Edward Batschelet

Introduction to Mathematics for Life Scientists

Third Edition

With 227 Figures

Springer-Verlag Berlin Heidelberg New York 1979

Contents

Chapter 1. Real Numbers

1.1 Introduction 1
1.2 Classification and Measurement 1
1.3 A Problem with Percentages 4
1.4 Proper and Improper Use of Percentages 6
1.5 Algebraic Laws 7
1.6 Relative Numbers 10
1.7 Inequalities 13
1.8 Mean Values 14
1.9 Summation 15
1.10 Powers 17
1.11 Fractional Powers 20
1.12 Calculations with Approximate Numbers 22
*1.13 An Application 24
1.14 Survey 25

Problems for Solution 26

Chapter 2. Sets and Symbolic Logic

2.1 "New Mathematics" 36
2.2 Sets 36
2.3 Notations and Symbols 37
2.4 Variable Members 40
2.5 Complementary Set 40
2.6 The Union 41
2.7 The Intersection 42
*2.8 Symbolic Logic 45
*2.9 Negation and Implication 48
*2.10 Boolean Algebra 50

Problems for Solution 55

Chapter 3. Relations and Functions

3.1 Introduction 59
3.2 Product Sets 59
3.3 Relations 62
3.4 Functions 65

3.5 A Special Linear Function 70
3.6 The General Linear Function 74
*3.7 Linear Relations 78

Problems for Solution 82

Chapter 4. The Power Function and Related Functions
4.1 Definitions 90
4.2 Examples of Power Functions 91
4.3 Polynomials 97
4.4 Differences 99
4.5 An Application 101
4.6 Quadratic Equations 104

Problems for Solution 106

Chapter 5. Periodic Functions
5.1 Introduction and Definition 110
5.2 Angles 111
5.3 Polar Coordinates 114
5.4 Sine and Cosine 115
5.5 Conversion of Polar Coordinates 119
5.6 Right Triangles 123
5.7 Trigonometric Relations 129
*5.8 Polar Graphs 130
*5.9 Trigonometric Polynomials 132

Problems for Solution 139

Chapter 6. Exponential and Logarithmic Functions I
6.1 Sequences 143
6.2 The Exponential Function 146
6.3 Inverse Functions 148
6.4 The Logarithmic Functions 152
6.5 Applications 155
*6.6 Scaling 157
*6.7 Spirals 162

Problems for Solution 165

Chapter 7. Graphical Methods
7.1 Nonlinear Scales 170
7.2 Semilogarithmic Plot 173
7.3 Double-Logarithmic Plot 176

7.4 Triangular Charts 179
*7.5 Nomography 183
*7.6 Pictorial Views 188

Problems for Solution 195

Chapter 8. Limits

8.1 Limits of Sequences 202
8.2 Some Special Limits 209
8.3 Series 212
8.4 Limits of Functions 217
*8.5 The Fibonacci Sequence 224

Problems for Solution 228

Chapter 9. Differential and Integral Calculus

9.1 Growth Rates 234
9.2 Differentiation 242
9.3 The Antiderivative 251
9.4 Integrals 253
9.5 Integration 259
9.6 The Second Derivative 265
9.7 Extremes 272
9.8 Mean of a Continuous Function 281
9.9 Small Changes 286
*9.10 Techniques of Integration 289

Problems for Solution 291

Chapter 10 . Exponential and Logarithmic Functions II

10.1 Introduction 301
10.2 Integral of $1/x$ 302
10.3 Properties of $\ln x$ 304
10.4 The Inverse Function of $\ln x$ 306
10.5 The General Definition of a Power 308
10.6 Relationship between Natural and Common Logarithms . . 310
10.7 Differentiation and Integration 311
10.8 Some Limits 313
10.9 Applications 314
10.10 Approximations and Series Expansions 320
*10.11 Hyperbolic Functions 324

Problems for Solution 327

Chapter 11. Ordinary Differential Equations

11.1 Introduction 334
11.2 Geometric Interpretation 335
11.3 The Differential Equation $y' = ay$ 336
11.4 The Differential Equation $y' = ay + b$ 346
11.5 The Differential Equation $y' = ay^2 + by + c$ 352
11.6 The Differential Equation $dy/dx = k \cdot y/x$ 359
11.7 A System of Linear Differential Equations 361
11.8 A System of Nonlinear Differential Equations 369
*11.9 Classification of Differential Equations 373

Problems for Solution 375

Chapter 12. Functions of Two or More Independent Variables

12.1 Introduction 381
12.2 Partial Derivatives 384
12.3 Maxima and Minima 387
*12.4 Partial Differential Equations 392

Problems for Solution 398

Chapter 13. Probability

13.1 Introduction 401
13.2 Events 402
13.3 The Concept of Probability 405
13.4 The Axioms of Probability Theory 409
13.5 Conditional Probabilities 412
13.6 The Multiplication Rule 419
13.7 Counting 423
13.8 Binomial Distribution 431
13.9 Random Variables 439
13.10 The Poisson Distribution 446
13.11 Continuous Distributions 452

Problems for Solution 463

Chapter 14. Matrices and Vectors

14.1 Notations 475
14.2 Matrix Algebra 477
14.3 Applications 485
14.4 Vectors in Space 495
14.5 Applications 502
14.6 Determinants 511

14.7 Inverse of a Matrix 518
14.8 Linear Dependence 521
14.9 Eigenvalues and Eigenvectors 527

Problems for Solution 531

Chapter 15. Complex Numbers

15.1 Introduction 547
15.2 The Complex Plane 548
15.3 Algebraic Operations 551
15.4 Exponential Functions of Complex Variables 554
15.5 Quadratic Equations 559
15.6 Oscillations 560

Problems for Solution 569

Appendix (Tables A to K) 572

Solutions to Odd Numbered Problems 587
