**Introduction: The Jogger’s Dilemma or What Should We do When the Safe and the Dangerous are Inextricably Intertwined?** 1

Objective Risk 2

The Principle of Uncertainty, the Axiom of Connectedness, and the Rule of Sacrifice 4

Rival Strategies for Securing Safety 6

Diverse Arenas for Studying Risk 10

General and Global Resources 13

### SECTION I: STRATEGIES

1. Trial and Error Versus Trial Without Error 17

   No Trials Without Prior Guarantees Against Error 19

   The No-Safe-Dose Argument 23

   Incrementalism as Risk Aversion 25

   Incrementalism as Trial With Small Errors 26

   Playing It Safe 27

   Safety Comes from Use 30

   “Trial Without Error” as Public Policy 34

   A Question of Proportion 36

2. Opportunity Benefits Versus Opportunity Risks 39

   Why Aren’t We All Dead? Incrementalism and the Importance of Connectedness 40

   Opportunity Benefits and Natural Disaster 42

   Safety Risks: Seeking Safety May Increase Danger 48

   Risky Safety: Accepting Risks May Increase Safety 50

   Net Benefit 54

   Reprise 57

3. Richer is Sicker Versus Richer is Safer 59

   Health and Wealth 61

   Poorer is Unhealthier 65

   Medical Care Versus Income 66

   The “Hidden Hand” in Safety 69

   Preventing Parts from Exploiting Wholes 72

   Competition Increases Safety 74
4. Anticipation Versus Resilience

Resilience
Is Prevention Better than Alleviation?
The Reverse Cassandra Rule
Interrogating the Unknown
A Mental Experiment
Lovins Versus Lovins: Are Resilience and Efficiency Opposed?
The Distributional Question

SECTION II: CONDITIONS

5. Nonhuman Life Forms Cope with Danger

Principles of Stability
Anticipation Versus Resilience in Nonhuman Life Forms
Conditions of Applicability

6. Does Adding Safety Devices Increase Safety in Nuclear Power Plants? (with Elizabeth Nichols, and an appendix by Robert Budnitz)

Do More Safety Devices Add Up to More Safety?
The Parts Versus the Whole
The Nuclear Island
System Interaction
Toward Performance Standards (by Robert Budnitz)
Pressure to be Perfect

7. The Battle Within: How the Human Body Defends Itself (with Dennis Coyle)

The Risks
Goals and Strategies
Defense Mechanisms: Taking the Offensive
Pulling Up the Drawbridge
The Battle Within
Recovery Through Growth
Holes in the Armor
Diversity of Form and Redundancy of Function
Plasticity, Flux, and Feedback
Anticipation and Resilience in the Human Body

8. From Resilience to Anticipation: Why the Tort Law is Unsafe (with Daniel Polisar)

A Brief History of American Tort Law
From Negligence to Strict Liability
Planning to Fail: The Crashworthiness Doctrine
From Contributory Negligence to Deep Pockets
Insurance, Anticipation, and Safety 181
Regulation 182
Safety Consequences 183

SECTION III: PRINCIPLES

9. Why Less is More: A Taxonomy of Error
(with William R. Havender) 189

- Ignoring Opportunity Benefits 191
- Ignoring the Risks Associated With a Proposed Remedy 195
- Ignoring Large Existing Benefits While Concentrating on Small Existing Risks 197
- Ignoring the Effects of Economic Costs on Safety 198
- Ignoring the Inevitable Tradeoff Between Type I (Errors of Commission) and Type II (Errors of Omission) 199

10. The Secret of Safety Lies in Danger 205

- Safety is a Balancing Act 207
- Safety Degrades, or, The Godfather Knows Best 209
- Health is Not the Only Kind of Safety 212
- But What About the Future? 213
- Rights or Special Interests 217
- Anticipation Versus Resilience Redux 220
- Discovering Safety 221
- The Politics of Anticipation 223
- The Fear of Regret 225
- Searching Versus Scooping: Safety as a Process of Discovery 227

Notes 229
