FIGURES

- 2.1 Puzzling Preferences over Redistribution: Illustrations 49
- 2.2 Violin Plot of Local Relative Position v. Perceived National Position (South Africa) 56
- 2.3 Violin Plot of Local Relative Position v. Perceived National Position (United States) 57
- 2.4 Economic Reference Groups in South Africa 66
- 2.5 Level of Attachment to Neighbors in Rural v. Urban Areas (South Africa) 75
- 2.6 Variation to Be Explained in South African Municipal Underspending 80
- 3.1 Perceived Levels of Corruption among Elected Leaders 149
- 3.2 Optimism about Living Conditions over Next Year, Black Respondents 154

TABLES

- 2.1 Change in Predicted Probability of Supporting Redistribution 60
- 2.2 Estimated Change in Predicted Probability of Dissatisfaction with Inequality for Different Categories of Respondents in South Africa 63
- 2.3 Estimated Change in Predicted Probability of Strongly Supporting Government-Led Redistribution for Different Categories of Respondents in the United States 63
- 2.4 Change in Predicted Probability of Strongly Agreeing That Inequality Is Too High and Government Should Do More, Using Subjective Relative Position (South Africa) 68
- 2.5 Change in Predicted Probability of Strongly Agreeing Government Should Do More Using Two Categorical Values of Relative Position, by Who Engages in Local Comparisons 70
- 2.6 Heterogeneous Effects of Local Relative Position in Rural v. Urban Areas 73
- 2.7 Heterogeneous Effects of Local Relative Position on View That Incomes Are Too Unequal, Depending on Strength of Social Ties 75
- 2.8 Relationship between Changes in Black Income Inequality and Municipal Budget Spending 92

- 2.9 Relationship between Changes in Black Income Inequality and Roads Spending 95
- 2.10 Variation across Case Study Municipalities 99
- 2.11 Differences in Rates of Intended and Actual Participation 121
- 2.12 Effect of Closely Reading Admiration Emails on Participation 123
- 2.13 Differences in Rates of Reported Participation 124
- 2.14 Differences in Mean Rates of Choosing a Reason for Participation Behavior 127
- 2.15 Assurance Game for Participation 136
- 3.1 Stylized Choices Involving Inequity Aversion, Altruism, and Status Concerns 143
- 3.2 (Lack of) Heterogeneous Effects of Relative Local Position on Wanting More Progressive National Tax System, by Children at Home 158
- 3.3 (Lack of) Heterogeneous Effects of Relative Local Position on Support for Redistribution, by Lives in Same State 161
- 3.4 Relationship between Percent Change in Black Income Inequality and Municipal Budget Spending, Controlling for % Population Moved in during Last Five Years 163
- E.1 Variables from Afrobarometer 2002 189
- E.2 Variables from SASAS 2005 193
- E.3 Variables from GSS 2006 197
