<i>Preface</i>	<i>page xv</i>
Introduction	1
What Is Included in This Book	3
Disclaimer	5
Acknowledgments	6
1 Introduction to Grid-Connected Solar Power Generation Technologies	7
A Brief History of the Photoelectric Phenomenon	7
Photovoltaic (PV) Principle in Solar Power Systems	7
Solar Power Technologies and Their Significance as a Viable Source of Electrical Energy	8
Conventional Electrical Energy Production Technology Drawbacks	9
Overview of Electrical Energy Production and Tariff Structures	12
The Electrical Power Grid	13
Peak Power Use Penalties	14
Specific Nature of PV Technology	14
Effects of Ambient Conditions on PV Power Production	16
Feasibility Study	17
Shading Analysis and Solar Energy Performance Multiplier	17
Importance of Site Shading Evaluation	18
Solar Power System Design Considerations and Computations	19
Solar Power System EPC Design Documentation	20
Solar Power System Documentation	20
PV Mapping and Configuration Analysis	21
DC-to-AC Power Conversion Consideration	21
PV System Power Output Rating	22
PV System Losses	22
Reverse Diode Losses	23
PV Module Soling Losses	23
Array Tilt Angle Loss	24

PV Array Azimuth Angle (0° to 360°)	24
Maintenance Costs	24
Energy Cost Escalation Consideration	25
Solar Power Project Cost Analysis	25
System Maintenance and Operational Costs Considerations	25
Project Financing	26
Proposal Evaluation	27
Pollution Abatement Considerations	27
Conclusion	27
Major Solar Power Generation System Components	28
Crystalline Silicon PV Technologies	28
Thin-Film PV Solar Technologies	29
Inverter	29
String Inverters	30
Balance-of-System Components	30
Ground-Mounted Systems	30
Solar Energy Density	31
Solar Power System PV Support Structures	31
Wiring for Electrical Connections	31
PV System Monitoring	31
Operation and Maintenance	32
Solar Power Platform Considerations	32
Net Metering	32
Virtual Net Metering	32
Economics and Performance	33
Job Economic Development Impact (JEDI) Analysis	33
2 Solar Power System Integration and Energy Production	35
Introduction	35
Transitioning to Smart Grid System	36
Grid as Energy Storage Mechanism	37
Electrical Energy Demand and Supply Control	37
Smart Grid Technology Challenges	37
Low-Voltage Ride-Through	38
The United States Unified Smart Grid	39
The International Smart Grid Systems	39
Prospect of Smart Grid Systems and Special Features	39
Super Smart Grid	40
Grid Power Control and Surplus Power Management	40
Scope of Smart Grid System	41
Types of Electrical Power Grids	41
Principle Function and Architecture of Smart Grid Systems	41
Peak Power Consumption Control	42
Impact of Smart Grid on Renewable Energy Production	42

Synchronized Grid Interconnections	43
Western America Interconnection	43
Smart Grid Advanced Services and Devices	44
Load Control Switches	44
High Temperature Conductors	45
Aluminum Conductor Composite Reinforced	45
Aluminum Conductor Composite Core	46
Aluminum Conductor Steel Supported	46
Smart Grid and Mesh Networking	46
Wireless Mesh Networks in the United States	47
Smart Grid and Climate Change	48
Energy Conservation	49
Grid Efficiency	49
Renewable Energy Integration	49
Summary Overview of Smart Grid Systems	49
Essential Features and Benefits of Smart Grid Systems	49
Grid Monitoring and Control Devices	50
Benefits of the Smart Grid System	50
Energy User and Consumer Benefits	50
Utilities Provider Benefits	50
Greater Use and Deployment of Clean Energy Resources	51
Economic Impact of Smart Grid Systems	51
Largest Solar Power Installations in the World	52
Belgium: 803 MW	52
France: 1025 MW	53
Spain: 3784 MW	53
Germany: 17,193 MW	53
Czech Republic: 1953 MW	53
Italy: 3494 MW	53
The United States: 2528 MW	53
China: 893 MW	54
South Korea: 655 MW	54
Japan: 3662 MW	54
Rest of the World: 9 Percent	54
3 Solar Power System Feasibility Study	55
Introduction	55
Significance of Solar Power Feasibility Study	55
Study and Site Background	56
Feasibility Study Overview	56
Review and Assessment of Site Survey Information	59
Example of a Feasibility Study	59
Solar Power Site Survey Guide and Logs	60
Site Survey	61

