .	224
	<i>Hugh McClintock, University of Nottingham, UK</i>	
18	Social and cultural influences on the future of walking - the experts' opinion. . . . .	238
	<i>Rodney Tolley, CAST (The Centre for Alternative and Sustainable Transport), UK, Karen Bickerstaff, University of East Anglia, UK, and Les Lumsdon,- Manchester Metropolitan University, UK</i>	
19	Cars and behaviour: psychological barriers to car restraint and sustainable urban transport . . . . .	252
	<i>Rene Diekstra, Rotterdam City Council, The Netherlands, and Martin Kroon, Ministry of the Environment, The Netherlands</i>	

Part II	Strategies .....	265
20	Infrastructure planning for cycling .....	267
	<i>Jan Ploeger, Interprovincial Co-operative Body (IPO), The Netherlands</i>	
21	Creating a better walking environment .....	282
	<i>Carlton Roberts-James, Institution of Highways &amp; Transportation (IHT), UK</i>	
22	Making pedestrian facilities more usable and safer for all . . .	298
	<i>Barbara McMillen, Federal Highway Administration, USA</i>	
23	Walkable towns: the Liveable Neighbourhoods strategy.....	314
	<i>Evan Jones, Government of Western Australia, Australia</i>	
24	The role of pedestrian precincts in adapting city centres to new lifestyles. ....	326
	<i>Rolf Monheim, University of Bayreuth, Germany</i>	
25	Safety of pedestrians and cyclists in Europe: the DUMAS approach. ....	339
	<i>Maurizio Tira, University of Brescia, Italy</i>	
26	Traffic safety for walkers and cyclists: the danger reduction approach. ....	351
	<i>Ken Spence, Road Danger Reduction Forum', UK</i>	
11	Walking and cycling: what to promote where. ....	358
	<i>Tim Pharoah, Independent Consultant, UK</i>	
28	Fundamentals of pedestrian advocacy. ....	375
	<i>Ellen Vanderslice, America Walks, USA</i>	
29	TravelSmart/Individualised Marketing in Perth, Western Australia.....	384
	<i>Bruce James, Government of Western Australia, Australia, and Werner Brog, Socialdata, Germany</i>	
30	Creating supportive environments for physical activity: encouraging walking .....	402
	<i>Cheryl Wright, National Heart Foundation of Australia, Australia</i>	
31	Health conscious transport planning: barriers and opportunities to inter-sector collaboration. ....	421
	<i>Adrian Davis, Adrian Davis Associates, UK</i>	
32	Green modes and US transport policy: TEA-21. ....	433
	<i>Andy Clarke, Association of Pedestrian and Bicycle Professionals, USA</i>	

33	Bicycle transport in the US: recent trends and policies . . . .	450
	<i>Charles Komanojf Komanoff Energy Associates, USA, and John Pucher, Rutgers University, USA</i>	
34	Planning for recreational cycling in the UK . . . . .	465
	<i>Les Lumsdon, Manchester Metropolitan University, UK</i>	
35	The politics of changing to green modes . . . . .	474
	<i>Lynn Sloman, University of Westminster Transport Studies Group (formerly Transport 2000), UK</i>	
Part III Practice . . . . .		489
36	Segregation or integration of cycling in the road system: the Dutch approach . . . . .	491
	<i>Tom Godefrooij, Province of Noord-Brabant, The Netherlands</i>	
37	Conserving walkable environments in Japan . . . . .	501
	<i>Toshio Kitahara, Chiba University, Japan</i>	
38	The Cycle Balance: benchmarking local cycling conditions . . . . .	511
	<i>FrankBorgman, The Dutch Cyclists' Union, The Netherlands</i>	
39	Implementing local cycling policies in Great Britain . . . . .	525
	<i>Philine Gaffron, Technical University of Hamburg-Harburg, Germany</i>	
40	Barring the way: gated communities and walking . . . . .	539
	<i>Matthew Burke, University of Queensland, Australia</i>	
41	Promoting walking in the US: overcoming the 'stickiness' problem . . . . .	550
	<i>Mark Fenton, University of North Carolina Pedestrian and Bicycle Information Center, USA</i>	
42	Promoting walking in the UK: bottling walking and making it sell . . . . .	564
	<i>Jim Walker, London Walking Forum, UK</i>	
43	Non-motorised Transportation Demand Management . . . . .	573
	<i>Todd Litman, Victoria Transport Policy Institute, Canada</i>	
44	Safer routes to Danish schools . . . . .	588
	<i>Soren Underlien Jensen, Atkins, Denmark, and Camilla Hviid Hummer, Danish Transport Research Institute, Denmark</i>	
45	Cycling and social inclusion . . . . .	599
	<i>Jake Elster, London School of Economics, UK</i>	

Part IV	Case studies	617
46	Best practice in pedestrian facility design: Cambridge, Massachusetts <i>Cara Seiderman and Rosalie Anders, City of Cambridge, MA, USA</i>	619
47	Designing streets for people. <i>Barry Sellers, Wandsworth Borough Council, UK</i>	629
48	Bicycle theft in France. <i>Nicolas Mercat, Altermodal Research Consultancy, France, and Frederic Heran, IFRESI-CNRS, France</i>	641
49	Breaking out by bike: cycling courses as a means of integration and emancipation. <i>Angela van der Kloof Centre for Foreign Women, The Netherlands</i>	650
50	Network promotion: increasing bicycle use in Perth, Western Australia. <i>Colin Ashton-Graharn, Government of Western Australia, Australia</i>	659
51	Promoting cycling in Italian cities: the case of Padua <i>Marcello Mamoli, University Institute of Architecture of Venice (IUAV), Italy</i>	670
52	Promoting walking in British cities: the case of York <i>Daniel Johnson, City of York Council, UK, and Tim Carter, Cambridgeshire County Council, UK</i>	679
53	The UK 'Walking the way to Health' Initiative. <i>Peter Ashcroft, Countryside Agency, UK</i>	687
54	Cycle training and the promotion of cycling. <i>Ken Spence, Road Danger Reduction Forum, UK</i>	692
