

Introduction to Management Science

Ninth Edition

Bernard W. Taylor III

Virginia Polytechnic Institute and State University

Prentice Hall

Upper Saddle River, New Jersey 07458

Brief Contents

Preface xiii

1 Management Science	1	14 Simulation	611
2 Linear Programming: Model Formulation and Graphical Solution	29	15 Forecasting	666
3 Linear Programming: Computer Solution and Sensitivity Analysis	71	16 Inventory Management	728
4 Linear Programming: Modeling Examples	110	Appendix A	
5 Integer Programming	180	Normal Table	773
6 Transportation, Transshipment, and Assignment Problems	222	Chi-square Table	774
7 Network Flow Models	272	Appendix B	
8 Project Management	320	Setting Up and Editing a Spreadsheet	775
9 Multicriteria Decision Making	389	Appendix C	
10 Nonlinear Programming	451	The Poisson and Exponential Distributions	779
11 Probability and Statistics	476	Solutions to Selected Odd-Numbered Problems	781
12 Decision Analysis	514	Glossary	789
13 Queuing Analysis	572	Index	795
		Photo Credits	803
		The following items can be found on the CD that accompanies this text:	
		CD-ROM Modules	
		Module A: The Simplex Solution Method	A-1
		Module B: Transportation and Assignment Solution Methods	B-1
		Module C: Integer Programming: The Branch and Bound Method	C-1
		Module D: Nonlinear Programming Solution Techniques	D-1
		Module E: Game Theory	E-1
		Module F: Markov Analysis	F-1

Contents

Preface xiii

1 Management Science 1

- The Management Science Approach to Problem Solving 2
- **Time Out:** for Pioneers in Management Science 5
 - **Management Science Application:** Management Science at Taco Bell 6
- Model Building: Break-Even Analysis 7
- Computer Solution 12
- Management Science Modeling Techniques 16
- Business Usage of Management Science Techniques 18
- **Management Science Application:** Management Science at FedEx 19
- Management Science Models in Decision Support Systems 20
- **Management Science Application:** A Decision Support System for Aluminum Can Production at Coors 22
- Summary 22 • References 23 • Problems 23 • Case Problems 27*

2 Linear Programming: Model Formulation and Graphical Solution 29

- Model Formulation 30
- A Maximization Model Example 30
- **Time Out:** for George B. Dantzig 31
- Graphical Solutions of Linear Programming Models 34

- **Management Science Application:** Operational Cost Control at Kellogg 35
- **Management Science Application:** Estimating Food Nutrient Values at Minnesota's Nutrition Coordinating Center 46

A Minimization Model Example 47

- **Management Science Application:** Determining Optimal Fertilizer Mixes at Soquimich (South America) 51

Irregular Types of Linear Programming Problems 53

Characteristics of Linear Programming Problems 55

Summary 57 • References 57 • Example Problem Solutions 57 • Problems 61 • Case Problems 69

3 Linear Programming: Computer Solution and Sensitivity Analysis 71

Computer Solution 72

- **Management Science Application:** Optimizing Production Quantities at GE Plastics 76

Sensitivity Analysis 79

- **Management Science Application:** Grape Juice Management at Welch's 82

Summary 92 • References 92 • Example Problem Solution 93 • Problems 95 • Case Problems 107

4 Linear Programming: Modeling Examples 110

A Product Mix Example 111

A Diet Example 116

An Investment Example 119

- **Management Science Application: The Evolution of the Diet Problem** 120

- **Management Science Application: A Linear Programming Model for Optimal Portfolio Selection at Prudential Securities, Inc.** 124

A Marketing Example 125

A Transportation Example 129

A Blend Example 132

A Multiperiod Scheduling Example 135

- **Management Science Application: Gasoline Blending at Texaco** 137

A Data Envelopment Analysis Example 140

- **Management Science Application: Analyzing Bank Branch Efficiency by Using DEA** 141

Summary 144 • References 145 • Example Problem Solution 145 • Problems 147 • Case Problems 176

5 Integer Programming 180

Integer Programming Models 181

- **Management Science Application: Allocating Operating Room Time at Toronto's Mount Sinai Hospital** 184

Integer Programming Graphical Solution 185

Computer Solution of Integer Programming Problems with Excel and QM for Windows 187

