Contents

Series Preface	v
Preface	vii
About the Editors	ix
International and Organizing Committees	xi
Introductory Article	
Coupled THM processes in geological systems and the DECOVALEX project <i>C.-F. Tsang, O. Stephansson, F. Kautsky and L. Jing</i>	3
Keynote Contributions	
Predicting solute transport in fractured rocks – processes, models and some concerns <i>I. Neretnieks</i>	19
Modelling gas flow through deformable fractured rocks <i>S. Olivella, and E.E. Alonso</i>	31
Research and application on coupled T-H-M-C processes of geological media in China – A review <i>X-T. Feng, J. Liu and L. Jing</i>	37
Coupled processes and petroleum geomechanics <i>M.B. Dusseault</i>	49
Some THMC controls on the evolution of fracture permeability <i>D. Elsworth</i>	63
Detection of hydraulically created permeable structures in HDR/HWR reservoir by high resolution seismic mapping techniques <i>H. Niitsuma</i>	73
Recent study of coupled processes in geotechnical and geoenvironmental fields in China <i>S. Wang and E. Wang</i>	81
Theme 1 Coupled T-H-M-C Processes in Radioactive Waste Disposal Systems	
<u>Theme 1-1 DECOVALEX III/BENCHPAR Projects- Task 1</u>	
The FEBEX benchmark test. Case definition and comparison of different modelling approaches <i>E.E. Alonso and J. Alcoverro</i>	95
Modelling the response of the bentonite in the FEBEX heater experiment <i>T.S. Nguyen, A.P.S. Selvadurai and G. Armand</i>	113
THM simulation of the full-scale in-situ engineered barrier system experiment in Grimsel Test Site in Switzerland <i>Y. Sugita, M. Chijimatsu, A. Ito, H. Kurikami, A. Kobayashi and Y. Ohnishi</i>	119
Hydromechanical response of jointed host granitic rock during excavation of the FEBEX tunnel <i>S. Sobolik, S. Webb, A. Kobayashi and M. Chijimatsu</i>	125
Analyses of coupled hydrological-mechanical effects during drilling of the FEBEX tunnel at Grimsel <i>J. Rutqvist, A. Rejeb, M. Tijani and C.-F. Tsang</i>	131
Thermomechanical model for compacted bentonite <i>P. Jussila</i>	137

A fully coupled three-dimensional THM analysis of the FEBEX in situ test with the ROCMAS code: Prediction of THM behavior in a bentonite barrier <i>J. Rutqvist and C.-F. Tsang</i>	143
A discrete approach to modelling hydromechanical rock response of FEBEX tunnel excavation (Grimsel Underground Research Laboratory, Switzerland) <i>V. Merrien-Soukatchoff, I. Kadiri, K. Su and Y. Guglielmi</i>	149
 <u>Theme 1-2 DECOVALEX III/BENCHPAR Projects- Task 2</u>	
Measuring thermal, hydrological, mechanical, and chemical responses in the Yucca Mountain Drift Scale Test <i>R. Datta, D. Barr and W. Boyle</i>	155
Analysis of stress and moisture induced changes in fractured rock permeability at the Yucca Mountain Drift Scale Test <i>J. Rutqvist, C.-F. Tsang and Y. Tsang</i>	161
Thermal-mechanical modeling of a large-scale heater test <i>S.M. Hsiung, A.H. Chowdhury and M.S. Nataraja</i>	167
Numerical simulation of thermal-hydrological processes observed at the Drift-Scale Heater Test at Yucca Mountain, Nevada <i>R.T. Green and S.Painter</i>	175
THM analysis of a heating test in a fractured tuff <i>S. Olivella, A. Gens and C. Gonzalez</i>	181
Comparative analyses of predicted and measured displacements during the heating phase of the Yucca Mountain Drift Scale Test <i>A. Millard and J. Rutqvist</i>	187
 <u>Theme 1-3 DECOVALEX III/BENCHPAR Projects- Task 3: BMTI/WP2</u>	
Building confidence in the mathematical models by calibration with a T-H-M field experiment <i>M. Chijimatsu, L. Jing, A. Millard, T.S. Nguyen, A. Rejeb, J. Rutqvist, M. Souley and Y. Sugita</i>	193
Numerical simulation of variably coupled thermo-hydro-mechanical processes in fractured porous media <i>M. Kohlmeier, R. Kaiser and W. Zielke</i>	199
Numerical implementation of thermally and hydraulically coupled processes in non-isothermal porous media <i>J. De Jonge, M. Xie and O. Kolditz</i>	205
Evaluation of THM coupling on the safety assessment of a nuclear fuel waste repository in a homogeneous hard rock <i>A. Millard, A. Rejeb, M. Chijimatsu, L. Jing, J. De Jonge, M. Kohlmeier, T.S. Nguyen, J. Rutqvist, M. Souley and Y. Sugita</i>	211
Evaluation of the impact of thermal-hydrological-mechanical couplings in bentonite and near-field rock barriers of a nuclear waste repository in sparsely fractured hard rock <i>J. Rutqvist, M. Chijimatsu, L. Jing, A. Millard, T.S. Nguyen, A. Rejeb, Y. Sugita and C.F. Tsang</i>	217
Implications of coupled thermo-hydro-mechanical processes on the safety of a hypothetical nuclear fuel waste repository <i>T.S. Nguyen, M. Chijimatsu, J. De Jonge, L. Jing, M. Kohlmeier, A. Millard, A. Rejeb, J. Rutqvist, M. Souley and Y. Sugita</i>	225