Site Survey Form for Solar Power Parking Canopy Systems	63
Site Survey Form for Ground-Mounted Solar Power Systems	67
Solar Power System Preliminary Design Considerations	70
Shading Analysis and Solar Energy Performance Multiplier	72
Importance of Site Shading Evaluation	72
How to Use Solar Pathfinder™	73
Solmetric SunEye	76
Solar Panel Design and Installation	77
Passive Solar House Design and Green Architecture	77
How the SunEye Works	78
Displaying Data	79
Using the Data	79
Meteorological Data	80
Structural Design Considerations	80
Project Preliminary Cost Estimating Example	80
Energy Cost Factor Considerations	81
Example of a Solar Power System Sizing Estimate	82
Solar System Sizing Estimate Using PV Watts II Calculator	83
How to Customize PV Watts Parameters	84
DC-to-AC Derate Factor	85
PV Module Nameplate DC Rating	85
Inverters and Isolation Transformers	86
Solar PV Module Mismatch	86
Diodes and PV Module Connection Losses	86
Soiling and Airborne Particulate Settlements	86
System Availability Interpretation	87
Sun-Tracking System Considerations	87
PV Module Age Factor	87
Array Type	88
How to Prepare a Feasibility Study Report	89
Executive Summary	90
Example of a Solar Feasibility Study Report	90
Report Format	90
What to Include in the Executive Report	91
Example of a Feasibility Study Analysis	91
Scenario No.1	92
Scenario No.2	94
Scenario No.3	94
Conclusions and Recommendations	96
4 Solar Power Financing	103
Introduction	103
California Solar Initiative Rebate Program	103

CSI Fund Distribution	104
CSI Power Generation Targets	104
Production Targets for Residential, Commercial, and Government Clients	105
Host Customer	107
Solar Power Contractors and Equipment Sellers	108
PV System Sizing Requirements	108
Energy Efficiency Audit	109
Warranty and Performance Permanency Requirements	109
Insurance	110
Grid Interconnection and Metering Requirements	110
Inspection	110
Incentive Payments	113
EPBB Calculation Procedure	114
California Solar Initiative Reservation Form Calculations	114
Solar Power System Equipment Distributors	115
Principal Types of Municipal Lease	115
Tax-Exempt Municipal Lease	116
Entities That Qualify for a Municipal Lease	116
Difference between a Tax-Exempt Municipal Lease and a Commercial Lease	117
Overview of Solar Power Project Financing	118
California Energy Commission Report on Feed-In Tariffs	119
Benefits and Limitations of Feed-In Tariffs	120
Recommended Steps for a Successful Solar Power Project	121
Preliminary Project Evaluation	121
Energy Use and Efficiency Cost Evaluation	122
Identifying Solar Power Platforms	122
Finding Experienced Solar Power/Electrical Engineering Consultants	122
Criteria for Engaging Solar Power Integrators	123
Solar Power Contract Negotiation	124
Owner, Consultant, and Contractor Collaboration	125
Long-Term Solar Power System Operation and Maintenance	125
Solar Power System Ownership	126
Cash Investment Option	126
Debt or Loan Option	126
Operating Lease Option	127
Suggestions Regarding Purchase Options	127
Advantages and Responsibilities of Ownership	128
Lease-to-Own Agreement	128
Green Energy Pricing Program	129
Advantages of SPPA	129
Feed-in Tariffs	130

Origins of FIT	130
Effects of FIT on Electricity Rates	131
Grid Parity	131
Quota-Based Renewable Energy Policies	132
Owner and Operator Financing	132
Third-Party Developers with PPAs	133
Third-Party “Flip” Agreements	133
Hybrid Financial Structures	134
Solar Services Agreement and Operating Lease	134
5 Financing and Risk Management	136
Introduction	136
Project Financing and Associated Project Risks	136
Sponsor Risks	136
Risk Avoidance Control Strategies	137
Project Case and Associated Risks and Mitigation Measures	138
Debt Service Security	163
Adequate Insurance Policy against Business Interruption	163
Government Assurance and Guarantees	163
Financial Economics of Energy Production	163
Project Capital Costs	164
Operating Costs	165
Investment Appraisal by Lenders	165
Cash Flow Consideration	166
Discounted Cash Flow	167
Net Present Value	168
Floating Interest	169
Effects of Inflation on Investment	169
Internal Rate of Return	170
Investment Evaluation Criteria	170
Financing Sources	171
Debt–Equity Ratio	171
Loan Approval Procedures	172
Additional Considerations	173
Introduction to a Proposed Solar Power System	
Costing Analysis	173
Costing Spreadsheet	174
Spreadsheet Software Components	176
Grid-Connected Solar Power Cybersecurity Risks	177
6 Grid-Connected Solar Power System Costing	178
Introduction	178
PV Module Power Output Normalization	178
Solar Power System Loss Computation	179

