

the hedonistic neuron

a theory of memory,
learning,
and intelligence

A. Harry Klopff

contents

Preface	xi
Acknowledgments	xv
Abbreviations	xvii
Chapter 1	
HETEROSTASIS	1
Introduction	1
Assumptions: Past, Present, and Proposed	5
Heterostasis: A Maximal Condition	9
Conclusions: Implications of a Heterostatic Theory	11
Chapter 2	
NEUROPHYSIOLOGY	17
The Neuronal Model	17
Neuronal Heterostasis	17
Adaptation	21
Properties of the Model	26
Experimental Evidence	28
Neuronal and Cortical Polarization	29
Epileptic Foci and the Mirror Focus	32
Modifiability of Synapses	34
Experimental Tests	35

Variations of the Heterostatic Model	35
Synaptic Transmittance Increases Only	36
Synaptic Transmittance Decreases Only	38
Excitatory or Inhibitory Synapse Variations Only	38
Adaptation in Only Excitatory or Inhibitory Neurons	39

Chapter 3

PSYCHOLOGY 41

Learning	41
Habituation	41
Dishabituation	43
Classical Conditioning	45
Operant Conditioning	47
Extinction	48
The Mind-Body Problem	49
Animals Are Heterostats	49
An Identity Theory	49
Defining Consciousness	51
Localization of Consciousness	51
Quantitative Aspects of Mental Phenomena	58
The Φ of $\Phi - \Psi$	60
Global Organization of the Brain	63
The Reticular Formation	63
The Limbic System and Hypothalamus	64
The Neocortex	69
Vector Specification of the Brain State	74
Some Further Observations	75
Memory and Learning	75
Pleasure and Pain	77
Sleep and Dreaming	81
Nature of Man	86
Epistemology	88

Chapter 4

CYBERNETICS 91

Adaptive Networks	92
Artificial Intelligence	97
A Substrate for Intelligence	98
The Role of Learning	100
Knowledge Bases	102

The Nature of Intelligence	103
Implications of the Mind-Body Problem	105
Summary	106
A Basic Building Block	108
Future Research	109
Chapter 5	
CONCLUDING REMARKS	111
Comparing Social Systems with Nervous Systems	113
Restructuring Social Systems	115
Summary	117
References	119
Author Index	133
Subject Index	137
