<i>List of figures</i>	viii
<i>List of acronyms and symbols</i>	ix
<i>Preface</i>	xiii
1 Objectives, puzzles, and preview	1
1.1 Objectives	1
1.2 A brief history of existing theories	2
1.3 Puzzling stylized facts	8
1.4 Preview	14
1.5 Summary	17
2 Balance of payments theory	20
2.1 Introduction	20
2.2 Cash-flow imbalances	21
2.3 An open economy Walrasian identity within a period model	24
2.4 The structure of stock-flow and asset market models	26
2.5 Theoretical and policy implications	28
2.6 Alternative theories of the balance of payments	30
2.7 The correct time dimension for the money supply	37
2.8 Summary	3g
3 The optimum balance of payments composition	4 j
3.1 Introduction	41
3.2 A closed economy intertemporal model	42
3.3 A small open economy	47
3.4 Implications of the intertemporal model	5 j
3.5 A perspective	55
3.6 Summary	56
4 Reductions in gains from intertemporal trade	59
4.1 Introduction	59
4.2 Distortions and the gains from intertemporal trade	60
4.3 Import tariffs and transportation costs	63
4.4 Differences in income tax rates	65
4.5 The relative price of nontraded goods	66
4.6 Consumption correlations	68
4.7 Summary	71

5	An infinite horizon intertemporal model	73
5.1	Introduction	73
5.2	Extending the intertemporal model	74
5.3	The fundamental equation for the optimum current account	78
5.4	The causes of current account imbalances	81
5.5	The saving versus investment puzzle	84
5.6	Summary	89
6	A commodity market approach to the balance of payments	93
6.1	Introduction	93
6.2	The structure and relevance of the CBP	94
6.3	A simple CBP model	96
6.4	Some implications of the CBP	98
6.5	The welfare cost of payments adjustment via tariffs	101
6.6	Summary	105
7	A loanable funds theory of the exchange rate	108
7.1	Introduction	108
7.2	The long run monetary and loanable funds models	110
7.3	The sticky-price MER	112
7.4	The sticky-price LFER	118
7.5	Summary	128
	Appendix: The slope of $A_L A_L$ versus the slope of $A_M A_M$	130
8	A modern foreign exchange market theory: I	132
8.1	Introduction	132
8.2	Puzzling stylized facts again	133
8.3	The model	142
8.4	Discontinuous jumps and puzzles #1, #2, and #9	149
8.5	A perspective	150
8.6	Summary	150
9	A modern foreign exchange market theory. II	155
9.1	Introduction	155
9.2	Short term drifts and long swings: puzzles #3 and #9	156
9.3	The forward discount bias: puzzle #4	164
9.4	Heteroskedasticity and volatility clusters: puzzle #5	167
9.5	Leptokurtosis: puzzle #6	169
9.6	Rationality and puzzles #4, #7, #8, and #9	169
9.7	Observations and complications	174
9.8	Summary	177