Theme 1-4 DECOVALEX III/BENCHPAR Projects- Task 3: BMT2/WP3

Development of a methodology to quantify the importance of hydro-mechanical processes in radionuclide migration assessments 231
P. Blum, R. Mackay and M.S. Riley

Understanding the impact of hydro-mechanical coupling on performance assessment of deep waste disposal 237
P. Blum, R. Mackay and M.S. Riley

Impact of flow and transport coupling in the upscaling of transport parameters for performance assessment in the context of nuclear waste disposal 243
J.J. Gómez-Hernández and E.F. Cassiraga

Upscaling the THM properties of a fractured rock mass using a modified crack tensor theory 251
V. Guvanasen and T. Chan

Effect of the fracture geometry on the coupled phenomena in large scale 257
A. Kobayashi, Y. Sugita and M. Chijimatsu

Upscaling of normal stress-permeability relationships for fracture networks obeying fractional levy motion 263
H.H. Liu, J. Rutqvist, Q. Zhou and G.S. Bodvarsson

A block-scale stress-permeability relationship of a fractured rock determined by numerical experiments 269
K.B. Min, J. Rutqvist, C.-F. Tsang and L. Jing

Hydro-mechanical upscaling of a fractured rockmass using a 3D numerical approach 275
A. Thoraval and V. Renaud

Thermo-Mechanical effects on hydraulic conductivity in a nuclear waste repository setting 281
J. Öhman, J. Antikainen and A. Niemi

Theme 1-5 DECOVALEX III/BENCHPAR Projects- Task 3: BMT3/WP4

A finite-element study of potential coupled hydromechanical effects of glaciation on a crystalline rock mass 287
T. Chan, F.W. Stanchell, T. Wallroth, J. Hernelind and G. Boulton

Thermo-hydro-mechanical impacts of coupling between glaciers and permafrost 293
G. Boulton and J. Hartikainen

Thermo-hydro-mechanical (T-H-M) impacts of glaciation and implications for deep geologic disposal of nuclear waste 299
G. Boulton, T. Chan, R. Christiansson, L.O. Ericsson, J. Hartikainen, M.R. Jensen, F.W. Stanchell and T. Wallroth

Theme 1-6 Radioactive Waste Disposal – Engineered Barrier Systems

Temperature influence on the mechanical behaviour of a compacted bentonite 305
M.V. Villar and A. Lloret

Impact of in-situ parameters and boundary conditions on the thermal-hydro-mechanical behaviour of a clay engineered barrier system 311
N. Barnel, T. Lassabatère, C. Le Potier and P. Sémété

Analysis of the THMC behaviour of compacted swelling clay for radioactive waste isolation 317
A. Gens, L. do N. Guimarães, S. Olivella and M. Sánchez

A new mechanistic approach to simulating swelling processes in bentonite materials 323
M. Xie, W. Wang, J. De Jonge and O. Kolditz

