<i>Preface</i>	v
<i>List of Editors and Authors</i>	vii
<i>List of Tables and Figures</i>	xxi
Introduction: A Historic Survey of Macroeconometric Models in Japan	1
<i>Shinichi Ichimura</i>	
1 Available Statistics in Japan	1
1.1 Rich historic statistics.	1
1.2 Long term economic statistics.	1
1.3 Japanese national income statistics.	2
1.4 Interindustrial relations tables.	3
1.5 Survey data	6
1.6 Flow of funds table.	7
2 Social Accounting Approaches and Use of Survey Data	7
2.1 Great ratios in national income accounts.	7
2.2 Identification of post-war Japanese business cycles	8
3 Input-Output Analysis and CGE Models	8
3.1 Structural analysis with 10 tables.	8
3.2 Applications to regional analyses and CGE models	10
3.3 Flow of funds tables and its applications.	11
4 Macroeconometric Models.	11
4.1 Kazuo Sato's survey and other readings of Japanese models.	11
4.2 Long-term modeling and quantitative economic history	13
4.3 Standard macroeconometric models in early stages	13
4.4 Models integrated with 10 analysis and internationally linked	15
4.5 Macroeconometric models after 1988.	18

4.6 High frequency short-term forecasting model and medium-term model.	20
References.	23

Part I. Social Accounting and Survey Analysis **31**

**Chapter 1: Factors for Rapid Growth of the Japanese
Economy: A Social Accounting Approach** **33**

Shinichi Ichimura

1 Introduction	33
2 Exposition of a Simple Social Accounting Model	35
3 Our Social Accounting System and Statistical Data	39
4 Rapid Industrialization, Dual Structure and Technical Progress.	44
5 Supply of Productive Factors and Technical Progress	48
6 Resource Allocation and Market Mechanism	51
7 The Growth of National Expenditure and Its Composition	55
References.	61

Chapter 2: Social Accounting Analysis of Japan's Lost 90s **63**

Hyun Suk

1 Introduction	63
2 Construction and Applications of MSAM	64
2.1 Macroeconomic SAM.	64
2.2 The MSAM multipliers.	65
3 SAM Multiplier Analysis	68
4 Summary.	73
References.	76
Websites.	77

Chapter 3: Business Indexes and Survey Data for Forecast **79**

Yuji Shimanaka and Tatsushi Shikano

1 Introduction	79
2 the Criteria to Recognize Economic Conditions	79
2.1 The business indexes, GDP statistics, and the BOJ Tankan.	79
2.2 Schumpeter's approach and the BOJ's Tankan	83
2.3 Momentary wind velocity and the GDP growth rate	83

2.4	Predicting the economic outlook by the direction of change.	84
2.5	Monthly surveys — Reuters, economy watchers, and the consumer confidence.	88
3	The Use of Leading Indexes — MUS Leading Index.	90
3.1	The history of Japan's business indexes.	90
3.2	The MUS Leading Index (MUS-LI) for the Japanese economy.	92
3.3	The performance of the MUS-LI for the Japanese economy.	99
3.4	The merits and demerits of forecasts using leading indexes.	102
	References.	104

Part II. Input-Output Analyses and CGE Models 107

Chapter 4: Factor Proportions and Foreign Trade: The Case of Japan 109

Masahiro Tatemoto and Shinichi Ichimura

1	The Leontief Paradox?	109
2	Computational Procedures and Statistical Data	110
3	Statistical Results and Implications	112

Chapter 5: Interregional Interdependence and Regional Economic Growth in Japan 119

Takahiro Akita

1	Introduction	119
2	Data and Method	122
2.1	Data	122
2.2	Method.	122
3	Major Findings.	126
4	Conclusions.	133
	Appendix.	134
	References.	135

Chapter 6: The Flying-Geese Pattern of East Asian Development: A Computable General Equilibrium Approach 137

Mitsuo Ezaki and Shoichi Ito

1	Introduction	137
2	Flying-Geese Pattern of Development	138

3	Link CGE System and Elasticity-Multipliers	139
3.1	Basic framework	139
3.2	Data	144
3.3	Structure	146
3.4	Solution method	153
3.5	Elasticity-multipliers	154
4	Comparative Statics and Dynamics of Technology Changes	155
4.1	Theory of flying-geese pattern	155
4.2	Differences in technology	157
4.3	Comparative statics of technology changes	159
4.4	Comparative dynamics of technology changes	164
5	Concluding Remarks	169
	References	170

Chapter 7: A Flow-of-Funds Analysis of Quantitative Monetary Policy

173

KazMSiike Tsujimura and Masako Tsujimura

1	Introduction	173
2	Asset Liability Matrix	175
2.1	E-and R-tables	175
2.2	Y- and Y*-tables	176
3	Methodologies	178
3.1	ALM with BOJ as exogenous institutional sector	178
3.2	Evaluation of quantitative monetary policy	179
3.3	Contributing factors to fluctuations in Nil	180
4	Estimation Results	183
4.1	Monthly fluctuations and the degree of contribution to Nil	183
4.2	Examination of money market operation methods	186
5	Policy Implications	188
	Appendix	189
A.1	Y and F* matrices	189
A.2	e^Y and p^Y in the Y-table	190
A.3	e^Y and p^F in the Y*-table	191
	References	192

