TORSTEN HÄGERSTRAND

INNOVATION DIFFUSION AS A SPATIAL PROCESS

Postscript and translation by Allan Pred Translated with the assistance of Greta Haag

THE UNIVERSITY OF CHICAGO PRESS CHICAGO AND LONDON

.

CONTENTS

I.	Problem	and Methodology	1
	1. The	Systematic Study of the Distributional Changes of	
	Culti	Iral Elements	1
	1.1.	General Framing of the Problem	1
	1.2.	Scope of the Problem	5
	1.3.	The Spatial Viewpoint	6
	2. The	Concept of Distribution	7
	2.1.	Physical and Social Distributions	7
	2.2.	Social Group Distribution	8
	2.3.	The Social Distribution as a Basis for Combining Elements	9
	2.4.	Social Distributions and the Study of Distributional Changes	
		Normally Regarded as Highly Dissimilar	10
X	3. The 1	Indicators	11
	3.1.	The Choice of Indicators	11
	3.2.	Characteristics of the Indicators	12
	3.3.	Complementary Elements	13
	4. Selec	tion of the Study Area	14
	4.1.	General Considerations	14
	4.2.	Southern Östergötland	15
	5. Carte	pgraphic Methods	16
	5.1.	The Base Map'	16
	5.2.	Coordination of the Land-Use Map and the Housing Census	17
	5.3.	Coordination of the Housing Census with the Agricultural	
		Census and Other Source Materials	19
	5.4.	The Isarithmic Maps	19
	5.5.	Areal Units	20
	5.6.	Isarithmic Intervals	24
	5.7.	Interpolation	24
II.	The Stud	y Area's Conversion Bases	28
	6. <i>Popu</i>	lation	28
	6.1.	Population Density	28
	6.2.	Occupational Structure	32
	7. Culti	vated Holdings	33
	7.1.	Size-Groups	33
	7.2.	The Mix of Size-Groups	37
	7.3.	The Grouping of Cultivation Centers	39
	8. Dwe	lling Units	42
	8.1.	Building vs. Dwelling Units	42
	8.2.	Summary Classification of Dwelling Units	44
