

# Water Quality Management in Asia (Asian Waterqual '99)

Selected Proceedings of Asian Waterqual '99 - the 7th IAWQ  
Asia-Pacific Regional Conference, held in Taipei, ChineseTaiwan,  
18-20 October 1999

**Issue Editors: CF Ouyang\*, SL Lo<sup>†</sup>, SS Cheng\* and DH Tseng<sup>§</sup>**

<sup>†</sup>Department of Civil Engineering, National Central University, Chungli, ChineseTaiwan

<sup>†</sup>Graduate Institute of Environmental Engineering, National Taiwan University, Taipei, ChineseTaiwan

•Department of Environmental Engineering, National Cheng Kung University, Tainan, Chinese Taiwan

# Contents

## Preface

- 1    **The rapid quantification and detection of nitrifying bacteria by using monoclonal antibody method**    H. Ikuta, N. Noda, Y. Ebie, A. Hirata, S. Tsuneda, M. Matsumura and Y. Inamori
- 9    **A simple settling model for batch activated sludge process**    A.A. Kazmi and H. Furumai
- 17    **Application of molecular methods to microbial community analysis of activated sludge**    M. Onuki, H. Satoh, T. Mino and T. Matsuo
- 23    **BNP test to evaluate the influence of C/N ratio on N<sub>2</sub>O production in biological denitrification**    Y.-C. Chiu and M.-S. Chung
- 29    **Calibration of kinetic parameters in the IAWQ Activated Sludge Model: a pilot scale experience**    H. Satoh, E. Okuda, T. Mino, and T. Matsuo
- 35    **Effect of variations in flow rate and concentrations of Influent on the nitrogen removal performance of the aerobic-anoxic-aerobic process**    N. Funamizu, T. Miyake and T. Takakuwa
- 43    **Hydrogen as a quick indicator of organic shock loading in UASB**    Y.-H. Huang, G.-H. Huang, S. Chou, and S.-S. Cheng
- 51    **Nitrogen removal in a submerged filter with no effluent recirculation**    P.C. Chui, Y. Terashima, J.H. Tay, H. Ozaki, and S. Jeyaseelan
- 59    **Kinetics and physiological characteristics of autotrophic denitrification by denitrifying sulfur bacteria**    S.-E. Oh, K.-S. Kim, H.-C. Choi, J. Cho, I.S. Kim
- 69    **Impact of COD/N/S ratio on denitrification by the mixed cultures of sulfate reducing bacteria and sulfur denitrifying bacteria**    I.S. Kim and J.-H. Son
- 77    **Quantification of methanogen cell density in anaerobic granular sludge consortia by fluorescence in-situ hybridization**    T. Tagawa, K. Syutsubo, Y. Sekiguchil, A. Ohashi and H. Harada
- 83    **Combination of a UASB reactor and a curtain type DHS (downflow hanging sponge) reactor as a cost-effective sewage treatment system for developing countries**    I. Machdar, Y. Sekiguchi, H. Sumino, A. Ohashi, and H. Harada
- 89    **Improvement of nitrogen and phosphorus removal in the anaerobic-oxic-anoxic-oxic (AOAO) process by stepwise feeding**    H.Y. Chang and C.F.Ouyang
- 95    **Novel feast-fast technique for filamentous foam control in the activated sludge process - introducing a new foam-measurement method**    H. Chua, W. Lo., P.H.F. Yu, S.N. Sin, Y.G. Zhao and K.N. Tan
- 103    **Aqueous microorganisms inactivation by photocatalytic reaction**    M. Otaki, T. Hirata and S. Ohgaki
- 109    **Identification and characterization of anaerobic mercury-resistant bacteria isolated from mercury-polluted sediment**    M. Narita, C. C. Huang, T. Koizumi, T. Yamagata and G. Endo
- 115    **Formulating bioassay data of chemicals and environmental water**    R. Shoji, A. Sakoda, Y. Sakai and M. Suzuki
- 125    **Fate and toxic effects of cyanide on aerobic treatment systems**    M.R. Haghighi-Podeh and G. Siyahati-Ardakani
- 131    **Study on wet air oxidation of aqueous ferrous cyanide solution catalyzed by three metal salts**    B.-N. Lee and J.-C. Lou

