Contents

1	Types and Properties of Polymers	1
1.1	Production of Synthetic Resins	2
1.2	Polycondensation Reactions	2
1.3	Polymerisation Reactions	4
2	Determination of Elements	7
2.1	Non-metallic Elements	7
2.1.1	Halogens	8
2.1.1.1	Combustion Methods	8
2.1.1.2	Oxygen Flask Combustion	8
2.1.1.3	Alkali Fusion Methods	9
2.1.1.4	Physical Methods for Determining Halogen	10
2.1.2	Sulfur	10
2.1.2.1	Combustion Methods	10
2.1.2.2	Sodium Peroxide Fusion	10
2.1.2.3	Oxygen Flask Combustion	11
2.1.3	Phosphorus	11
2.1.3.1	Acid Digestion	11
2.1.4	Nitrogen	11
*"	2.1.4.1 Combustion Methods	11
	2.1.4.2 Physical Method for Determination of Total Nitrogen	13
2.1.5	Silicon	13
2.1.6	Boron	13
2.1.7	Total Organic Carbon	13
2.1.8	Total Sulfur/Total Halogen	14
2.1.9	Nitrogen, Carbon, and Sulfur	14
2.1.10	Carbon, Hydrogen, and Nitrogen	15

2.1.11	Oxygen Flask Combustion: Ion Chromatography	15
2.1.12	XRFS	15
2.1.13	Thermogravimetric Analysis	18
2.2	Metals	18
2.2.1	Destructive Techniques	18
2.2.1.1	Atomic Absorption Spectrometry (AAS)	18
2.2.1.2	GFAAS	19
2.2.1.3	Atom Trapping Technique	21
2.2.1.4	Vapour Generation Atomic Absorption Spectrometry (VGAAS)	21
2.2.1.5	Zeeman AAS	22
2.2.1.6	ICP-AES	24
2.2.1.6.1	Hybrid Inductively Coupled Plasma Systems	28
2.2.1.6.2	Chromatography-ICP	28
2.2.1.6.3	Flow Injection with ICP	28
2.2.1.6.4	Inductively Coupled Plasma with Atomic Fluorescence Spectrometry (ICP-AFS)	28
2.2.1.7	Inductively Coupled Plasma Optical Emission Spectrometry-Mass Spectrometry (ICP-MS)....	29
2.2.1.8	Pre-concentration AAS Techniques	30
2.2.1.9	Applications of Techniques Detailed So Far	30
2.2.1.9.1	Elemental Analysis of Polymers....	31
2.2.1.9.2	Trace Metals in Polymers	31
2.2.1.10	Pressure Dissolution Technique	34
^ 2.2.1.11	Visible and UV Spectroscopy	36
2.2.1.12	Polarography and Voltammetry	36
2.2.1.13	Ion Chromatography	37
2.2.2	Non-destructive Methods	40
2.2.2.1	XRFS	40
2.2.2.2	NAA	43
3	Functional Groups	51
3.1	Hydroxy Groups	51
3.1.1	Chemical Methods	51

3.1.1.1	Acetylation and Phthalation Procedures	52
3.1.2	Spectrophotometric methods	59
3.1.3	Direct Injection Enthalpimetry	60
3.1.4	IR Spectroscopy	61
3.1.4.1	Determination of Hydroxy Groups in Dinitropropyl Acrylate Prepolymer	61
3.1.5	NMR	62
3.2	Carboxyl Groups	64
3.2.1	NMR	64
3.2.2	Titration Procedures	64
3.2.3	IR Spectroscopy	67
3.3	Ester Groups	68
3.3.1	Saponification	I. 69
3.3.2	Hydriodic Acid Reduction-Gas Chromatography	70
3.3.3	IR Spectroscopy	71
3.3.3.1	Determination of Free and Combined Vinyl Acetate Groups in Vinyl Chloride-Vinyl Acetate Copolymers	71
3.3.3.2	Determination of Bound Vinyl Acetate in Ethylene-Vinyl Acetate Copolymers	71
3.3.4	NMR	72
3.3.5	Pyrolysis-Gas Chromatography	73
3.4	Carbonyl Groups	74
3.4.1	IR Spectroscopy	74
3.4.2	Derivatisation Methods	75
3.4.2.1	Spectrophotometric methods	76
3.5	'Ether Groups	76
3.5.1	Cleavage Gas Chromatography	76
3.6	Alkoxy Groups	77
3.6.1	IR Spectroscopy	77
3.6.2	NMR Spectroscopy	79
3.6.3	Pyrolysis-Based Method	80
3.6.3.1	Alkoxy Groups in Ethylene Oxide-Propylene Oxide Condensates	80
3.6.3.2	Miscellaneous Methods	81

