

# **MAXIMUM LIKELIHOOD ESTIMATION FOR TRIP DISTRIBUTION MODELS**

**Dr.-Ing. Zachary C. Abiero-Gariy**

**SCHRIFTENREFFILE  
LEHRSTUHL FÜR VERKEHRSWESEN  
RUHR-UNIVERSITÄT BOCHUM**

**HEFT 20, 1999**

**ISSN 1437-8299**

**ISBN 3-00-004183-4**

Gedruckt mit Unterstützung des Deutschen Akademischen Austauschdienstes (DAAD)

## TABLE OF CONTENTS

<b>INTRODUCTION</b>	<b>1</b>
<b>1.1 General Introduction</b>	<b>1</b>
<b>1.2 Problem Definition</b>	<b>2</b>
<b>1.3 Thf&gt; Dhifii'tivoc nf the StnHv         i lie *_LPJC_llves m me ijiuyy</b>	<b>d</b>
<b>1.4 Research Methodology and Approach</b>	<b>5</b>
<b>2. LITERATURE REVIEW</b>	<b>7</b>
<b>? 1 Tntwfijjliiptimi</b>	<b>7</b>
<b>2.2 Trip Distribution Model Estimation</b>	<b>10</b>
<b>2.2.1 Introduction</b>	<b>10</b>
<b>2.2.2 Trip Distribution Model Estimation Methods</b>	<b>11</b>
<b>2.3 Other Methods of O-D Matrix Estimation</b>	<b>25</b>

### **THE NEW STATISTICAL ESTIMATION PROCEDURES FOR TRIP DISTRIBUTION MODELS**

31

<b>31</b>	
<b>3.2 The Trip Distribution Models and their Formulations</b>	<b>34</b>
<b>3.3 The Model Calibration and Estimation Algorithms and Procedures from the Maximum Likelihood Method.</b>	<b>34</b>
<b>3.3.1 Introduction</b>	<b>34</b>
<b>3.3.2. The Mathematical Background of the Maximum Likelihood Estimation Method</b>	<b>38</b>
<b>3.3.3 Maximum Likelihood Derivation of the Calibration and Estimation Procedures             and Algorithms</b>	<b>39</b>
<b>3.3.4 Input data requirements for the calibration and estimation procedures</b>	<b>51</b>
<b>3.3.5 Calibration and estimation computations and the computation programs</b>	<b>51</b>

## Table of Contents

3.4	Conclusions	66
4.	FORECASTING O-D TRIPS AND MATRICES WITH THE NEW MODELLING PROCEDURES	68
4.1	Introduction	68
4.2	Input Data Requirements and their Acquisition for Forecasting	69
4.2.1	The Required Input Data and Information	69
4.2.2	Future Trip Productions and Attractions from Trip Generation Analysis	69
4.2.3	Trip Generation Modelling with Linear Regression Technique	70
4.2.4	Forecasting Zonal Characteristics and Computation of Future Trip Productions and Attractions	72
4.3	<u>4.3 S</u>	
4.3	Derivation of Algorithms and Procedures for Estimation of Trip Distribution Model Factors for Forecasting Future Trips	73
4.3.1		
4.3.2	The Likelihood Function	74
4.3.3	Algorithms for Estimating Sets of Values for Vectors $A_t$ and $f_i^t$ for Forecasting	75
4.4	Forecasting Computations and Computer Programmes (Software)	82
4A.2	Computation of the New Sets of Values of the Model Vectors	83
CONVENTIONAL ESTIMATION PROCEDURES FOR TRIP DISTRIBUTION		85
5.1		
5.2	The Mficke's Method of Modelling Trip Distribution	85
5.2.1	General	85
5.2.2	Macke's Modelling Method Formulation <sup>x</sup>	86
5.2.3	Macke's Modelling Estimations and Computations	89
5.3	Kirchhoff's Trip Distribution Modelling Approach	92

5.3.2	KirchhofTs Trip Distribution Modelling with A system of Bilinear Equations	93
<b>5.4</b>		
<b>6.</b>	<b>THE EMPIRICAL MODELLING DATA AND THE EVALUATION CRITERIA FOR THE MODELLING RESULTS</b>	<b>101</b>
<b>6.1</b>		
<b>6.2</b>	<b>The Study Areas, Data Sets and future Trip Productions and Attractions</b>	<b>102</b>
6.2.1	Data Sets for the Study Areas in Germany	102
6.2.2	Modelling Data for Kenya's Nairobi City	113
6.2.3	Conclusion	117
<b>6.3</b>	<b>Statistical Measures for Evaluating Trip Distribution Models</b>	<b>118</b>
6.3.1	rrntr»Hiiittr»«	1 IX
6.3.2	Statistical Measures Applied to Evaluating Distribution Modelling Techniques	119
6.3.3	Conclusion	122
6.4	Conclusion	122
<b>7.</b>	<b>APPLICATION OF THE MODELLING TECHNIQUES TO EMPIRICAL TRAFFIC DISTRIBUTION DATA</b>	<b>123</b>
<b>7.1</b>	Tn-fit Hii pii An	17 ^A
<b>7.2</b>	<b>Application and Evaluation Approach</b>	<b>124</b>
<b>7.3</b>	<b>Application and Evaluation Results</b>	<b>125</b>
7.3.1	Results for Paderbora Study Area	127
7.3.2	Results for Warstein Study Area	129
7.3.3	Results for Haan Korschenbroich Study Areas	131
7.3.4	Results for Sinsheim Study Area	134
7.3.5	The Results for Dobeln Study Area	138
7.3.6	Results for Nairobi Study Area	140
7.3.7	The Evaluation of Results and Performance of the Modelling Techniques across the data sets for different planning areas	143

**Table of Contents**

8.	FURTHER DISCUSSIONS, RECOMMENDATIONS AND CONCLUSIONS	148
o 1	TntrnHnrtinn_____	14ft
<b>8.2 Possibilities for Improvement of the Maximum-Likelihood Technique</b>		
	<b>for O-D Trip Matrix Prediction_____</b>	<b>148</b>
8.2.1	Technique Formulation_____	148
8.2.2	Improvement of Data Handling Methods_____	149
<b>8.3 Performance of the Modelling Technique and Implications for Trip Generation and</b>		
8.3.1	Performance of the Modelling Technique and Implications for Trip Generation and	151
8.3.2	Implications for Trip Distribution_____	152
8.5	Areas for Further Research_____	152
9.	SUMMARY_____	153
	<b>BIBLIOGRAPHY_____</b>	<b>157</b>
	<b>APPENDIX A: A REVIEW OF OTHER METHODS OF O-D MATRIX ESTIMATION</b>	169
	<b>APPENDIX B: FORTRAN COMPUTER PROGRAMS_____</b>	<b>195</b>
	ZUSSAMENFASSUNG (AUF DEUTSCH)_____	241