Application of a THM-coupled code to transport processes in a swelling bentonite buffer <i>T. Nowak, H. Shao and M. Wallner</i>	329
Drying and resaturation of the bentonite barrier in a nuclear waste repository. Analyses based on an analytical solution <i>J. Claesson</i>	335
Fabric changes of a pellet-based bentonite buffer material and their effects on mechanical behaviour <i>C. Hoffmann, E.E. Alonso and E. Romero</i>	341
<u>Theme 1-7 Radioactive Waste Disposal – Geological Barriers and Repositories</u>	
A conceptual and numerical model for thermal-hydrological-chemical processes in the Yucca Mountain Drift Scale Test <i>E.L. Sonnenthal, N.F. Spycher, M. Conrad and J. Apps</i>	347
A research program for numerical experiments on the coupled thermo-hydro-mechanical and chemical processes in the near-field of a high-level radioactive waste repository <i>A. Ito, M. Yui, Y. Sugita and S. Kawakami</i>	353
GeoMod - An integrated geoscientific model of the Äspö Hard Rock Laboratory, Sweden <i>R. Christiansson, J.A. Hudson, J. Berglund, M. Laaksoharju, H. Hakami, P. Vidstrand and J. Sundberg</i>	359
Prototype code development for numerical experiments on the coupled thermo-hydro-mechanical and Chemical processes in the near-field of a high-level radioactive waste repository <i>A. Neyama, A. Ito, M. Chijimatsu, Y. Ishihara, T. Hishiya, M. Yui, Y. Sugita and S. Kawakami</i>	365
Modelling three phase hydro-mechanical coupling in porous media: Application to a real scale experiment <i>G. Klubertanz, J. Croisé, M. de Combarieu and K. Ando</i>	371
T-H-M modelling of the prototype experiment at Äspö HRL (Sweden) <i>A. Ledesma and G. Chen</i>	377
<u>Theme 1-8 Radioactive Waste Disposal – Fundamentals and Applications</u>	
Interpretation of some in-situ tracer experiments in fractured crystalline rock at Äspö Hard Rock Laboratory <i>I. Neretnieks</i>	383
The on-going pillar stability experiment at the Äspö Hard Rock Laboratory, Sweden <i>C. Andersson, M. Rinne, I. Staub and T. Wanne</i>	389
Algorithms for parallel FEM modelling of thermo-mechanical phenomena arising from the disposal of the spent nuclear fuel <i>R. Blaheta, P. Byczanski, R. Kohut and J. Starý</i>	395
Thermo-mechanical modeling of a subsurface interim nuclear waste storage: Behaviour in working conditions <i>G. Thouvenin and A. Millard</i>	401
Effect of coupling behavior of the near field on groundwater flow of the far field for geological disposal of high-level radioactive waste <i>H. Kurikami, A. Kobayashi, M. Chijimatsu, Y. Sugita and Y. Ohnishi</i>	407
Impact of temperature increase on nuclide transport in crystalline rock on the near field scale <i>H. Cheng and V. Cvetkovic</i>	413
Desiccation and rehumidification effects on the thermohydrromechanical behaviour of the Callovo-Oxfordian argillaceous rock <i>K. Su, N. Hoteit and O. Ozanam</i>	419

- Thermo-mechanical simulations of pillar spalling in SKB APSE test by FRACOD 425
M. Rinne, B. Shen, H.S. Lee and L. Jing

Theme 2 Fundamentals of Modelling Coupled T-H-M-C Processes of Geosystems

Theme 2-1 Fundamentals – Modelling tool

- T-H-M-C modelling of rock mass behaviour - 1: The purposes, the procedures and the products 433
J. Andersson and J.A. Hudson

- T-H-M-C modelling of rock mass behaviour - 2: The input data and rock mass partitioning 439
J.A. Hudson and J. Andersson

- Simulation of consolidation and transport processes in clayey rocks 445
M.G. Khrumchenkov

- Verification and validation of a three-dimensional finite-element code for coupled T-H-M-C modelling in fractured rock masses 451
T. Chan, V. Guvanasean and F.W. Stanchell

- Water flow and diffusion problem in bentonite: Molecular simulation and homogenization analysis 457
Y. Ichikawa, S. Prayongphan, K. Kawamura and K. Kitayama

- Analysis of the hydraulic interaction between clay buffer and host rock in a large scale test 465
H.R. Thomas, P.J. Cleall, N. Chandler, D. Dixon and H.P. Mitchell

- Modelling groundwater pressure and thermal loading in three-dimensional discontinuous deformation analysis 471
Q.H. Jiang, M.R. Yeung and N. Sun

