MACMILLAN

# Contents

Foreword	vii
Acknowledgments	xi
Introduction	xiii
 I. APPLICATIONS OF CORE THEORY TO MARKET EXCHANGE	 3
1. Introduction	3
2. Consumer Surplus and Transferable Utility	4
3. Some Simple Trading Situations	11
4. $m$ Owners and $n$ Nonowners	19
5. The Basic Core Constraints	28
6. Market Efficiency and Honest Brokers	31
7. Multiunit Trade	37
8. Increasing Returns and Public Goods from the Viewpoint of the Core	48
9. A Brief Historical Note	57
Appendix: Consumer Surplus	62
 II. FURTHER APPLICATIONS OF CORE THEORY TO MARKET EXCHANGE	 68
1. Introduction	68
2. Balanced Collections of Coalitions	70
3. Empty Cores	78
4. The Feasibility of Trade	88
5. Group Rationality with Multiunit Trade	94
6. Competition and Numbers	104
7. The Number of Traders and the Emptiness of the Core	108
8. Conclusions	117
 III. APPLICATIONS OF THE CORE TO OLIGOPOLY	 119
1. Introduction	119
2. Properties of the Core under Constant Returns	124
3. The Cournot-Nash Theory of Duopoly for Finite Horizons	131
4. The Cournot-Nash Theory of Duopoly for Infinite Horizons	142

IV. THEORIES OF EXPECTATIONS FOR $N$ COMPETING FIRMS	146
1. Introduction	146
2. Expectation Models with Quantity as the Policy Variable	149
3. Expectation Models for Price as the Policy Variable	164
4. Summary	172
V. COMPETITION OR COLLUSION?	175
1. Introduction	175
2. The Nature of Competition and Collusion	176
3. Equilibrium with Product Variety Illustrated for Spatial Competition	184
4. The Costs of Maintaining Collusion	192
5. Sharing the Collusive Return	206
VI. THE MONOPOLY AND COURNOT-NASH EQUILIBRIA UNDER DYNAMIC CONDITIONS	218
1. Introduction	218
2. Dynamic Demand Relations	221
3. Some Fundamentals on Optimal Policies	226
4. The Solvability of Certain Linear Equations	242
5. Properties of the Cooperative and Noncooperative Dynamic Equilibria	250
6. Conclusions	272
VII. ESTIMATES OF DEMAND, PRICE POLICY, AND THE RATIO OF PRICE TO MARGINAL COST BY BRAND FOR SELECTED CONSUMER GOODS	274
1. Introduction	274
2. Estimates of the Demand Relation between Market Share and Prices	283
3. Estimates of the Relations among Competing Prices	294
4. Competition in a New Product	299
5. Conclusions	305
VIII. SOME DETERMINANTS OF THE RETURNS TO MANUFACTURING INDUSTRIES	312
1. Introduction	312
2. Description of the Data and Some Simple Summary Statistics	316
3. Multiple Regression Analysis of the Census Data	324
4. An Analysis of Employment Turnover in Selected Manufacturing Industries	339
5. A Brief Survey of Findings by Other Investigators	352
6. Conclusions	356
Appendix 1: Estimation of Payrolls, Annual Earnings, and Employment of Nonproduction Workers	357
Appendix 2: Description of the Samples	359
Appendix 3: The Two-Digit Industry Effects	361
Appendix 4: The Relative Size Distribution of Firms	363
References	367
Name Index	371
Subject Index	372