- **Time Out: for Ralph E. Gomory** 188

- **Management Science Application: College of Business Class Scheduling at Ohio University** 190

0-1 Integer Programming Modeling Examples 194

- **Management Science Application: Optimal Assignment of Gymnasts to Events** 194

- **Management Science Application: Managing Prototype Vehicle Test Fleets at Ford** 200

- **Management Science Application: Planning Next-Day Air Shipments at UPS** 202

Summary 203 • References 203 • Example Problem Solution 203 • Problems 204 • Case Problems 216

6 Transportation, Transshipment, and Assignment Problems 222

The Transportation Model 223

- **Time Out: for Frank L. Hitchcock and Tjalling C. Koopmans** 225

- **Management Science Application: Transportation Models at Nu-kote International** 226

Computer Solution of a Transportation Problem 226

The Transshipment Model 230

The Assignment Model 234

Computer Solution of an Assignment Problem 235

- **Management Science Application: Assigning Managers to Construction Projects** 238

Summary 238 • References 239 • Example Problem Solution 239 • Problems 240 • Case Problems 266

7 Network Flow Models 272

Network Components 273

The Shortest Route Problem 274

The Minimal Spanning Tree Problem 281

- **Management Science Application: Reducing Travel Costs at the Defense Contract Management Agency** 282

The Maximal Flow Problem 286

- **Time Out: for E. W. Dijkstra, L. R. Ford, Jr., and D. R. Fulkerson** 287

- **Management Science Application: Improving Service for Yellow Freight System's Terminal Network** 288

Summary 292 • References 293 • Example Problem Solution 293 • Problems 295 • Case Problems 314

8 Project Management 320

The Elements of Project Management 321

- **Time Out: Henry Gantt** 326

- **Management Science Application: Project "Magic" at Disney Imagineering** 328

CPM/PERT 329

- **Time Out: for Morgan R. Walker, James E. Kelley, Jr., and D. G. Malcolm** 330

Probabilistic Activity Times 338

- **Management Science Application: The 2002 Winter Olympic Games in Salt Lake City** 344

Microsoft Project 345

Project Crashing and Time-Cost Trade-off 351

- **Management Science Application: Reconstructing the Pentagon After 9/11** 356

Formulating the CPM/PERT Network as a Linear Programming Model 357

Summary 364 • *References* 364 • *Example Problem Solution* 365 • *Problems* 367 • *Case Problems* 386

9 Multicriteria Decision Making 389

Goal Programming 390

Graphical Interpretation of Goal Programming 394

Computer Solution of Goal Programming Problems with QM for Windows and Excel 397

- **Management Science Application: Developing Television Advertising Sales Plans at NBC** 398

- **Time Out: for Abraham Charnes and William W. Cooper** 401

The Analytical Hierarchy Process 404

- **Management Science Application: Selecting Students for Graduate Studies Abroad at Dar Al-Hekma Women's College** 405

- **Management Science Application: Analyzing Advanced-Technology Projects at NASA** 411

- **Management Science Application: Selecting a Site for a New Ice Hockey Arena by Using AHP** 414

Scoring Models 416

Summary 418 • *References* 418 • *Example Problem Solutions* 418 • *Problems* 422 • *Case Problems* 447

10 Nonlinear Programming 451

Nonlinear Profit Analysis 452

Constrained Optimization 455

Solution of Nonlinear Programming Problems with Excel 458

A Nonlinear Programming Model with Multiple Constraints 461

Nonlinear Model Examples 463

- **Management Science Application: Gas Production in Australia** 466

Summary 468 • *References* 469 • *Example Problem Solution* 469 • *Problems* 469 • *Case Problems* 474

11 Probability and Statistics 476

Types of Probability 477

Fundamentals of Probability 479

- **Management Science Application: Treasure Hunting with Probability and Statistics** 481

Statistical Independence and Dependence 483

Expected Value 490

- **Management Science Application: A Probability Model for Analyzing Coast Guard Patrol Effectiveness** 492

The Normal Distribution 492

Summary 504 • *References* 504 • *Example Problem Solution* 504 • *Problems* 506 • *Case Problem* 513

