Contents

List of Figures	ix
List of Tables	xi
Preface	xiii
Notation	xvii
1. INVENTORY AND SUPPLY CHAIN MODELS WITH FORECAST UPDATES	1
1.1 Introduction	1
1.2 Aims of the Book	2
1.3 Information Dynamics in Supply Chains	5
1.3.1 Information Distortion in Supply Chains	6
1.3.2 Information Sharing in Supply Chains	6
1.3.3 Information Updates in Supply Chains	8
1.4 Inventory and Supply Chains with Multiple Delivery Modes	10
1.5 Supply Contracts	12
1.6 Competitive Supply Chains	14
2. EXAMPLES FROM INDUSTRY	23
2.1 Introduction	23
2.2 Industry Observations	24
2.3 Multistage Forecasts	31
2.3.1 Dynamics of Forecast Updates	31
2.3.2 Marginal Distribution of the Variance of Demand	32
2.3.3 Forecast Precision	32
2.4 Operational Factors Affecting Forecasting Process	33
2.4.1 Price Promotion	33

2.4.2	Lot Sizing	
2.4.3	New-Product Launch	
2.4.3.1	Forecasting for Introduction of a New Product	
2.4.3.2	Variances of Demand Forecasts due to New-Product Launches	
2.4.4	Pre-confirmed Orders	
2.5	Concluding Remarks	
2.6	Notes	
3.	INVENTORY MODELS WITH TWO CONSECUTIVE DELIVERY MODES	
3.1	Introduction	
3.2	Notation and Model Formulation	
3.3	Dynamic Programming and Optimal Nonanticipative Policy	
3.4	Optimality of Base-Stock Policies	
3.5	The Nonstationary Infinite-Horizon Problem	
3.6	An Example	
3.7	Concluding Remarks	
3.8	Notes	
3.9	Appendix	
4.	INVENTORY MODELS WITH TWO CONSECUTIVE DELIVERY MODES AND FIXED COST	
4.1	Introduction	
4.2	Notation and Model Formulation	
4.3	Dynamic Programming and Optimal Nonanticipative Policy	
4.4	Optimality of (s, S) Ordering Policies	
4.5	Monotonicity Properties	
4.6	The Nonstationary Infinite-Horizon Problem	
4.7	Concluding Remarks	
4.8	Notes	
5.	INVENTORY MODELS WITH THREE CONSECUTIVE DELIVERY MODES	129
5.1	Introduction	129
5.2	Notation and Model Formulation	130
5.3	Dynamic Programming and Optimal Nonanticipative Policies	136
5.4	Optimality of Base-Stock Type Policies	144

5.5	The Nonstationary Infinite-Horizon Problem	158
5.6	Concluding Remarks	161
5.7	Notes	162
6.	MULTIPERIOD QUANTITY-FLEXIBILITY CONTRACTS	165
6.1	Introduction	165
6.2	Model and Problem Formulation	166
6.3	Contingent Order Quantity at Stage 2	170
6.4	Optimal Purchase Quantity at Stage 1	175
6.4.1	The Case of Worthless Information Revision	180
6.4.2	The Case of Perfect Information Revision	190
6.5	Impact of Forecast Accuracy	196
6.6	Multiperiod Problems	202
6.7	Numerical Example	206
6.8	Concluding Remarks	216
6.9	Notes	218
7.	PURCHASE CONTRACT MANAGEMENT: FIXED EXERCISE COST	223
7.1	Introduction	223
7.2	Problem Formulation	224
7.3	Optimal Solution for Stage 2	226
7.4	Optimal Solution for a Class of Demand Distributions	232
7.5	Analysis for Uniformly Distributed Demand	236
7.5.1	Optimal Solution	237
7.5.2	Further Analysis	252
7.6	Concluding Remarks	253
7.7	Notes	254
8.	PURCHASE CONTRACT MANAGEMENT: TWO-PLAYER GAMES	257
8.1	Introduction	257
8.2	Problem Formulation	258
8.3	Reaction Strategies Under Uniformly Distributed Demand	262
8.3.1	The Buyer's Reaction Strategy	263
8.3.2	The Supplier's Reaction Strategy	266
8.4	A Static Noncooperative Game	267
8.4.1	The Static Game with Information Sharing	268

8.4.2	The Static Game Without Information Sharing	272
8.4.3	Impact of Information Sharing	273
8.5	A Dynamic Noncooperative Game	276
8.5.1	The Subgame-Perfect Nash Equilibrium with Information Sharing	277
8.5.2	The Subgame-Perfect Nash Equilibrium Without Information Sharing	277
8.5.3	Effects of Information Sharing on the Decisions	279
8.6	Concluding Remarks	281
8.7	Notes	283
	Copyright Permissions	285
	Index	287
