Table of Contents

Preface

Chapter 1: Getting Started with wxPython

Introduction	7
The application object	8
The main frame	.9
Understanding the window hierarchy	12
Referencing controls	13
Using Bitmaps	15
Adding Icons to Windows	17
Utilizing Stock IDs	18
Accessing the clipboard	20
Supporting drag and drop	22
Two-stage widget creation	24
Understanding inheritance limitations	25

Chapter 2: Responding to Events

Introduction	29
Handling events	30
Understanding event propagation	32
Handling Key events	34
Using UpdateUI events	37
Playing with the mouse	39
Creating custom event classes	41
Managing event handlers with EventStack	43
Validating Input with validators	45
Handling Apple events	48

Table of Contents

<u>Chapter 3: Basic Building Blocks of a User Interface</u>	51
Introduction	51
Creating Stock Buttons	52
Buttons, buttons, and more buttons	53
Offering options with CheckBoxes	57
Using the TextCtrl	59
Providing choices with the Choice control	62
Adding Menus and MenuBars	63
Working with Tool Bars	66
How to use PopupMenus	69
Grouping controls with a StaticBox	71
<u>Chapter 4: Advanced Building Blocks of a User Interface</u>	73
Introduction	73
Listing data with a ListCtrl	74
Browsing files with the CustomTreeCtrl	77
Creating a VListBox	81
StyledTextCtrl using lexers	84
Working with tray icons	89
Adding tabs to a Notebook	90
Using the FlatNotebook	93
Scrolling with a ScrolledPanel	96
Simplifying the FoldPanelBar	97
<u>Chapter 5: Providing Information and Alerting Users</u>	99
introduction	99
Showing a MessageBox	100
Providing help with ToolTips	102
Using SuperToolTips	104
Displaying a BalloonTip	107
Creating a custom SplashScreen	109
Showing task progress with the Progress dialog	111
Creating an AboutBox	115
<u>Chapter 6: Retrieving Information from Users</u>	121
Introduction	121
Selecting files with a FileDialog	122
Searching text with a FindReplaceDialog	127
Getting images with ImageDialog	132
Using the Print dialogs	135

<u>Chapter 7: Window Layout and Design</u>	143
Introduction	143
Using a BoxSizer	144
Understanding proportions, flags, and borders	148
Laying out controls with the GridBagSizer	152
Standard dialog button layout	154
Using XML resources	157
Making a custom resource handler	160
Using the AuiFrameManager	163
<u>Chapter 8: Drawing to the Screen</u>	167
Introduction	167
Screen drawing	168
Drawing shapes	171
Utilizing SystemSettings	174
Using a GraphicsContext	177
Drawing with RendererNative	180
Reducing flicker in drawing routines	184
<u>Chapter 9: Design Approaches and Techniques</u>	187
Introduction	187
Creating Singletons	188
Implementing an observer pattern	190
Strategy pattern	194
Model View Controller	197
Using mixin classes	203
Using decorators	206
<u>Chapter 10: Creating Components and Extending Functionality</u>	209
Introduction	209
Customizing the ArtProvider	210
Adding controls to a StatusBar	212
Making a tool window	215
Creating a Search Bar	217
Working with ListCtrl mixins	220
StyledTextCtrl custom highlighting	222
Creating a custom control	225
<u>Chapter 11: Using Threads and Timers to Create Responsive Interfaces</u>	231
Introduction	231
Non-Blocking GUI	232
Understanding thread safety	236

Table of Contents

Threading tools	241
Using Timers	246
Capturing output	249
<u>Chapter 12: Building and Managing Applications for Distribution</u>	255
Introduction	255
Working with StandardPaths	256
Persisting the state of the UI	258
Using the SingleinstanceChecker	260
Exception handling	265
Optimizing for OS X	266
Supporting internationalization	269
Distributing an application	273
<u>Index</u>	279
