

Applied Time Series Modelling and Forecasting

Richard Harris and Robert Sollis

Durham University

Contents

Preface	ix
1 Introduction and Overview	1
Some Initial Concepts	2
Forecasting	10
Outline of the Book	15
2 Short- and Long-run Models	25
Long-run Models	25
Stationary and Non-stationary Time Series	26
Spurious Regressions	32
Cointegration	34
Short-run Models	36
Conclusion	39
3 Testing for Unit Roots	41
The Dickey-Fuller Test	42
Augmented Dickey-Fuller Test	48
Power and Level of Unit Root Tests	54
Structural Breaks and Unit Root Tests	57
Seasonal Unit Roots	63
Structural Breaks and Seasonal Unit Root Tests	70
Periodic Integration and Unit Root-testing	74
Conclusion on Unit Root Tests	76

4	Cointegration in Single Equations	79
	The Engle-Granger (EG) Approach	79
	Testing for Cointegration with a Structural Break	84
	Alternative Approaches	87
	Problems with the Single Equation Approach	92
	Estimating the Short-run Dynamic Model	96
	Seasonal Cointegration	100
	Periodic Cointegration	103
	Asymmetric Tests for Cointegration	104
	Conclusions	108
5	Cointegration in Multivariate Systems	109
	The Johansen Approach	110
	Testing the Order of Integration of the Variables	112
	Formulation of the Dynamic Model	114
	Testing for Reduced Rank	122
	Deterministic Components in the Multivariate Model	132
	Testing of Weak Exogeneity and VECM with Exogenous $I(1)$ Variables	135
	Testing for Linear Hypotheses on Cointegration Relations	142
	Testing for Unique Cointegration Vectors	152
	Joint Tests of Restrictions on α and β	155
	Seasonal Unit Roots	157
	Seasonal Cointegration	159
	Conclusions	161
	Appendix 1 Programming in <i>SHAZAM</i>	164
6	Modelling the Short-run Multivariate System	165
	Introduction	165
	Estimating the Long-run Cointegration Relationships	166
	Parsimonious VECM	173
	Conditional PVECM	176
	Structural Modelling	176
	Structural Macroeconomic Modelling	185

CONTENTS	vii
7 Panel Data Models and Cointegration	189
Introduction	189
Panel Data and Modelling Techniques	190
Panel Unit Root Tests	191
Testing for Cointegration in Panels	200
Estimating Panel Cointegration Models	206
Conclusion on Testing for Unit Roots and Cointegration in Panel Data	211
8 Modelling and Forecasting Financial Times Series	213
Introduction	213
ARCH and GARCH	215
Multivariate GARCH	221
Estimation and Testing	225
An Empirical Application of ARCH and GARCH Models	228
ARCH-M	232
Asymmetric GARCH Models	233
Integrated and Fractionally Integrated GARCH Models	238
Conditional Heteroscedasticity, Unit Roots and Cointegration	240
Forecasting with GARCH Models	244
Further Methods for Forecast Evaluation	250
Conclusions on Modelling and Forecasting Financial Time Series	257
Appendix Cointegration Analysis Using the Johansen Technique: A Practitioner's Guide to <i>PcGive 10.1</i>	259
Statistical Appendix	269
References	285
Index	298
