
Competing by Design
The Power of Organizational
Architecture

DAVID A. NADLER AND MICHAEL L. TUSHMAN

WITH MARK B. NADLER

New York Oxford
OXFORD UNIVERSITY PRESS

1997

Contents

1 A Blueprint for Change, 3

How organizational architectures—the creative configuration of strategy, structure, work, people, and culture—provide managers with the tools to create true competitive advantage

2 Mapping the Organizational Terrain, 21

A conceptual model for understanding how organizations work and how essential it is to design the proper “fit” among all of the components

3 The Principles of Design, 43

The basic terms and concepts used in designing organizations

4 The Crucial Design Issues, 59

Focusing on the modern organization as a mechanism for processing information and exploring the ways in which design affects the flow of information and work

5 Choosing a Basic Structure—Strategic Groups, 71

The first set of crucial decisions that will create the framework for the rest of the organization design—selecting grouping patterns to match strategic objectives

6 Coordinating Work—Strategic Linking, 89

Designing formal “linkages”—systems, processes, teams, and individual roles for coordinating work throughout the organization

7 Designing at the Enterprise Level, 117

Leveraging competitive strength through creative internal designs and external strategic alliances

8 Designing at the Operational Level, 139

Working from the ground up—the advantages and disadvantages of process reengineering and the design and function of High-Performance Work Systems

9 A Process for Design, 161

Critical steps in the strategic design process: what decisions to make and who should make them

10 Implementing New Designs, 181

Understanding the crucial importance of implementation; the key role of organizational culture in any design effort

11 Knowing When to Redesign, 205

In a turbulent competitive environment, the only thing that’s certain is that no organizational design will last forever

12 The Lessons of Design, 225

Ten essential themes to guide managers through the design process

Index, 235
