

**OECD  
Economic Surveys**

**United States**

**2008**

## *Table of contents*

<b>Executive summary</b> .....	<b>8</b>
<b>Assessment and recommendations</b> .....	<b>11</b>
<b>Chapter 1. Key policy challenges</b> .....	<b>23</b>
The economic context is difficult .....	24
Public finances are not on a sustainable path .....	36
Underlying prospects for economic growth remain favourable .....	38
But there is much income inequality and it is rising .....	40
Substantial reductions in CO <sub>2</sub> emissions will be required if international efforts to combat global warming are to succeed .....	46
Macroeconomic policy challenges .....	50
Policy challenges in overcoming the financial crisis (Chapter 2) .....	50
Policy challenges in health care reform (Chapter 3) .....	51
Notes .....	52
Bibliography .....	53
Annex 1.A1. Progress in structural reform .....	55
<b>Chapter 2. Overcoming the financial crisis</b> .....	<b>57</b>
The anatomy of the crisis .....	59
Short-term crisis resolution .....	79
Longer-term crisis prevention .....	87
Concluding remarks on the lessons from the crisis .....	95
Bibliography .....	97
Annex 2.A1 .....	99
Annex 2.A2 .....	102
<b>Chapter 3. Health care reform</b> .....	<b>105</b>
Population health Status is lower and health expenditure is higher than in many other OECD countries .....	108
A growing proportion of the population is underinsured .....	122
Reforms to extend health insurance coverage .....	127
Medicare reforms to improve value for money .....	133
Notes .....	137
Bibliography .....	140

**Boxes**

1.1. Did the boom in subprime lending contribute to the sharp increase in house prices? . . . . .	26
1.2. The simulated effects of a decline in household wealth . . . . .	29
2.1. How subprime mortgages were transformed into AAA-rated securities. . . . .	64
2.2. Are mortgage borrowers walking away from their obligations? . . . . .	71
2.3. Holdings of mortgage-backed securities were financed with highly complex and leveraged structures. . . . .	77
2.4. The Federal Reserve's new liquidity operations. . . . .	81
2.5. Policy recommendations to contain the disruptions caused by the financial crisis. . . . .	86
2.6. Models of financial regulation based on a "unified" cross-sectoral approach. . . . .	88
2.7. Policy recommendations for financial prevention. . . . .	96
2.A1.1. Key features of the main categories of mortgage loans. . . . .	99
2.A2.1. The current regulatory structure of US financial markets. . . . .	102
3.1. Some health-care reform proposals in the public domain. . . . .	106
3.2. The gap in health-care Services between high- and low-wage workers is widening. . . . .	125
3.3. The origins and budget cost of employment-based health insurance. . . . .	128
3.4. The health-insurance reform package in Gruber's (2008) micro-simulation. . . . .	130
3.5. Massachusetts health-insurance reform. . . . .	132
3.6. The Sustainable Growth Rate mechanism to control growth in Medicare expenditure on physicians' Services and related Services. . . . .	136
3.7. Recommendations for improving value for money and insurance coverage in health care. . . . .	137

**Tables**

1.1. Simulated macroeconomic effects in the FRB/US model. . . . .	29
1.2. Near-term projections. . . . .	35
1.3. Developments in income distribution. . . . .	43
1.4. Relative poverty rates (50% median income), around 2000. . . . .	44
2.1. Terms of credit facilities for depository institutions. . . . .	81
2.2. Terms of credit facilities for primary dealers. . . . .	82
2.A1.1. Underwriting characteristics of loans in MBS pools. . . . .	101
3.1. Health-care workforce per 1 000 population and physician incomes, 2006 . . . . .	117
3.2. Health Services capacity and use, 2006. . . . .	118
3.3. Availability and use of sophisticated medical technologies, 2006 . . . . .	119
3.4. Adults aged 19-64 who were uninsured or underinsured, by various characteristics. . . . .	123
3.5. New insurance pool for individuals and small groups with subsidies and changed tax exclusions. . . . .	131

**Figures**

1.1. House prices relative to income and to rent . . . . .	24
1.2. Foreclosures have soared . . . . .	25
1.3. US financial conditions have tightened. . . . .	26
1.4. House price developments in selected OECD countries. . . . .	28
1.5. Headline and core inflation . . . . .	30

1.6. Monetary and fiscal stance . . . . .	30
1.7. Aggregate economic indicators . . . . .	32
1.8. Current account imbalance . . . . .	34
1.9. The CBO's long-term primary expenditure and revenue projections for the federal government . . . . .	37
1.10. The CBO's long-term projections for federal debt held by the public . . . . .	38
1.11. Evolution of growth in potential GDP and productivity . . . . .	39
1.12. Decomposition of growth in labour inputs . . . . .	41
1.13. Decomposing potential GDP per capita, 2007 . . . . .	42
1.14. Relative poverty among the working-age population and social spending, around 2000 . . . . .	45
1.15. Greenhouse gas emissions . . . . .	46
1.16. CO <sub>2</sub> emissions intensity of Output . . . . .	47
1.17. CO <sub>2</sub> emissions per capita per sector . . . . .	48
1.18. Share of taxes in premium unleaded gasoline prices . . . . .	49
2.1. Household liabilities in selected OECD countries . . . . .	60
2.2. Total mortgage originations by type . . . . .	61
2.3. High-risk securitised mortgage lending, 2004-06 . . . . .	62
2.4. Outstanding mortgage loans, end 2007 . . . . .	63
2.5. Typical capital structure of Alt-A and subprime mortgage-backed securities . . . . .	65
2.6. Interest-only and negative amortisation loans: share of total mortgage originations, 2000-06 . . . . .	66
2.7. Credit assets held by the financial sector . . . . .	67
2.8. House prices . . . . .	68
2.9. Mortgage delinquency rates . . . . .	69
2.10. Existing regulatory and supervisory structure for mortgage origination . . . . .	70
2.11. Interbank market spreads . . . . .	73
2.12. The rise in bond spreads . . . . .	75
2.13. Federal Reserve assets . . . . .	85
2.14. The regulatory framework proposed in the Treasury blueprint . . . . .	88
3.1. Life expectancy . . . . .	110
3.2. Trends in life expectancy . . . . .	111
3.3. Premature mortality . . . . .	111
3.4. Potential years of life lost adjusted for external causes . . . . .	112
3.5. Infant mortality rates . . . . .	113
3.6. Health expenditures per capita . . . . .	115
3.7. Health expenditure in relation to GNI per capita, 2005 . . . . .	116
3.8. Panel regressions: Years of life which are not explained by the general model . . . . .	120
3.9. Average annual health-care expenditures, by wage Status . . . . .	125
3.10. Out-of-pocket expenses as a share of total health expenditures . . . . .	128
