CONTENTS

PREFACE TO THE SECOND EDITION	xix
PREFACE TO THE FIRST EDITION	xxi

I. INTRODUCTION	1
-----------------	---

1. CERAMICS PROCESSING AND CERAMIC PRODUCTS	3
---	---

1.1 A Brief History of Ceramic Technology / 11

1.2 Industrial Ceramics Processing / 12

1.3 Science in Ceramics Processing / 13

Summary / 15

Suggested Reading / 15

Problems / 16

Examples / 16

2. SURFACE CHEMISTRY	18
----------------------	----

2.1 The Atomic Structure of the Surface Differs from that in the Interior of the Particle / 18

2.2 Surface Tension Causes a Pressure Difference Across a Curved Surface / 20

- 2.3 Weak Van der Waals Forces or Chemical Bonding Causes Solid Surfaces to Adsorb Molecules from Gases and Liquid Solutions / 21
- 2.4 The Wetting and Spreading of a Liquid on a Solid Surface Depend on Short-Range Molecular Forces that can be Significantly Modified by a Monolayer Coating / 23
- 2.5 Wetting may Cause Compressive Forces between Particles and Liquid Migration / 24
- 2.6 Weak Intermolecular Forces can Cause the Adherence of Molecules on a Surface and the Agglomeration of Small Particles / 26
- Summary / 27
- Suggested Reading / 27
- Problems / 27
- Examples / 28

II. CERAMIC RAW MATERIALS 33

3. COMMON RAW MATERIALS 35

- 3.1 Crude Materials / 36
- 3.2 Industrial Minerals / 36
- 3.3 Industrial Inorganic Chemicals / 40
- Summary / 49
- Suggested Reading / 49
- Problems / 50
- Examples / 51

4. SPECIAL INORGANIC CHEMICALS 54

- 4.1 Powders from Chemical Solution Techniques / 54
- 4.2 Powders from Vapor Phase Reactions / 61
- 4.3 Other Techniques / 62
- Summary / 63
- Suggested Reading / 63
- Problems / 64
- Examples / 65

III. MATERIALS CHARACTERIZATION	67
5. CHARACTERISTICS AND SPECIFICATIONS OF CERAMIC MATERIALS	69
5.1 Particles, Powders, Colloids, and Agglomerates /	
69	
5.2 Raw-Material Specifications / 70	
Summary / 74	
Suggested Reading / 75	
Problems / 75	
Examples / 76	
6. CHEMICAL AND PHASE COMPOSITION	78
6.1 Bulk Chemical Analysis / 78	
6.2 Phase Analysis / 82	
6.3 Surface Analysis / 85	
6.4 Thermochemical and Thermophysical Analyses /	
86	
Summary / 89	
Suggested Reading / 89	
Problems / 90	
Examples / 91	
7. PARTICLE SIZE AND SHAPE	92
7.1 Analysis Techniques / 92	
7.2 Selecting a Technique / 102	
7.3 Presentation of Particle Size Data / 104	
7.4 Calculating a Mean Particle Size / 106	
7.5 Particle Size Distribution Functions / 109	
Summary / 113	
Suggested Reading / 113	
Problems / 114	
Examples / 115	
8. DENSITY, PORE STRUCTURE, AND SPECIFIC SURFACE AREA	118
8.1 Density / 118	
8.2 Porosity and Pore Structure / 123	

14. BATCH CONSISTENCY AND FORMULATION **231**

14.1 Processing Consistency State / 231

14.2 Batch Calculations / 238

Summary / 240

Suggested Reading / 240

Problems / 240

Examples / 241

VI. PARTICLE MECHANICS AND RHEOLOGY **245**

15. MECHANICS OF UNSATURATED BODIES **247**

15.1 Concept of Effective Stress / 247

15.2 Particle Interactions / 248

15.3 Interparticle Friction / 250

15.4 Lubrication / 252

15.5 Average Stresses in a Powder Mass / 254

15.6 Shear Resistance of Granular Materials and
Powders / 255

15.7 Stress-Strain Behavior During Compression /
258

15.8 Strength of Agglomerates and Compacts / 260

15.9 Shear Resistance of Nearly Saturated Cohesive
Bodies / 266

Summary / 272

Suggested Reading / 272

Problems / 273

Examples / 274

**16. RHEOLOGY OF SATURATED SYSTEMS
(SLURRIES AND PASTES)** **277**

16.1 Effective Stress and Shear in a Saturated
System / 277

16.2 Rheological Models and Properties / 279

16.3 Determination of Viscosity / 282

16.4 Viscosity of Liquids / 288

16.5 Viscosity of Binder Solutions / 289

16.6 Viscosity of Suspensions and Slurries of
Dispersed Powders and Colloids / 291

- 16.7 Rheology of Coagulated Systems / 297
- 16.8 Rheology of Suspensions and Slurries
Containing Binders / 302
 - Summary / 304
 - Suggested Reading / 304
 - Problems / 305
 - Examples / 307

VII. BENEFICIATION 311

17. COMMINUTION 313

- 17.1 Comminution Equipment / 313
- 17.2 Loading and Fracture of Particles / 318
- 17.3 Milling Performance / 323
- 17.4 Milling Practice / 326
- 17.5 Particle Size Distributions / 328
- 17.6 Milling Efficiency / 330
 - Summary / 332
 - Suggested Reading / 332
 - Problems / 333
 - Examples / 334