Solar Power System Energy Output Computation	181
Solar Power System Construction Costing	182
First-Year Economic Contribution	182
Solar Power System Life Cycle Economic Contribution	183
Solar Power System Life Cycle NPV Economic Contribution	185
Solar Power System Economics Summary Overview	188
Project Construction Cost Risk Calculation	190
Fixed-Axis Material Cost Escalation Risk Factors	193
Extended Life Cycle Analysis and System Salvage Value	193
Solar Power System as CO ₂ -Free Energy Source	196
Single- and Dual-Axis Solar Power Tracking Systems	196
NREL – Solar Advisor Model 2010	197
7 Engineering, Procurement, and Construction Document	200
Introduction	200
Specification Introductory Clause	200
Years of Experience	201
Special Engineering Oversight	201
Photovoltaic (PV) Material Procurement	201
Site Visit and Solar Platform Verification	202
Equipment and Material Specification	202
Material and Equipment Specification	202
Proposal Response	202
Scope of Work	204
Project Execution Schedule	205
System-Filed Statement of Procedure	208
Test Scope	209
System Operational Tests	210
System Rating	211
Power Output Verification	211
Customer Training	211
Operation and Maintenance	212
Design and Engineering	212
Record Check Prints	214
Grid-Connected Solar Power Cogeneration System	214
Solar Power System Configuration	214
Display Animation Capability	215
Data Acquisition Equipment Location	215
Solar Power Cogeneration System Output Performance	215
Electrical Wiring and Equipment Installation	215
PV Solar Module Performance Specification	216
PV Module Performance under STCs	216
PV System Parameters	216
Inverter/Combiner Specification	216

Central Data Acquisition and Monitoring System	218
Weather Station Transmitted Data	220
Inverter Monitoring Data	220
Central Monitoring System CPU Capability	221
8 Contract Agreements and Legal Language	222
Introduction	222
Long-Term Industrial Project Financing	222
Participants in Large-Scale Project Financing	223
Engineering, Procurement, Construction and Contractual Documents	223
System Operation and Maintenance Guarantee Agreement	224
Shareholder Agreement and Off-Take Contractual Agreement	225
Creditor Agreements	225
Term Sheet	226
Power Purchase Price	226
Contractual Matters of Interest	227
Technical Matters of Interest	228
Experience in Large-Scale Installation	228
Data Acquisition and Monitoring Requirements	229
PPA Contracts and Legal Issues	229
Advantages of PPAs	230
Disadvantages of PPAs	230
Preparation for PPA Proposal	231
PPA Legal Language and Contract Language	232
Definitions	233
Provider's Authority	234
Standard System Design Package	234
System Components	234
Roof Mount Solar Power Installations Site Conditions	235
Ground Mount Solar Power Installations	235
Electrical Conditions	235
Power Purchase Agreement	236
Agreement Conditions	236
Agreement	236
Purchase and Sale of Solar Services	239
System Installation and Testing	239
Standard System Design Package	240
Alternate Location	240
Conditions Precedent to Commencement of Construction and Installation	241
Utility Approvals	241

Energy Delivery Conditions and Commercial Operation Date	242
Environmental Financial Incentives	242
Customer Audits and Inspections	244
Scheduled Outages	245
Compliance with Utility Specifications	245
Price and Payment	247
Covenants of Provider	248
Customer's Covenants	249
Maintenance of Interconnection	250
Waiver of Claims	252
Customer Options	252
Customer Options upon Expiration of Term	254
Customer Purchase Option Prior to Expiration Date	255
Payment of Termination Value on Termination Date	255
Provider Termination	255
Customer Default	256
Lease Default	257
Customer's Remedies upon Occurrence of a Provider Default	258
Consequential Damages	259
Effect of Termination of Agreement	260
Notice of Claims	260
Miscellaneous Provisions	261
Provider Representations	262
Customer Representations	262
Assignment	263
Estoppel	265
9 Socioeconomic Cost-Benefits Analysis of Solar Energy	266
Introduction	266
Socioeconomic Cost-Benefit Analysis	266
Deployment and Investment Policies	267
Development of Domestic Technologies	268
Solar Power Technology Research and Innovation	270
Effects of Climate Change	270
Role of International Financing	272
International Global Investment Partners	276
The Problem with Economics and Finance	277
<i>Appendix A: Glossary of Solar Power Technology Terms</i>	281
<i>Appendix B: Glossary of Financial Terms</i>	309
<i>Appendix C: Solar Power Industry Report</i>	312

<i>Appendix D: Economics of Carbon Dioxide Sequestration and Carbon Trading</i>	320
<i>Appendix E: Photo Gallery of Large-Scale Solar Power Systems</i>	338
<i>Appendix F: Solar Power System Design and Construction Process Flow Diagrams</i>	345
<i>References</i>	357
<i>Index</i>	359
