Lily Elefteriadou

An Introduction to Traffic Flow Theory

3

Contents

Part I Modeling Traffic: Vehicle – Driver – Driving Environment Interactions

1	Modeling the Motion of a Single Vehicle	3
	Motion of a Single Vehicle	3
	The Case of Constant Speed	6
	The Case of Constant Acceleration	6
	The Case of Varying Acceleration	8
	Equations of Motion as a Function of Distance and Speed	14
	Vehicle Trajectories and Traffic Performance	15
	Effects of Vehicle Characteristics on the Motion	
	of a Single Vehicle	15
	Effects of Driver Characteristics and Behavior	
	on the Motion of a Single Vehicle	20
	Effects of the Driving Environment on the Motion	
	of a Single Vehicle	24
	Location and Surroundings	25
	Facility Type	25
	Highway Design	25
	Control	27
	Other Factors	28
	References	28
2	Modeling Vehicle Interactions and the Movement	
	of Groups of Vehicles	31
	Car-Following	32
	A Historical Overview of Car-Following Algorithms	36
	Currently Used Models: The Gipps Model	40
	Other Currently Used Models	43
	Evaluations of Car-Following Algorithms Using Field Data	47
	Concluding Remarks on Car-Following Models	48