18. BATCHING AND MIXING 338

- 18.1 Bulk Solids Transport and Batching / 338
- 18.2 Mixing and Mixedness / 342
- 18.3 Mixing Mechanisms / 346
- 18.4 Mixing Equipment and Practice / 347
- 18.5 Mixing Performance / 354
 - Summary / 357
 - Suggested Reading / 357
 - Problems / 358
 - Examples / 359

19. PARTICLE SEPARATION, CONCENTRATION, AND WASHING PROCESSES 362

- 19.1 Particle Sizing / 362
- 19.2 Filtration and Washing Processes / 366

- 19.3 Particle Concentration and Separation Processes / 374
- Summary / 375
- Suggested Reading / 375
- Problems / 375
- Examples / 376

20. GRANULATION **378**

- 20.1 Direct Granulation / 378
- 20.2 Spray Drying / 382
- Summary / 390
- Suggested Reading / 390
- Problems / 390
- Examples / 391

VIII. FORMING **395**

21. GENERAL CERAMIC FORMING PRINCIPLES **397**

- 21.1 Powder-Forming Processes / 397
- 21.2 Industrial Forming Equipment / 404
- 21.3 Process Flow Charts / 405
- 21.4 Dimensional Control / 411
- Summary / 413
- Suggested Reading / 413
- Problems / 414
- Examples / 415

22. PRESSING **418**

- 22.1 Process Variables in Dry Pressing / 419
- 22.2 Powder Flow and Die Filling / 422
- 22.3 Compaction Behavior / 425
- 22.4 Ejection and Transfer / 434
- 22.5 Die Wall Effects and Pressure Transmission / 436
- 22.6 Control of Compact Defects / 440
- 22.7 Isostatic Compaction / 442
- 22.8 Combination Pressing / 444

- 22.9 Roll Pressing / 445
 - Summary / 445
 - Suggested Reading / 445
 - Problems / 446
 - Examples / 447

23. EXTRUSION AND PLASTIC DEFORMATION FORMING 450

- 23.1 Equipment and Material Variables in Extrusion / 451
- 23.2 Extrusion Mechanics / 457
- 23.3 Control of Extrusion Defects / 466
- 23.4 Jigging, Roller Tool Forming, and Plastic Transfer Pressing / 470
 - Summary / 472
 - Suggested Reading / 473
 - Problems / 473
 - Examples / 474

24. INJECTION MOLDING 477

- 24.1 Equipment and Material Variables in Injection Molding / 477
- 24.2 Mechanics of Flow / 482
- 24.3 Defects and Their Control / 485
- 24.4 Compression Molding and Roll Forming / 487
 - Summary / 488
 - Suggested Reading / 488
 - Problems / 489
 - Examples / 489

25. DRAIN CASTING AND SOLID CASTING 492

- 25.1 Slip Casting Practice and Mechanics / 493
- 25.2 Pressure Casting, Slurry Pressing, Vacuum Casting, and Centrifugal Casting / 503
- 25.3 Porous Mold Materials / 507
- 25.4 Slip Casting Problems and Controls / 509
- 25.5 Gel Casting / 514
- 25.6 Casting Concrete / 515
- 25.7 Other Casting Techniques / 516

25.8 Control of Defects in Casts / 518

Summary / 521

Suggested Reading / 521

Problems / 522

Examples / 523

26. TAPE CASTING

525

26.1 Tape Casting Process / 525

26.2 Shaping and Laminating / 534

26.3 Defects in Tape and Laminates / 537

Summary / 538

Suggested Reading / 539

Problems / 539

Examples / 540

IX. POSTFORMING PROCESSES

543

27. DRYING

545

27.1 Drying Systems / 545

27.2 Mechanisms in Drying / 547

27.3 The Drying Process / 549

27.4 Drying Shrinkage and Defects / 551

27.5 Modes of Drying / 554

Summary / 557

Suggested Reading / 558

Problems / 558

Examples / 559

28. VAPOR DEPOSITION, PRINTING, AND COATING PROCESSES

562

28.1 Thin Film Printing and Coating by Vapor
Deposition / 562

28.2 Thick Film Printing / 566

28.3 Coating Processes / 571

28.4 Defects in Thick Films and Coatings / 578

Summary / 580

Suggested Reading / 580

Problems / 581

Examples / 582

29. FIRING 583

- 29.1 Firing Systems / 583
- 29.2 Presintering Processes / 588
- 29.3 Solid-State Sintering / 594
- 29.4 Sintering of Glass Particles / 606
- 29.5 Sintering in the Presence of a Small Amount of a Wetting Liquid / 608
- 29.6 Sintering of Whiteware Bodies (Vitrification) / 609
- 29.7 Sintering of Glazes and Glassy Thick Films / 612
- 29.8 Cooling / 615
- 29.9 Hot Pressing / 617
 - Summary / 617
 - Suggested Reading / 618
 - Problems / 619
 - Examples / 621

30. MACHINING AND FINISHING PROCESSES 625

- 30.1 Cutting, Trimming, and Smoothing / 626
- 30.2 Machining Fundamentals / 626
- 30.3 Green Machining / 628
- 30.4 Hard Machining / 630
- 30.5 Lapping / 633
 - Summary / 635
 - Suggested Reading / 636
 - Problems / 636
 - Examples / 637
