

Leena Suhl

# Computer-Aided Scheduling

An Airline Perspective

With a Foreword  
by Prof. Dr. Uwe Pape

**DeutscherUniversitätsVerlag**

# Table of Contents

|  |           |
|--|-----------|
| <b>INTRODUCTION</b>  | <b>1</b>  |
| <b>1 AIRLINE PLANNING AND SCHEDULING</b>                                       | <b>3</b>  |
| <b>1.1 Production and Market of Airline Industry</b>                           | <b>3</b>  |
| 1.1.1 International Air Traffic  | 3         |
| 1.1.2 The Product of a Scheduled Airline                                       | 4         |
| 1.1.3 The Role of Information and Communication Technology in Airlines         | 6         |
| <b>1.2 The Airline Scheduling Process</b>                                      | <b>7</b>  |
| 1.2.1 Types of Airline Schedules   | 7         |
| 1.2.2 Steps of the Airline Scheduling Process                                  | 8         |
| 1.2.3 Organizations of Airline Scheduling                                      | 10        |
| <b>1.3 Airline Product Planning</b>  | <b>13</b> |
| 1.3.1 Block and Ground Time Estimation   | 13        |
| 1.3.2 Demand Estimation  | 13        |
| 1.3.3 Network Planning   | 17        |
| 1.3.4 Capacity Planning  | 18        |
| <b>1.4 Fleet Assignment</b>  | <b>20</b> |
| <b>1.5 Flight Scheduling and Aircraft Routing</b>                              | <b>23</b> |
| 1.5.1 Phases in Solving the Routing and Scheduling Problem                     | 23        |
| 1.5.2 Aircraft Maintenance Scheduling  | 24        |
| 1.5.3 Schedule Construction and Evaluation                                     | 24        |
| 1.5.4 Physical Aircraft Assignment   | 26        |
| <b>1.6 Crew Scheduling</b>   | <b>26</b> |
| 1.6.1 The Crew Scheduling Problem  | 26        |
| 1.6.2 Types of Crew Work Rules   | 28        |
| 1.6.3 Basis for Crew Costs   | 30        |
| 1.6.4 „European“ and „American“ Crew Management                                | 31        |
| 1.6.5 Solving the Crew Scheduling Problem                                      | 32        |
| <b>1.7 Airport Activities Scheduling</b>                                       | <b>33</b> |
| 1.7.1 Flight Handling at an Airport  | 33        |
| 1.7.2 Gate Assignment  | 33        |
| <b>1.8 Execution-time Rescheduling</b>   | <b>35</b> |
| <b>1.9 Yield Management</b>  | <b>36</b> |
| <b>2 MODELS AND SYSTEMS FOR AIRLINE PRODUCTION PLANNING (STATE-OF-THE-ART)</b> | <b>41</b> |
| <b>2.1 Models for Network Planning and Demand Estimation</b>                   | <b>41</b> |
| 2.1.1 The Traditional Approach   | 41        |
| 2.1.2 Model Design Objectives  | 42        |
| 2.1.3 Common Framework for Network Planning Models                             | 42        |
| 2.1.4 Building Hubs in a Hub-and-spoke Network                                 | 46        |

|   |            |
|---|------------|
| <b>2.2 Systems for Fleet Assignment and Routing</b>                             | <b>48</b>  |
| 2.2.1 The Fleet Assignment Problem  | 48         |
| 2.2.2 The System FLASH - Fleet Assignment Handling                              | 49         |
| 2.2.3 Fleet Assignment with Integer Programming                                 | 51         |
| 2.2.4 The Original Model Formulation  | 54         |
| 2.2.5 The Delta Airlines' Coldstart System                                      | 58         |
| 2.2.6 Simulation of Flight Schedules  | 62         |
| <b>2.3 Set Partitioning Problems in Crew Scheduling</b>                         | <b>63</b>  |
| <b>2.4 Methods to Solve Set Partitioning Problems</b>                           | <b>67</b>  |
| 2.4.1 General Algorithms  | 67         |
| 2.4.2 The Crew Assignment System TRIP   | 69         |
| 2.4.3 Crew Scheduling Based on the GENCOL Software                              | 73         |
| <b>2.5 Other Approaches in Crew Scheduling</b>                                  | <b>74</b>  |
| 2.5.1 Knowledge-based Systems in Crew Rostering                                 | 74         |
| 2.5.2 Heuristic Methods in Crew Scheduling                                      | 78         |
| <b>2.6 The Bidline Generation Problem</b>                                       | <b>80</b>  |
| <b>2.7 Gate Assignment Systems</b>  | <b>83</b>  |
| 2.7.1 Mathematical Optimization Models in Gate Assignment                       | 83         |
| 2.7.2 Knowledge-based Systems for Gate Assignment                               | 83         |
| 2.7.3 Knowledge-based Systems for Flight Handling                               | 86         |
| <b>2.8 Dynamic Slot Allocation</b>  | <b>87</b>  |
| <b>2.9 Improving Airline Competitiveness</b>                                    | <b>92</b>  |
| 2.9.1 Competitive Advantages Achieved by Computer-aided Planning and Scheduling | 93         |
| 2.9.2 Choosing the right solution   | 94         |
| <b>3 THE ROTATION GENERATION PROCESS</b>  | <b>97</b>  |
| <b>3.1 Problem Description</b>  | <b>97</b>  |
| <b>3.2 Optimal Aircraft Routing with Fixed Departure Times</b>                  | <b>99</b>  |
| <b>3.3 The Aircraft Routing Problem with Time Windows</b>                       | <b>106</b> |
| <b>3.4 A Method for Aircraft Routing and Scheduling</b>                         | <b>108</b> |
| <b>3.5 New Methods for Aircraft Routing and Scheduling</b>                      | <b>112</b> |
| <b>3.6 Optimal Aircraft Routing with Time Windows</b>                           | <b>124</b> |
| 3.6.1 Fundamentals of Decision-making with Mathematical Programming             | 124        |
| 3.6.2 The Optimizer MOPS  | 127        |
| 3.6.3 Decision Support Systems Based on Mathematical Programming                | 128        |
| 3.6.4 Optimal Aircraft routing with Mixed-integer Programming                   | 129        |
| <b>3.7 Incremental Scheduling</b>   | <b>132</b> |
| <b>3.8 Schedule Simulation</b>  | <b>133</b> |
| 3.8.1 Phases of a Simulation Procedure  | 133        |
| 3.8.2 Discrete System Simulation  | 135        |
| 3.8.3 Simulation of a Flight Schedule   | 136        |