Part III. Macroeconometric Models	195
Chapter 8: An Econometric Model of Japanese Economic Growth, 1878-1937	197
<i>Lawrence R. Klein</i>	
1 Introduction	197
2 The Nature of the Model	198
3 The Sample and Estimates	203
4- Extrapolation and the Rate of Growth of the Japanese Economy.	206
Chapter 9: An Econometric Model of Japan, 1930-1959	213
<i>Lawrence R. Klein and Yoichi Shinkai</i>	
1 Introduction	213
2 Rationale of the Model	214
2.1 The variables	219
2.2 The estimated equations.	220
3 Some Properties of the System	222
4 Extrapolation to 1959.	228
5 Prospects for Japanese Development in the Light of the Model.	231
Appendix	233
Sources of data	234
Sources of data for extrapolation and forecasting	235
Chapter 10: Osaka ISER Model	241
I. An Outline of the Model	241
<i>Lawrence R. Klein and Shinichi Ichimura</i>	
1 The ISER Model in Contemporary Macroeconomic Theory	241
2 The Model and Data Availability.	244
3 The General Framework	245
4 List of Time Series and Symbols	253
4.1 Series of production sectors ⁵	253
4.2 Series of the household sector.	256
4.3 Series of external trade.	256
4.4 Financial series.	258
4.5 Series related to the government sector (100 billion Yen unless otherwise specified).	259

6	The Foreign Trade Sector	312
6-A	Import functions.	312
6-B	Export functions.	313
7	Miscellaneous Equations and Identities	317
III. Dynamic Properties of the Model		320
<i>Shinichi Ichimura and Lawrence R. Klein</i>		
1	Impact Multipliers	320
2	Final Test	323
3	Dynamic Multipliers of Government Expenditure and Exports	325
4	Multiplier Effects of the Fall in Impact Prices	329
5	Multiplier Effects of Rise in Agricultural Productivity.	330
6	Multiplier Effects for Personal Income Tax Reduction	330
7	Multiplier Effects of Excise Tax Cut	333
8	Analysis of the Effects of Monetary Policies	334
	Appendix.	336
	References.	340
Chapter 11: The Japan Model for World Project LINK		343
<i>Kanemi Ban</i>		
1	Introduction	343
2	List of Variables in the Ban Model.	343
3	The System of Equations.	349
3.1	Expenditure side equations.	349
3.2	Price variables.	353
3.3	Labor and work variables.	356
3.4	Households Sector.	359
3.5	Corporate sector.	360
3.6	Government sector.	361
3.7	Financial sector.	362
3.8	Foreign trade.	364
Chapter 12: The Saito Model of the Japanese Economy		379
<i>Milsuo Saito</i>		
1	Introduction	379
2	List of Variables.	379
3	The System of Equations	379
3.1	The expenditure sector.	384
3.2	The distribution sector.	385

3.3	The price sector.	386
3.4	Government, banks and external balances.	387
3.5	Additions to the model, 1974-1993.	387
4	Final Test	388
5	D.W. Ratios in the Model	388
6	Changes in the Foreign Exchange Rate and their Effects	390
7	Effects of Oil Crisis	391
8	An Analysis of the Low Rate of Growth in the 1990s	391

Chapter 13: High Frequency Model vs. Consensus Forecast 393
Yoshihisa Inada

1	Introduction	393
2	Consensus Forecast	393
2.1	ESP forecast survey.	394
2.2	Forecast errors	394
2.3	Accuracy of consensus forecast	396
3	High Frequency Model Forecast	397
3.1	Use of monthly or weekly data in HF model.	397
3.2	Forecasting weekly GDP by ARIMA model.	398
4	Prediction Errors: Consensus vs. HF Model Forecast	401
4.1	Timing of data announcement and forecast errors.	401
4.2	Features of prediction errors in both forecasts.	402
4.3	Forecast time-point and the prediction errors.	405
4.4	Dynamic forecast process — recent experiences.	405
5	Concluding Remarks	408
	References.	408

Chapter 14: Policy Alternatives for Japan Toward 2020 411
Shuntaro Shishido, Akira Kawakami and Kiyoshi Tamashiro

1	Introduction	411
2	The Structure of Model DEMIOS.	412
2.1	Features of the model.	412
2.2	Demographic block.	412
2.3	Input-output block.	415
2.4	Macroeconomic block.	418
3	Dynamic Multipliers	421
4	Japan's Stagnation During 1992-2005 was Avoidable	422

5	Alternative Scenarios on Economic Growth for 2020	433
5.1	Baseline scenario.	434
5.2	Policy scenario.	434
5.3	Sector-level production.	443
6	Concluding Remarks and Future Research	445
	References.	453
	<i>Author Index</i>	455
	<i>Subject Index</i> '	459