Theme 2-2 Fundamentals – Material Characterization and Models

- Penetration-induced pore pressure magnitudes – methods to determine transport parameters from terrestrial and marine penetrometer testing 477
D. Elsworth, D.S. Lee, H. Long and P.B. Flemings

- A double-porosity poroelastic model to relate P-wave attenuation to fluid flow in vuggy carbonate rock 483
J. Parra, C. Hackert and S. Pride

- Thermo-mechanical yielding of a clay 489
C. Cekerevac and L. Laloui

- An elastoplastic damage model for unsaturated argillites 495
J.F. Shao, Y. Jia and D. Kondo

- Study on time-temperature equivalent principle for rocks 501
Q. Liu, C. Wang and T. Yamaguchi

- On the significance of hydrodynamic control for radionuclide retention in fractured porous media 507
V. Cvetkovic

Theme 2-3 Fundamentals – Mechanics of Fractured and Porous Geological Media

- Fundamental thermodynamic requirements for porous media description 513
T.J.T. Spanos, M.B. Dusseault and N. Udey

- Modelling contamination of clays 523
N. Boukpeti, R. Charlier and T. Hueckel

Dependence of subcritical crack growth in rocks on water vapor pressure <i>Y. Nara and K. Kaneko</i>	529	I J
Thermomechanical modelling of microstructured porous media with inclusions <i>P. Giovine</i>	535	J
Analysis of mechanical and hydraulic properties of cracked structure by the ratio of crack opening dependency (RCOD) <i>A. Sato, Y. Hirakawa and K. Sugawara</i>	541	I E S
Characterizing in the laboratory permeability changes induced by deviatoric stress in clayey rocks <i>C. Coll, J. Desrués, P. Bésuelle and G. Viggiani</i>	547	J E S
Coupled thermal, hydraulic and mechanical simulation with a theoretical model for swelling characteristics <i>H. Komine, H. Kurikami, M. Chijimatsu, A. Kobayashi, Y. Sugita and Y. Ohnishi</i>	553	C e J
On the constitutive modelling of thermo-hydro-mechanical coupling in elastic media with double porosity <i>N. Khalili and A.P.S. Selvadurai</i>	559	S h
Simulation of coupled fluid flow and solute transport in a rough fracture <i>J. Wang and Z. Zhou</i>	565	J
Theme 3 Coupled T-H-M-C processes for Oil/Gas Reservoir Engineering		
Coupled thermo-mechano-chemical processes in shales: The petroleum borehole <i>M.B. Dusseault</i>	573	C S A E J
A coupled mechanical-thermal-physico-chemical model for the study of time-dependent wellbore stability in shales <i>S.K. Choi, C.P. Tan and R. Freij-Ayoub</i>	581	N P I
Mechanical behaviour of chalk reservoirs: Numerical modelling of water sensitivity effects <i>F. Collin, Y.J. Cui, Ch. Schroeder and R. Charlier</i>	587	N J
Coupled analysis of sand stability in petroleum wellbores <i>G. Han and M.B. Dusseault</i>	593	E n E
Coupled analysis of damage formation around wellbores <i>L. do N. Guimaraes, A. Gens and S. Olivella</i>	599	
Development of 3D FEM software for two-phase flow and its application to <i>Horonobe</i> natural gas Simulation <i>H. Li, M. Sato and T. Sakai</i>	605	T M K
A coupled flow-transport-deformation model for underground coal gasification <i>J. Liu, C. Mallett, A. Beath, D. Elsworth and B. Brady</i>	611	V L
Investigating the relationship between fault permeability and effective stress using constraints from reservoir induced seismicity (RIS) <i>R.J. Lunn, A.F do Nascimento and P. Cowie</i>	617	E E I
Visual numerical simulation of coupled gas leak flow and coal-rock deformation in parallel coal seams <i>P. Sun</i>	623	T f
A coupled geomechanical-reservoir model for the modelling of coal and gas outbursts <i>S.K. Choi and M.B. Wold</i>	629	A E V

- Application of fluid-solid coupling theory in oil field casing damage forecast 635
J. Liu and X.T. Feng

Theme 4 Coupled T-H-M-C Processes for Geothermal Energy Engineering

- Permeability in layered reservoirs: Field examples and models on the effects of hydrofracture propagation 643
S.L. Brenner and A. Gudmundsson