|   |            |
|---|------------|
| <b>4 SCHEDULING AS PROCESS-ORIENTED DECISION-MAKING</b>         | <b>139</b> |
| 4.1 Components of a Scheduling Problem                          | 139        |
| 4.2 Framework for Decision-making                               | 141        |
| 4.3 Views of Decision-making                                    | 144        |
| 4.3.1 Framework for Aspects of Decision-making                  | 144        |
| 4.4 Process-oriented Decision-making                            | 150        |
| 4.4.1 A Framework for Process-oriented Decision-making          | 150        |
| 4.4.2 Scheduling as a Process                                   | 154        |
| 4.5 Requirements for a Scheduling Support System                | 155        |
| 4.5.1 The Nature of Scheduling Support                          | 155        |
| 4.6 Architecture of a Scheduling Support System                 | 159        |
| 4.6.1 Concepts of Problem, Model and Method                     | 159        |
| 4.7 Modeling Paradigms for Computer-aided Scheduling            | 164        |
| <b>5 CONCEPT OF A SCHEDULING WORKBENCH</b>                      | <b>167</b> |
| 5.1 System Architecture   | 167        |
| 5.2 The Problem-definition Component                            | 172        |
| 5.3 Problem and Schedule Management                             | 175        |
| 5.4 Algorithmic Scheduling                                      | 180        |
| 5.5 Incremental Scheduling                                      | 184        |
| 5.6 The Knowledge Base  | 190        |
| 5.7 Schedule Simulation   | 194        |
| 5.8 Graphical Representation of Schedules                       | 196        |
| 5.9 Implementations of the Workbench Concept                    | 196        |
| 5.9.1 General Implementation Trends                             | 196        |
| 5.9.2 QuickScheduler  | 198        |
| 5.9.3 Group Scheduling Assistant                                | 198        |
| 5.9.4 Lufthansa Flight Scheduling Workbench                     | 199        |
| 5.9.5 MIT Airline Scheduling Workstation                        | 200        |
| <b>6 COOPERATIVE AIRLINE SCHEDULING</b>                         | <b>201</b> |
| 6.1 Organization of Distributed Scheduling                      | 201        |
| 6.1.1 Applications of Distributed Scheduling in Airlines        | 201        |
| 6.1.2 Process of Schedule Construction                          | 202        |
| 6.1.3 The Negotiation Process                                   | 204        |
| 6.1.4 Organization of Group Scheduling                          | 204        |
| 6.2 Approaches to Computer Supported Cooperative Scheduling     | 208        |
| 6.2.1 Scheduling Process as Computer Supported Cooperative Work | 208        |
| 6.2.2 Techniques in Group Decision Support Systems              | 211        |
| 6.2.3 Planning Methods in Distributed Artificial Intelligence   | 215        |

|  |            |
|--|------------|
| 6.2.4 Comparison of Approaches to Scheduling     | 220        |
| <b>6.3 The System Group Scheduling Assistant</b> | <b>221</b> |
| 6.3.1 Goals and Environment                      | 221        |
| 6.3.2 System Architecture                        | 222        |
| 6.3.3 Negotiation Processes                      | 224        |
| <b>7 CONCLUSIONS</b>                             | <b>229</b> |
| <b>8 LITERATURE</b>                              | <b>231</b> |
| <b>APPENDIX: GLOSSARY</b>                        | <b>247</b> |
