About the Authors	xxvii

PART I Overview of IMS

CHAPTER 1	IMS: Then and Now	3
	History of IMS: Beginnings at NASA	3
	Is IMS Still Strategic for Customers and IBM?	4

CHAPTER 2	Overview of the IMS Product	9
	IMS Database Manager	10
	IMS Transaction Manager	12
	IMS System Services	13
	IMS Documentation	13
	Hardware and Software Requirements for IMS	13
CHAPTER 3	Accessing IMS	17
	Accessing IMS from Application Programs	17
	Accessing IMS from Other Products	22
CHAPTER 4	IMS and z/OS	27
	How IMS Relates to z/OS	27
	Structure of IMS Subsystems	28
	Running an IMS System	43
	Running Multiple IMS Systems	44
	How IMS Uses z/OS Services	45
CHAPTER 5	Setting Up and Running IMS	49
	Installing IMS	49
	Defining an IMS System	51
	IMS Startup	51
	IMS Logging	54
	IMS Utility Programs	54
	IMS Recovery	55
	IMS Shutdown	56
PART II	IMS Database Manager	59

CHAPTER 6	Overview of the IMS Database Manager	61
	Functions of the IMS Database Manager	61
	Implementation of IMS Databases	62
	Storing Data in IMS and DB2 UDB for z/OS	64
	Storing XML Data in IMS	65

CHAPTER 7	Overview of the IMS Hierarchical Database Model	67
	IMS Hierarchical Database Basics	68
	Basic Segment Types	72
	Sequence Fields and Access Paths	73
CHAPTER 8	Implementing the IMS Hierarchical Database Model	83
	Segments, Records, and Pointers	84
	IMS Hierarchical Access Methods	87
	Operating System Access Methods	109
	IMS Checkpoints	111
	Locking Data	114
CHAPTER 9	Data Sharing	119
	How Applications Share Data	120
	DBRC and Data Sharing	121
CHAPTER 10	The Database Reorganization Process	123
	Purpose of Database Reorganization	124
	When to Reorganize Databases	124
	Overview of the Database Reorganization Process	128
CHAPTER 11	The Database Recovery Process	151
	Determining When Recovery Is Needed	151
	Overview of the Database Recovery Process	152
	IMS Backup and Recovery Utilities	153

CHAPTER 15	Application Programming for the IMS Database Manager	241
Introduction to Database Processing		241
Processing a Single Database Record		246
COBOL and PL/I Programming Considerations		261
Processing Databases with Logical Relationships		265
Processing Databases with Secondary Indexes		267
Loading Databases		269
Using Batch Checkpoint/Restart		275
CHAPTER 16	Application Programming for the IMS Transaction Manager	281
Application Program Processing		281
Transaction Manager Application Design		289
CHAPTER 17	Editing and Formatting Messages	297
Message Format Service		298
Basic Edit Function		308
CHAPTER 18	Application Programming in Java	311
Describing an IMS Database to the IMS Java Function		312
Supported SQL Keywords		313
Developing JMP Applications		314
Developing JBP Applications		315
Enterprise COBOL Interoperability with JMP and JBP Applications		316
Accessing DB2 UDB for z/OS Databases from JMP or JBP Applications		317
Developing Java Applications That Run Outside of IMS		317
XML Storage in IMS Databases		321

PART V	IMS System Administration	327
CHAPTER 19	The IMS System Definition Process	329
	Overview of the IMS System Definition Process	330
	IMS System Definition Macros	335
	The Extended Terminal Option (ETO)	338
CHAPTER 20	Customizing IMS	347
	What You Can Customize	348
	Naming the Routines	349
	Changeable Interfaces and Control Blocks	349
	IMS Standard User Exit Parameter List	349
	Binding the Routines	349
	Saving Registers	350
	IMS Callable Services	350
	Considering Performance	351
	Summary of IMS Exit Routines	352
CHAPTER 21	IMS Security	361
	History of IMS Security	361
	Security Overview	361
	Securing Resources	363
CHAPTER 22	IMS Logging	367
	IMS System Checkpoints	367
	Database Recovery Control Facility (DBRC)	368
	IMS Log Components	368
CHAPTER 23	Database Recovery Control (DBRC) Facility	375
	Overview of DBRC	376
	DBRC Tasks	376
	DBRC Components	377
	When Should You Use DBRC?	378

Communicating with DBRC	379
DBRC Functions	381
Overview of the RECON Data Sets	395
Defining and Creating the RECON Data Sets	398
Initializing the RECON Data Sets	399
Allocating the RECON Data Sets to an IMS System	400
Maintaining the RECON Data Sets	401
Reorganizing RECON Data Sets	403
Recreating the RECON Data Sets	404
Summary of Recommendations for RECON Data Sets	404
CHAPTER 24 Operating IMS	405
Monitoring the System	405
Processing IMS System Log Information	406
Choosing Tools for Detailed Monitoring	413
Executing Recovery-Related Functions	419
Modifying and Controlling System Resources	421
Controlling Data Sharing	428
Controlling Log Data Set Characteristics	431
Connecting and Disconnecting Subsystems	436
CHAPTER 25 IMS System Recovery	439
Overview of Extended Recovery Facility (XRF)	440
Overview of Remote Site Recovery (RSR)	440
Comparison of XRF and RSR	441
Summary of When to Use XRF or RSR	442
CHAPTER 26 IBM IMS Tools	443
Database Administration Tools	443
Application Management Tools	447
Performance Management Tools	450
Recovery Management Tools	452
Information Integration Management Tools	455
Utilities Management Tools	456
TM Management Tools	461
Miscellaneous IMS Tools	463

PART VI	IMS in a Parallel Sysplex Environment	465
<hr/>		
CHAPTER 27	Introduction to Parallel Sysplex	467
	Goals of a Sysplex Environment	468
	IMS and the Sysplex Environment	469
	Other Advantages of Running IMS™ in a Sysplex Environment	485
CHAPTER 28	IMSplexes	495
	Components of an IMSplex	496
	Requirements for an IMSplex	498
	Operating an IMSplex	499
PART VII	Appendixes	501
<hr/>		
APPENDIX A	Glossary	503
APPENDIX B	Acronyms and Abbreviations Used in This Book	511
APPENDIX C	Notices	517
APPENDIX D	Bibliography	521
	 Index	 525