- The effect of thermal, chemical, hydrological, and mechanical factors on water/rock interaction in HDR geothermal systems 649
S. Fomin, Z. Jing and T. Hashida

- Coupled T (thermal) - H (hydrological) - C (chemical) process of geothermal alteration, based on experimental and kinetic considerations 655
J. Hara and N. Tsuchiya

- Supercritical water/rock interactions and generation of artificial geothermal reservoirs in deep-seated high temperature rock masses 661
T. Hashida and T. Takahashi

- Coupled THM modeling of the stimulated permeable fractures in the near well at the Soultz-sous-Forêts site (France) 667
A. Hosni, S. Gentier, A. Genter, J. Riss, D. Billaux and F. Dedecker

- Effect of thermal deformation on fracture permeability in stressed rock masses 673
T. Ito, D. Swenson and K. Hayashi

- Numerical flow and heat transfer model of the porous-fracturing hydrothermal system of the paratooth thermal water field 679
I.I. Krashin, L.V. Semendyaeva, A.I. Zinin and G.A. Zinina

- Microcrack formation and fracture characteristics in granite under supercritical water conditions 685
T. Takahashi and T. Hashida

- Estimation of critical pore pressure for shear slip of fractures at the Soultz Hot Dry Rock geothermal reservoir using microseismic multiplets 691
H. Moriya, H. Niitsuma and R. Baria

Theme 5 Coupled T-H-M-C Processes in Geological Systems

- Modelling of sediment compaction during burial in sedimentary basins 699
K. Bjørlykke, F. Chuhan, A. Kjeldstad, E. Gundersen, O. Lauvrak and K. Høeg

- Vaporization-induced overpressures as a trigger for the hazardous collapse of lava domes 709
D. Elsworth, B. Voight, J. Simmons, S. Young and B. Winkler

- Bentonites from Ishirini (Libya) as natural analogues of long term thermal and chemical effects: Isotopic and fluid inclusion evidence 715
I. Kolaříková and R. Hanus

- The evolution of permeability in natural fractures – The competing roles of pressure solution and free-face dissolution 721
A. Polak, H. Yasuhara, D. Elsworth, J. Liu, A. Grader and P. Halleck

- Earth crust structure as a result of rock fracturing at high pressure and temperature conditions 727
V. Nikolaevskiy and I. Garagash

Compaction and diagenesis of sandstones – The role of pressure solution <i>H. Yasuhara, D. Elsworth and A. Polak</i>	733
Measurement and 2D modeling of fluid control on the hydromechanical behavior of a fractured reservoir <i>I. Kadiri, V. Merrien-Soukatchoff, Y. Guglielmi and K. Su</i>	739
Theme 6 Coupled T-H-M-C Processes in Geotechnical and Environmental Engineering	
Simulation of coupled thermal and solute concentration effects on dense radioactive waste migration in deep aquifers <i>A.I. Zinin, G.A. Zinina, V.M. Kurochkin, A.I. Rybalchenko, A.A. Zubkov and S.P. Pozdniakov</i>	747
Study on coupling influences of concrete dam foundation seepage, stress, and creep on structure behaviors of dam body <i>H. Guo, W. Xu and Z. Wu</i>	753
Consolidation settlements above deep tunnels in fractured crystalline rock: Numerical analysis of coupled hydromechanical mechanisms <i>E. Eberhardt, K. Evans, C. Zangerl and S. Loew</i>	759
Coupled damage-seepage constitutive model of jointed rock masses and its engineering application <i>Z. Zhu, W. Xu, A. Zhang and S. Wang</i>	765
Mathematical modeling of borehole grouting in permafrost <i>S. Fomin, V. Chugunov and T. Hashida</i>	773
Thermo-hydrological analysis to predict the temperature distribution around a cold food storage cavern <i>G.-S. Lee and C.-I. Lee</i>	779
Deep weathering and alteration in granites – A product of coupled processes <i>K. Thuro and M. Scholz</i>	785
Modeling the thermo-mechanical processes of a typical Three-Gorges Dam section during and after construction <i>J. Liu, X.-T. Feng, X.-L. Ding and C.-F. Dai</i>	791
Modeling of the dilatancy - Saturation coupling during excavation and consolidation of an underground structure <i>P. Kolmayer and C. Chavant</i>	797
Author Index	805
Subject Index	807
