Contents

List of Tables	xi
List of Figures	xiv
Series Foreword	xvii
Preface	xix
1 Introduction	1
1.1 The Context of Transportation Demand Forecasting	1
1.2 The Background of Discrete Choice Analysis	2
1.3 Transportation Applications of Discrete Choice Analysis	3
1.4 Outline of the Book	4
2 Review of the Statistics of Model Estimation	7
2.1 The Estimation Problem	7
2.2 Criteria for Evaluating Estimators	11
2.3 Small Sample Properties	12
2.4 Asymptotic Properties	17
2.5 Methods of Estimation	20
2.6 Key Statistical Tests	23
2.7 Summary	29
3 Theories of Individual Choice Behavior	31
3.1 Introduction	31
3.2 A Framework for Choice Theories	31
3.3 Rational Behavior	38
3.4 Economic Consumer Theory	39
3.5 Extensions of Consumer Theory	42
3.6 Discrete Choice Theory	43
3.7 Probabilistic Choice Theory	48
3.8 Summary	57
4 Binary Choice Models	59
4.1 Making Random Utility Theory Operational	60
4.2 Common Binary Choice Models	66
4.3 Examples of Binary Choice Models	74

4.4	Maximum Likelihood Estimation of Binary Choice Models	79
4.5	Examples of Maximum Likelihood Estimation	87
4.6	Other Estimation Methods for Binary Choice Models	94
4.7	Summary	99
5	Multinomial Choice	100
5.1	Theory of Multinomial Choice	100
5.2	The Multinomial Logit Model	103
5.3	Properties of Logit	108
5.4	Specification of a Multinomial Logit Model	114
5.5	Estimation of Multinomial Logit	118
5.6	Example of Estimation Results	121
5.7	Other Multinomial Choice Models	123
5.8	Summary	129
6	Aggregate Forecasting Techniques	131
6.1	The Problem of Aggregation across Individuals	131
6.2	Typology of Aggregation Methods	134
6.3	Description of Aggregation Procedures	135
6.4	A Comparison of Methods for Aggregate Forecasting	148
6.5	Summary	153
7	Tests and Practical Issues in Developing Discrete Choice Models	154
7.1	Introduction	154
7.2	The Art of Model Building	154
7.3	A Mode Choice Model Example	155
7.4	Tests of Alternative Specifications of Variables	157
7.5	Tests of the Model Structure	183
7.6	Prediction Tests	207
7.7	Summary	216
8	Theory of Sampling	217
8.1	Basic Sampling Concepts	218
8.2	Overview of Common Sampling Strategies	221

8.3	Sampling Strategies for Discrete Choice Analysis	229
8.4	Estimating Choice Models under Alternative Sampling Strategies	234
8.5	Choosing a Sample Design for Discrete Choice Analysis	244
8.6	Summary	250
9	Aggregation and Sampling of Alternatives	253
9.1	Introduction	253
9.2	Aggregation of Alternatives	253
9.3	Estimation of Choice Models with a Sample of Alternatives	261
9.4	Estimation Results for Three Destination Choice Models	269
9.5	Summary	275
10	Models of Multidimensional Choice and the Nested Logit Model	276
10.1	Multidimensional Choice Sets	276
10.2	Multidimensional Choice Sets with Shared Observed Attributes: Joint Logit	278
10.3	Multidimensional Choice Models with Shared Unobserved Attributes: Nested Logit	285
10.4	Estimating the Nested Logit Model	295
10.5	Multidimensional Choice Models with Shared Unobserved Attributes: Multinomial Probit	299
10.6	Measure of Accessibility	300
10.7	Derivation of the Nested Logit Model from the Generalized Extreme Value Model	304
10.8	An Example of a Multidimensional Choice Model	310
10.9	Summary	321
11	Systems of Models	323
11.1	Introduction	323
11.2	Issues in Model System Design	324
11.3	A System of Urban Travel Demand Models for Metropolitan Region Transportation Planning	327
11.4	A Short-Range Travel Demand Model System	338
11.5	Summary	357

12 Models of Travel Demand: Future Directions	359
12.1 Introduction	359
12.2 Components of Travel Demand Modeling Process	359
12.3 Behavioral Theory	360
12.4 Measurement	364
12.5 Statistical Model Structure	368
12.6 Estimation	371
12.7 Summary	372
Bibliography	374
Index	385
