INGENIEUR-UND
TECHNIKER-VEREINE

CONTENTS

1. Introduction.....	1
2. Vector Control of Induction Motors.....	4
2.1 Overview.....	4
2.2 The Space Vector Theory.....	4
2.2.1 Introduction.....	4
2.2.2 Coordinate transformation.....	7
2.3 Complex Modeling of Induction Motors.....	9
2.3.1 The complex vector equations.....	9
2.3.2 The complex signal graph.....	11
2.4 Voltage Source Inverter and Space Vector Modulation.....	13
2.4.1 Voltage source inverter.....	13
2.4.2 Space vector modulation.....	16
2.5 Vector Control and Flux Estimation.....	18
2.5.1 The current model.....	18
2.5.2 The voltage model.....	19
2.6 Summary.....	22
3. Speed Sensorless Vector Control.....	23
3.1 Review of Speed Sensorless Vector Control.....	23
3.1.1 Flux estimation methods.....	24

3.1.2	Speed estimation methods.....	28
3.2	Issues of Sensorless Vector Control at Low Speed.....	32
3.2.1	Inverter nonlinearity.....	33
3.2.2	Flux estimation drift.....	35
3.2.3	System dc offset.....	37
3.2.4	Parameter sensitivity.....	41
3.2.5	Limitations of sensorless vector control.....	43
3.3	Summary.....	45
4.	Nonlinearity of Voltage Source Inverter.....	46
4.1	Introduction.....	46
4.2	Analysis and Modeling of the Inverter Nonlinearity.....	47
4.2.1	Dead-time effect.....	47
4.2.2	On-state voltage drop.....	50
4.3	Dead-time Compensation and Stator Voltage Synthesis.....	54
4.3.1	Dead-time compensation.....	54
4.3.2	Stator voltage synthesis.....	57
4.3.3	Accuracy of the estimated stator voltage.....	62
4.4	Summary.....	63
5.	Performance Improvement at Low and Zero Speed.....	64
5.1	Overview.....	64
5.2	Robust Stator Flux Estimation.....	64

5.2.1	Analysis of the flux estimation error.....	64
5.2.2	Novel stator flux integrator.....	73
5.2.3	Compensation of large dc offset.....	79
5.2.4	Experimental results.....	82
5.3	Stator Resistance On-line Identification and Adaptation.....	85
5.3.1	Introduction.....	85
5.3.2	Principle of the stator resistance identification.....	86
5.3.3	MRAS adaptation of the stator resistance.....	89
5.3.4	Experimental results.....	93
5.4	Summary.....	97
6.	Experimental Results and Analysis.....	98
6.1	Experimental Setup.....	98
6.2	Software Implementation.....	99
6.3	Experimental Results and Analysis.....	100
6.4	Summary.....	109
7.	Conclusion.....	110
Appendix.....		113
A1	Motor Data.....	113
A2	Normalization.....	113
Nomenclature and Abbreviations.....		115
References.....		119