- 137 **The kinetic characteristics of the biomass fixed inside the porous medium in the totally mixed reactor** H. Deguchi, N. Mori, Y. Matsui, M. Kashiwaya
- 143 **Characterization of the microbial diversity in a biotreatment process using non-culture based methods** S. J. You, C. F. Ouyang, S. F. Lin and W. T. Liu
- 149 **Competitive adsorption of copper and lead ions on an iron-coated sand from water** C.H. Lai, C.Y. Chen, P.H. Shih and T.H. Hsia
- 155 **Degradation of 4-nitrophenol using the Fenton process** Y.-S. Ma, S.-T. Huang, and J.-G. Lin
- 161 **Effect of surface functional group on Freundlich adsorption isotherm** H.T. Chang, E.G. Furuya, Y. Miura, and K.E. Noll
- 167 **Electrochemically reductive dechlorination of chlorophenol using nickel and zinc electrodes** C.H. Lin and S.K. Tseng
- 173 **Modeling of arsenic rejection considering affinity and steric hindrance effect in nanofiltration membranes** J.I. Oh, T. Urabe, H. Kitawaki, M.M. Rahman, M.H. Rahman and K. Yamamoto
- 181 **Nitrate removal by an ultra-compact biofilm reactor** S.L. Ong, W.J. Ng, L.Y. Lee, J. Yu and J.Y. Hu
- 187 **Optimizing enhanced coagulation for DOC removal with ultrafiltration membrane separation using response surface methods and particle trajectory analysis** K. Park, Y.T. Seo, G.D. Whang, and W. Lee
- 193 **Ozone treatment of distillery slop waste** C.G. Alfafara, V.P. Migo, J.A. Amarante, R.F. Dallo and M. Matsumura
- 199 **A pilot study on nitrogen and phosphorus removal by a modified Phostrip process** K.-S. Kim, K.-M. Cho, H. Choi, I.S. Kim
- 205 **PVA-coated activated carbon for aerobic biological treatment of concentrated refractory organic wastewater** B.-R. Lim, H.-Y. Hu, N. Goto and K. Fujie
- 211 **Predator grazing effect on bacterial size distribution and floc size variation in membrane-separation activated sludge** B.S. Luxmy, F. Nakajima and K. Yamamoto
- 219 **Characteristics of p-chlorophenol degradation by Photo Fenton oxidation** J. Yoon, S. Kim, D.S. Lee, J. Huh
- 225 **Destruction of refractory humic acid by electromechanical oxidation process** L.-C. Chiang, J.-E. Chang and T.-C. Wen
- 233 **Alkalinity requirements and the possibility of simultaneous heterotrophic denitrification during sulfur-utilizing autotrophic denitrification** E.-W. Kim and J.-H. Bae
- 239 **Process development for nitrogen removal of swine waste** J.M. Rim, D.J. Han
- 247 **Effect of dissolved organic carbon on leaching of copper and zinc from swine manure compost** J.-H. Hsu and S.-L. Lo
- 253 **Settling and coagulating behaviour of fractal aggregates** X.-Y. Li and B.E. Logan
- 265 **The genotoxicity of by-products by chlorination and ozonation of the river water in the presence of bromide ions** T. Nobukawa and S. Sanukida
- 259 **Non-steady variations of SOD and phosphate release rate due to changes in the quality of the overlying water** T. Inoue, Y. Nakamura and Y. Adachi
- 273 **Activation mechanism and effectiveness in reusing sludge from water purification** K. Ebbe, J.-H. Lee and T.-H. Yoon
- 283 **Effects of sludge settling characteristics in the BNR system performance** Z. Yun, W. Jo, Y. Yi, S. Choi, E. Choi and K. Min
- 289 **Nitrification in a membrane bioreactor (MBR) for wastewater treatment** X. J. Fan, V. Urbain, Y. Qian, J. Manem, W. J. Ng and S. L. Ong
- 295 **Phosphate removal from wastewater using spent alum sludge** S.-H. Huang and B. Chiswell
- 301 **Research on low temperature thermo-chemical conversion to oil process for sewage sludge** P. He, G. Gu, L. Shao and Y. Zhang

