Contents

Preface xiii

1. Initial Overviews: Encyclopedias 3

General vs. specialized encyclopedias—Examples—How to identify which ones exists in different subject areas—Peculiar strengths of general sets

2. Subject Headings and the Library Catalog 16

Filing conventions—Filing sequence—Subject headings—Uniform heading—Scope-match specificity—Specific entry—Four ways to find the proper category term—Narrower-term cross-references—Alphabetically adjacent narrower terms—Subject tracings—Subdivisions—Recognition vs. prior specification—Narrowing a topic—Finding foreign-language books—Copy cataloging problem for researchers—Advantages and disadvantages of the catalog—Essay collections—Summary

3. Systematic Browsing, Scanning, and Use of Classified Bookstacks 46

Possible methods of shelving books—Serendipity and discovery by recognition—Depth of access and full-text searching—Browsing vs. scanning—Shelf arrangement

complements library catalog: advantages and disadvantages—Scattering of subjects—Exploiting the library's internal structure—Continuing need for classified bookstacks in computer age—Ways to find the right classification areas—Browsing in other situations

4. Subject Headings and Indexes to Journal Articles 59

H. W. Wilson Company indexes and databases—Vocabulary control—Information Access Company databases—FirstSearch and Eureka databases—Use of *Library of Congress Subject Headings* for cross-disciplinary inquiries—Specialized indexes and databases—Narrowing a search—Finding where a particular journal is indexed—Full texts online—Identifying journals in a particular subject area—Cataloging peculiarities of serials vs. books—Problems with abbreviations—Journals whose titles include the name of an organization

5. Keyword Searches 80

Keywords vs. subject headings: advantages and disadvantages—Print and computer sources—Institute for Scientific Information (ISI) indexes and databases—Trade-offs—*Periodicals Contents Index*—Printed keyword sources—Indexes to very old journals—Additional keyword sources—Cross-disciplinary coverage of ISI sources

6. Citation Searches 98

ISI indexes—Examples—Advantages and limitations—Additional citation databases and indexes—Extra features ofISIindexes

7. Related-Record Searches 105

ISI CD-ROMs—Circumventing limitations of keyword searches—Searching backward, forward, and sideways in time

8. Higher-Level Overviews: Review Articles 110

State-of-the-art reviews—Sources for identifying reviews—Key points of Chapters 4 through 8

9. Published Bibliographies 117

Advantages over computer printouts—Boolean combinations without using a computer—How the use of bibliographies compares to other search techniques—Separate shelving of bibliographies—The "—Bibliography" subdivision—How to find bibliographies—Guides to the literature—Great books lists

10. The Differences Between Real and Virtual Libraries 132

Copyright restrictions—*What, Who;* and *Where* tradeoffs—Quality control—Format differences and their significance—Cataloging—Ranges of electronic sources in real libraries—Bait-and-switch claims

11. Computer Searches: Types of Sources 144

Bibliographic Citation databases—Online Public Access Catalogs—CD-ROMs—OCLC FirstSearch—RLG Eureka—CARL UnCover and Faxon Finder—Dialog—Full Text Databases—CD-ROMs—Internet full-text sources—NEXIS and other fee-based sources—Internet and World Wide Web sources—Points to remember about computer searches

12. Computer Searches: Types of Searches 159

Comparison of computer and print capabilities—Keyword searches—Document-type searches—Boolean combinations—Component-word searches of controlled-vocabulary terms—Searches of coded elements—Geographic area codes—Combined citation and keyword searches—Web searches—Hierarchical and direct stab—Boolean combinations outside computers—Keyword

searches outside computers—Consequences of naivete—How to identify appropriate databases

13. Locating Material in Other Libraries 183

Determining which specific sources exist on your topic—Shortcuts to finding the best books—Library of Congress catalog online—Printed catalogs—Determining where copies can be found—Online union catalogs—*National Union Catalog: Pre-1956 Imprints*—Other union lists—Determining which libraries have special collections on your subject

14. People Sources 203

Attitudes and assumptions—It's okay to ask for help—Advantages of getting overviews and feedback—Internet groups—Tips on phone calls—Sources—Talking to reference librarians

15. Hidden Treasures 220

Microform sets—CD-ROM collections—Government documents

16. Reference Sources: Searching by Types of Literature 245

Reference vs. research questions—Summary of major points of book—Methods of searching and types of literature—Explanation of types—Understanding formal properties of retrieval systems—Advantages over subject knowledge—Sources

Appendix: Special Cases 259

Archives, manuscripts, and public records 260
Biography 266
Book reviews 269
Business and economics 269

Conference proceedings 280
Consumer product evaluations 281
Current awareness sources 281
Films and audiovisual material 282
Genealogy and local history 283
Illustrations, pictures, and photographs 287
Literary criticism 289
Maps 293
Newspapers and newspaper indexes 294
Out-of-print and secondhand books 296
Primary sources 297
Psychological and educational tests 298
Reports 301
Standards and specifications 302
Statistics 303
Tabular data 305
Translations 305

Index 309