3.7	Oxyalkylene Groups	81
3.7.1	Cleavage-Gas Chromatography	81
3.7.2	Pyrolysis-Gas Chromatography	83
3.7.3	IR Spectroscopy	84
3.7.4	NMR Spectroscopy	84
3.8	Anhydride Groups	84
3.9	Total Unsaturation	85
3.9.1	Hydrogenation Methods	85
3.9.2	Halogenation Methods	85
3.9.3	Iodine Monochloride Procedure	88
3.9.4	IR Spectroscopy	92
3.9.5	NMR Spectroscopy	93
3.9.6	Pyrolysis-Gas Chromatography	97
3.9.7	Derivitivisation-Gas Chromatography	97
3.9.8	Radiochemical Methods	100
	3.9.8.1 Determination of unsaturation in butyl rubber	100
3.10	Alkyl and Aryl Groups	100
	3.10.1 Alkali Fusion Reaction-Gas Chromatography	100
3.11	Oxirane Rings	101
3.12	Amino Groups	101
3.13	Amino and Imido Groups	102
	3.13.1 Alkali Fusion-Gas Chromatography	102
3.14	Nitrile Groups	105
3.15	Silicon Functions	106
4	Determination of Monomer Ratios in Copolymers	117
4.1	IR Spectroscopy	117
4.1.1	Ethylene Propylene Copolymers	117
4.1.2	Ethylene-Vinyl Acetate	122
4.1.3	Styrene-based Copolymers	123
	4.1.3.1 Styrene Acrylic Acid	123
	4.1.3.2 Styrene-acrylate and styrene methylacrylate copolymers	123
4.1.4	Vinyl Chloride-Vinyl Acetate Copolymers	123

4.2	NMR Spectroscopy	124
4.2.1	Ethylene Propylene Copolymers	124
4.2.2	Ethylene-hexane-1	129
4.2.3	Styrene-Based Copolymers	129
4.2.3.1	Styrene Methacrylate	129
4.2.3.2	Styrene methyl acrylate	130
4.2.3.3	Styrene-acrylic acid	131
4.2.4	Benenyl Acrylate-Vinyl Acetate [27]	132
4.2.5	Vinyl Acetate-Methylacrylate	132
4.2.6	Hexafluoropropylene-Vinylidene Fluoride Copolymer...	132
4.2.6.1	¹⁹ F-NMR	132
4.2.6.2	Pyrolysis-Gas Chromatography	133
4.2.7	Acrylamide-Methacryloyl Oxy-ammonium Chloride	133
4.3	Pyrolysis-Gas Chromatography	135
4.3.1	Ethylene-Based Copolymers	135
4.3.1.1	Ethylene-butene-1	135
4.3.1.2	Ethylene - butadiene	138
4.3.3	Vinylidene Chloride – Vinyl Chloride Copolymers	138
4.3.4	Acrylonitrile-cis (or trans) Penta 1,3 diene	141
4.4	Pyrolysis IR Spectroscopy	141
4.4.1	Olefin Copolymers	141
5	Sequencing of Monomer Unit in Polymers	147
5.1	Sequencing in Homopolymers	147
5.1.1	NMR Spectroscopy	147
5.1.2	Pyrolysis Gas Chromatography (Py-GC)	151
*"	5.1.2.1 Polyolefins	152
	5.1.2.2 Polyisoprene	153
	5.1.2.3 Polyvinyl Chloride (PVC)	154
5.1.3	SIMS	159
	5.1.3.1 Polystyrene	159
5.1.4	Ozonisation Technique	161
	5.1.4.1 Polybutadiene	162
	5.1.4.2 Polyisoprene	168
5.2	Sequencing in Copolymers	171

