Contents

1	Statistical Analysis	1
1.1	Two Examples of a Statistical Analysis	1
1.2	Data	10
1.3	Model Specification	11
1.4	Model Checking	13
1.5	Statistical Inference	13
1.6	Concluding Remarks	16
2	Preliminary Investigations	19
2.1	Dot Diagrams and Bar Charts	20
2.2	Histograms	21
2.3	Fractile Diagrams	23
2.4	Fractile Diagrams for Normal Distribution	29
2.5	Transformation	37
2.6	Concluding Remarks	39
	Annex to Chapter 2 - Calculations in SAS	40
3	Normal Data	53
3.1	One Sample	53
	Annex to Section 3.1 - Calculations in SAS	75
	Main Points in Section 3.1	78
3.2	Two or More Samples	80
	Annex to Subsection 3.2.1 - Calculations in SAS	91
	Annex to Subsection 3.2.2 - Calculations in SAS	109
	Main Points in Section 3.2	114
3.3	Linear Regression	117
	Annex to Section 3.3 - Calculations in SAS	144
	Main Points in Section 3.3	155
	Supplement to Chapter 3	160
3.4	Normal Distribution and Related Distributions	160
3.5	Multivariate Normal Distributions	168
	Exercises for Chapter 3	170
4	Linear Normal Models	177
4.1	The Linear Normal Model	177
	Main Points in Section 4.1	187
4.2	Comparison of Regression Lines	188
	Annex to Section 4.2 - Calculations in SAS	194
4.3	Two-Way Analysis of Variance	204
	Annex to Section 4.3 - Calculations in SAS	214
	Exercises for Chapter 4	225

5	An Introduction to the Power of Tests and Design of Experiments	241
5.1	The Power of Tests	241
5.2	Reduction of a^2 - An Example of Blocking	249
5.3	Control Plot for the Paired t -Test	252
5.4	The Paired f -Test and Two-Way Analysis of Variance	253
	Annex to Chapter 5 - Calculations in SAS	255
	Supplement to Chapter 5	259
5.5	Noncentral t -, χ^2 -, and F -Distributions	259
	Exercises for Chapter 5	261
6	Correlation	263
6.1	Introduction	263
6.2	Definitions	263
6.3	Examples	266
6.4	The Bivariate Normal Distribution	267
6.5	Model Checking	273
6.6	Inference on ρ Based on a Single Bivariate Normal Sample	277
6.7	Inference on ρ Based on Several Bivariate Normal Samples	279
6.8	Correlation and Regression	280
6.9	Interpretation of Correlation	281
6.10	Further Topics in Bivariate Normal Distribution	282
	Annex to Chapter 6 - Calculations in SAS	288
	Main Points in Section 6.10	297
	Exercises for Chapter 6	298
7	The Multinomial Distribution	301
7.1	Examples	302
7.2	Inference in One Multinomial Distribution	304
7.3	Inference in Several Multinomial Distributions	320
7.4	Fisher's Exact Test	325
7.5	Test for Goodness of Fit	329
7.6	Sequence of Models	332
	Annex to Chapter 7 - Calculations in SAS	337
	Main Points in Chapter 7	343
	Exercises for Chapter 7	347
8	The Poisson Distribution	357
8.1	Examples	357
8.2	Probabilistic Results for the Poisson Distribution	359
8.3	One Sample	362
8.4	Several Samples	365
8.5	Transformation	380
	Annex to Chapter 8 - Calculations in SAS	383
	Main Points in Chapter 8	389
	Exercises for Chapter 8	393
9	Generalized Linear Models	401
9.1	Classes of Distributions	401
9.2	The Generalized Linear Model	406
9.3	Examples	409
	Annex to Subsection 9.3.1 - Calculations in SAS	413

Annex to Subsection 9.3.2 - Calculations in SAS	420
Annex to Subsection 9.3.3 - Calculations in SAS	426
Annex to Subsection 9.3.4 - Calculations in SAS	433
Annex to Subsection 9.3.5 - Calculations in SAS	445
10 Models for Directional Data	447
10.1 Notation	447
10.2 Examples	449
10.3 The Circular Normal Distribution	453
10.4 One Sample	454
10.5 Several Samples	463
Annex to Chapter 10 - Calculations in SAS	471
Supplement to Chapter 10	474
10.6 Descriptive Measures for Directional Data	474
10.7 Further Analogies	475
Exercises for Chapter 10	476
11 The Likelihood Method	481
11.1 Likelihood Inference	481
11.2 Concepts from General Test Theory	486
11.3 Approximative Likelihood Theory	488
12 Some Nonparametric Tests	493
12.1 Sign Test	494
12.2 Rank Test	495
Annex to Chapter 12 - Calculations in SAS	513
Main Points in Chapter 12	522
A Simulated Fractile Diagrams	527
B The Newton-Raphson Procedure	535
References	539
Index	541