- 309 **Wastewater control in welding electrode manufacturing - a case study** O. Tunay, I. Kabdasli and D. Orhon
- 315 **Study of heterotrophic nitrifying bacteria from wastewater treatment systems treating acrylonitrile, butadiene and styrene resin wastewater** T.-L. Hu and K.T. Kung
- 323 **The performance of fermentation wastewater treatment in ultrafiltration membrane bioreactor by continuous and intermittent aeration processes** S.G. Lu, T. Imai, M. Ukita, M. Sekine, M. Fukagawa and H. Nakanishi
- 331 **Biological treatment of highly foaming pharmaceutical wastewater by modified bubble-column under mechanical foam control** K. Yamagiwa, M. Yoshida, A. Ohkawa and S. Takesono
- 339 **Biological sulphate removal from acid mine effluent using ethanol as carbon and energy source** H.A. Greben, J. P. Maree, Y. Singmin and S. Mngqeneni
- 345 **Characteristics of hydrogen production from bean curd manufacturing waste by anaerobic microflora** O. Mizuno, T. Ohara, M. Shinya and T. Noike
- 351 **Recovery of biodegradable plastics from activated sludge process** H. Takabatake, H. Satoh, T. Mino and T. Matsuo
- 357 **Tailoring of highly efficient nitrifying biofilms in fluidized bed for ammonia-rich industrial wastewater treatment** S. Tsuneda, T. Miyoshi, Y. Aoi and A. Hirata
- 363 **Complete treatment of swine waste by developing thermophilic oxalic process** C.-W. Lee, N. Chiba, O. Nishimura, K. Yamada and R. Sudo
- 369 **Nitrogen removal from hydroponic culture wastewater by autotrophic denitrification using thiosulfate** R. Yamamoto-Ikemoto, T. Komori, M. Nomura, Y. Ide and T. Matsukami
- 377 **Effect of chemical structures of reactive dyes on color removal by an anaerobic-aerobic process** W. Luangdilok and T. Panswad
- 383 **Occurrence and phase distribution of polycyclic aromatic hydrocarbons in urban storm-water runoff** J. A. Smith, M. Sievers, S. Huang, and S. L. Yu
- 389 **A study of water-land environment carrying capacity for a river basin** C.H. Chen, R.S. Wu, S.L. Liaw, W.R. Sue and I.J. Chiou
- 397 **Optimal location of artificial aeration in a tidal river for water quality improvement** S. Li, G.H. Chen and B.C. Yen
- 403 **Application of artificial neural network to control the coagulant dosing in water treatment plant** R.-F. Yu, S.-F. Kang, S.-L. Liaw and M.-C. Chen
- 409 **Modeling and simulation with microspheres on vertical concentration profiles in sediments of aquatic zones** S. Sakita and T. Kusuda
- 417 **Oxygen transfer in gravity flow sewers** T.Y. Pai, C.F. Ouyang, Y.C. Liao and H.G. Leu
- 423 **Quantification of foaming behaviour using foam index** W.J. Ng, S.L. Ong, N. Sarada, J.Y. Hu, X.J. Fan and W.S. Ang
- 429 **Enhanced bioremediation of trichloroethene contaminated groundwater by a biobarrier system** C.M. Kao and L. Yang
- 435 **Identifying useful real-time control parameters in ozonation process** C.-P. Yu and Y.-H. Yu
- 441 **pH effect on the surface and bulk characteristics of metallic cations/SiO<sub>2</sub> suspensions** W.H. Kuan, S.L. Lo and M.K. Wang
