

COMPLEX ANALYSIS AND APPLICATIONS

Second Edition

Alan Jeffrey

University of Newcastle upon Tyne
United Kingdom

Chapman & Hall/CRC
Taylor & Francis Group

Boca Raton London New York

Contents

Chapter 1. Analytic Functions

1.1	Review of Complex Numbers	1
1.2	Curves, Domains, and Regions	27
1.3	Analytic Functions	34
1.4	The Cauchy–Riemann Equations: Proof and Consequences	53
1.5	Elementary Functions	63

Chapter 2 Complex Integration

2.1	Contours and Complex Integrals	89
2.2	The Cauchy Integral Theorem	107
2.3	Antiderivatives and Definite Integrals	120
2.4	The Cauchy Integral Formula	128
2.5	The Cauchy Integral Formula for Derivatives	135
2.6	Useful Results Deducible from the Cauchy Integral Formulas	145
2.7	Evaluation of Improper Definite Integrals by Contour Integration	158
2.8	Proof of the Cauchy–Goursat Theorem (Optional)	198

Chapter 3 Taylor and Laurent Series: Residue Theorem and Applications

3.1	Sequences, Series, and Convergence	203
3.2	Uniform Convergence	219
3.3	Power Series	229
3.4	Taylor Series	242
3.5	Laurent Series	255
3.6	Classification of Singularities and Zeros	280
3.7	Residues and the Residue Theorem	288
3.8	Applications of the Residue Theorem	303
3.9	The Laplace Inversion Integral	322

Chapter 4 Conformal Mapping

4.1	Geometrical Aspects of Analytic Functions: Mapping	333
4.2	Conformal Mapping	348
4.3	The Linear Fractional Transformation	360
4.4	Mappings by Elementary Functions	378
4.5	The Schwarz–Christoffel Transformation	392

**Chapter 5 Boundary Value Problems, Potential Theory, and
Conformal Mapping**

5.1 Laplace's Equation and Conformal Mapping: Boundary Value Problems	409
5.2 Standard Solutions of the Laplace Equation	421
5.3 Steady-State Temperature Distribution	446
5.4 Steady Two-Dimensional Fluid Flow	466
5.5 Two-Dimensional Electrostatics	499
Solutions to Selected Odd-Numbered Exercises	521
Bibliography and Suggested Reading List	555
Index	557
