List of Boxes

1. The 2001 recession	30
2. The recent evolution of profits	41
3. The current account and the dollar	44
4. Potential output and the NAIRU	46
5. Managed care	95
6. The patients' rights debate	96
7. Prescription drug coverage for Medicare beneficiaries	121
8. Recommendations concerning the health care system	126
9. Policy integration across sustainable development areas	172

List of Tables

1. Contributions to GDP growth	29
2. Characteristics of recent recessions	30
3. Contributions to real GDP growth during recessions	32
4. Manufacturing output and utilisation	34
5. Personal income	36
6. Household net worth	37
7. Real non-residential fixed investment	39
8. Current account	43
9. Decomposition of potential output growth	48
10. Labour market and compensation outcomes	50
11. Near-term outlook	54
12. Capital flows into and out of the United States and the US net debtor position	65
13. Growth in monetary aggregates	67
14. Credit market debt outstanding by sector	68
15. Federal revenue and expenditure	71
16. Effects of major legislation on revenue and expenditure	72
17. General government net lending	82
18. Health insurance coverage status and type by selected characteristics, 2000	87
19. Personal health-care spending by source of funds	88
20. Health expenditure by type of service	97
21. International comparison of health expenditure-related indicators	105
22. National health expenditure projections, 2001-11	107
23. Characteristics of the uninsured, 2000	109
24. Tobacco consumption and nutrition among OECD countries	113
25. Summary of structural recommendations	129
26. The largest corporate bankruptcies, 1980 to present	132
27. Sources of funds for educational institutions	140
28. Household income by level of educational attainment	143
29. Important aspects of state TANF programmes	148
30. Major research on caseload changes using data <i>prior to</i> 1996 welfare reform	150
31. Major research on caseload changes including data <i>after</i> 1996 welfare reform	151
32. Rates of crime victimisation in 1993 and 2000	158
33. Indicators of greenhouse gas (GHG) emission intensity	174
34. GHG emissions and sectoral indicators	175
35. State programmes for reducing carbon dioxide emissions from electricity generation	179
36. Performance indicators: water pollution	183
37. The impact of the Clean Water Act on river quality	184

Table of contents

38. Water level changes in the High Plains aquifer	186
39. International water supply use comparison	187

Annexes

A1. Fixed effects model of population health	227
A2. Population health accounting	228

Ust of Figures

1. Aggregate economic indicators	28
2. Increase in unemployment during recessions	31
3. The shift towards permanent job losses	32
4. Inventory-sales ratios across sectors	33
5. Household spending remained strong	35
6. Corporate profits and costs	40
7. S&P 500 operating earnings and profits from the national accounts	41
8. The current account deficit and the real exchange rate	44