12 Decision Analysis 514

Components of Decision Making 515

Decision Making Without Probabilities 516

- **Management Science Application: Decision Analysis at DuPont** 518

Decision Making with Probabilities 523

- **Management Science Application: Evaluating Electric Generator Maintenance Schedules Using Decision Tree Analysis** 534

Decision Analysis with Additional Information 538

- **Management Science Application: Decision Analysis in the Electric Power Industry** 539

- **Management Science Application: Discount Fare Allocation at American Airlines** 541

- **Management Science Application: Scheduling Refueling at the Indian Point 3 Nuclear Power Plant** 545

Utility 545

Summary 547 • *References* 547 • *Example Problem Solution* 547 • *Problems* 551 • *Case Problems* 568

13 Queuing Analysis 572

Elements of Waiting Line Analysis 573

The Single-Server Waiting Line System 574

- **Time Out: for Agner Krarup Erlang** 575

- **Management Science Application: Reducing Perceived Waiting Time at Bank of America** 583

Undefined and Constant Service Times 584

Finite Queue Length 587

- **Management Science Application: Providing Telephone Order Service in the Retail Catalog Business** 589

Finite Calling Population 590

The Multiple-Server Waiting Line 593

Additional Types of Queuing Systems 598

Summary 599 • *References* 599 • *Example Problem Solution* 600 • *Problems* 601 • *Case Problems* 609

14 Simulation 611

The Monte Carlo Process 612

- **Time Out: for John Von Neumann** 617

Computer Simulation with Excel Spreadsheets 617

Simulation of a Queuing System 623

- **Management Science Application: Simulating the Israeli Army Recruitment Process** 626

Continuous Probability Distributions 627

Statistical Analysis of Simulation Results 632

Crystal Ball 634

Verification of the Simulation Model 643

Areas of Simulation Application 643

- **Management Science Application: Simulating a 10-km Race in Boulder, Colorado** 645

Summary 645 • *References* 646 • *Example Problem Solution* 647 • *Problems* 649 • *Case Problems* 663

15 Forecasting 666

Forecasting Components 667

Time Series Methods 669

- **Management Science Application: Product Forecasting at Nabisco** 673

- **Management Science Application: Forecasting Customer Demand at Taco Bell** 674

- **Management Science Application: Seasonal Forecasting at Dell** 679

- **Management Science Application: Forecasting Service Calls at FedEx** 683

Forecast Accuracy 683

- **Management Science Application: Demand Forecasting at National Car Rental** 687

Time Series Forecasting Using Excel 688

Time Series Forecasting Using QM for Windows 690

Regression Methods 691

- **Management Science Application: Forecasting Daily Demand in the Gas Industry** 695

Summary 702 • *References* 702 • *Example Problem Solutions* 703 • *Problems* 705 • *Case Problems* 725

16 Inventory Management 728

Elements of Inventory Management 729

Inventory Control Systems 731

- **Time Out: for Ford Harris** 733

Economic Order Quantity Models 733

The Basic EOQ Model 733

The EOQ Model with Noninstantaneous Receipt 739

The EOQ Model with Shortages 742

- **Management Science Application: Determining Inventory Ordering Policy at Dell** 745

EOQ Analysis with QM for Windows 746

EOQ Analysis with Excel and Excel QM 746

Quantity Discounts 747

- **Management Science Application: Quantity Discount Orders at Mars** 750

Reorder Point 752

Determining Safety Stock by Using Service Levels 754

- **Management Science Application: Establishing Inventory Safety Stocks at Kellogg's** 757

Order Quantity for a Periodic Inventory System 758

Summary 759 • *References* 760 • *Example Problem Solutions* 760 • *Problems* 761 • *Case Problems* 769

Appendix A

Normal Table 773

Chi-square Table 774

Appendix B

Setting Up and Editing a Spreadsheet 775

Appendix C

The Poisson and Exponential Distributions 779

Solutions to Selected Odd-Numbered Problems 781

Glossary 789

Index 795

The following items can be found on the CD that accompanies this text:

CD-ROM Modules

Module A: The Simplex Solution Method A-1

**Module B: Transportation and Assignment Solution
Methods B-1**

**Module C: Integer Programming: The Branch and Bound
Method C-1**

**Module D: Nonlinear Programming Solution Techniques
D-1**

Module E: Game Theory E-1

Module F: Markov Analysis F-1