5.2.1	IR Spectroscopy	171
5.2.2.1	Styrene-methacrylonitrile	171
5.2.2	NMR Spectroscopy	174
5.2.2.1	Styrene acrylate and styrene acrylic acid	174
5.2.2.2	Propylene-1-butene	175
5.2.2.3	Vinylidene chloride-methacrylonitrile and vinylidene-cyanovinyl acetate copolymers	177
5.2.2.4	Acrylonitrile-butyl acrylate copolymer	177
5.2.3	Py-GC	180
5.2.3.1	Ethylene-propylene diene	181
5.2.3.2	Hydrogenated acrylonitrile-butadiene copolymers (NBR)	185
5.2.3.3	Butadiene-acrylonitrile-methacrylic acid-terpolymer	187
5.2.3.4	Styrene-n-butyl acrylate	190
5.2.3.5	Ethylene oxide condensates	196
5.2.4	SIMS	198
5.2.4.1	Polydimethyl siloxane-urethane	198
5.2.5	Ozonolysis Techniques	203
5.2.5.1	Butadiene-propylene	203
5.2.5.2	Styrene butadiene copolymers	203
6	Stereoisomerism and Tacticity	211
6.1	Tacticity of Polypropylene	212
6.2	Tacticity of Syndiotactic Polystyrene (sPS)	226
6.3	Tacticity of Polyvinyl Chloride (PVC)	230
6.4	Tacticity of Poly(n-butyl methacrylate)	233
6:5	Identification of Diastereoisomeric Tetramers in the Pyrograms of polymethyl methacrylate	237
6.6	Tacticity of Poly(1-chloro-fluoroethylene)	242
7	Regioisomerism	253
7.1	Polypropylene	253
7.2	Propylene-1-Ethylene Copolymer	257
7.3	Polybutadiene-1-ethylene	259

7.4	Poly-2,3-dimethyl Butadiene	260
7.5	Polybutadiene	260
7.6	Polyisoprene	262
7.7	Polypropylene Glycol	266
7.7	Polyepichlorohydrin	269
7.8	Other Polymers	272
8	Determination of End Groups	275
8.1	Polypropylene Oxide	276
8.2	Polyvinyl chloride (PVC)	277
8.3	Polystyrene (PS)	278
8.3.1	NMR Spectroscopy	278
8.3.2	Pyrolysis – Gas Chromatography (Py-GC)	280
8.3.3	Dye Partition Methods	281
8.4	Polyethylene (PE)	282
8.5	Polyethylene Terephthalate	283
8.6	Polyisobutylene (PIB)	284
8.6.1	Tert-chlorine Terminated PIB	285
8.6.2	Olefin-terminated PIB	286
8.6.2.1	Anisotropic Effect	286
8.6.3	Hydroxy-terminated PIB	286
8.7	Polymethylmethacrylate	287
8.7.1	Py-GC	287
8.7.2	MALDI-ToF-MS	299
8.7.3	Dye Partition Methods	299
8.8	Terminal Epoxides	300
8.8.1	IR spectroscopy	300
8.9	Poly(2,6-dimethyl 1,4, phenylene oxide)	301
8.9.1	NMR spectroscopy	301
8.10	Miscellaneous End Groups	304
9	Types of Unsaturation	313
9.1	Unsaturation in Homopolymers	313
9.1.1	Polybutadiene Unsaturation	313

9.1.1.1	Infrared spectrometry	313
9.1.1.2	Nuclear Magnetic Resonance (NMR) Spectroscopy	317
9.1.2	Polyisoprene Unsaturation	321
9.1.2.1	IR Spectroscopy	321
9.1.2.2	Nuclear Magnetic Resonance (NMR) spectroscopy	325
9.1.3	Polyethylene Unsaturation	325
9.1.4	Polypropylene Unsaturation	329
9.2	Unsaturation in Copolymers	332
9.2.1	Styrene-divinyl benzene IR Spectroscopy	332
9.2.2	Poly(trimethylolpropane trimethacrylate) (TRIM)	335
9.2.3	Miscellaneous Copolymers	336
9.3	Ozonolysis Techniques	336
10	Polymer Branching	353
10.1	IR Spectroscopy	354
10.1.1	Methyl Branching in Polyethylene	354
10.2	NMR Spectroscopy	355
10.2.1	Ethyl and Higher Alkyl Groups Branching in Polyethylene	357
10.2.2	Branching in Ethylene-propylene Copolymers	358
10.2.3	Branching Ethylene-Higher Olefin Copolymers	361
10.2.4	Polystyrene	369
10.2.5	Polyvinyl Chloride	369
10.2.6	Polyvinyl Fluoride	369
10.3	Vacuum Radiolysis	371
10.3.1	Ethylene Copolymer	371
10.4	Pyrolysis-based Techniques	375
10.4.1	Elucidation of Short Chain Branching in Polyethylene....	375
10.4.2	Short Chain Branching in Ethylene-Higher Olefin Copolymers	383
10.4.2	Branching in Ethylene-propylene Copolymers	386
10.4.2.1	Microstructure of Ethylene-Propylene Copolymers	386

10.4.3	Branching in PVC	386
10.5	Size-Exclusion Chromatography (SEC)	387
10.5.1	Polyethylene	387
10.5.2	Other Polymers	388
11	Block Copolymers	395
