## Contents

Preface iii

1. Introduction 1

   References 3

2. Relation Between Zeolite Structure and Its Catalytic Activity 5

   I. Zeolites 7
   II. Pore/Channel Systems 8
       A. 8-Membered Oxygen Ring Systems 8
       B. 10-Membered Oxygen Ring Systems 12
       C. Dual Pore Systems 14
   III. Structural Features of Medium Pore Zeolites 15
   IV. The Quantitation of Acidic Framework Aluminum Sites in Medium-Pore Hydrogen Zeolites 18
   V. Distribution and Location of Acid Sites 25
   VI. Structural Effect on Acid Sites 27
       A. Constraint Index 27
       B. Para-Selectivity 29
   VII. Enhanced Acid Sites 30
   VIII. Acid Sites in Isomorphous Substituted Zeolites 31

References vii
3. Principal Methods of Achieving Molecular Shape Selectivity 39
   I. Size Exclusion 41
   II. Coulombic Field Effects 46
   III. Configurational Diffusion 51
   IV. Spatiospecificity, or Transition State Selectivity 58
   V. Traffic Control 61
   References 61

4. Shape Selective Acid Catalysis 65
   I. Reactants of Interest 67
   II. Reactions Catalyzed by Medium Pore Zeolites 67
      A. Olefin Reactions 67
      B. Paraffin Reactions 82
      C. Reactions of Aromatic Compounds 90
      D. Naphthene Reactions 114
      E. Reactions of Oxygen-Containing Compounds 117
      F. Reactions of Nitrogen-Containing Compounds 141
      G. Reactions of Other Non-Hydrocarbons 145
      H. Acid-Catalyzed Hydrogenation Activity 146
      References 147

5. Applications in Petroleum Processing 155
   I. Octane Boosting 157
      A. Reforming of Naphthas 157
      B. Post-Reforming of Reformates 158
   II. Catalytic Cracking of Gas Oils 173
   III. Dewaxing of Distillate Fuels and Lube Basestocks 175
      A. Mobil Distillate Dewaxing Process (MDDW) 175
      B. Jet Fuel Dewaxing 186
      C. Mobil Lube Dewaxing Process (MLDW) 191
      D. Other Catalytic Dewaxing Processes 194
   IV. Distillate From Light Olefins (MOGD) 195
   References 198

6. Applications in Aromatics Processing 203
   I. BTX Synthesis 205
      A. M2-Forming 205
      B. Xylene Isomerization (MVPI) 207
Contents ix

C. Xylene Synthesis (Mobil Toluene Disproportionation Process) 212

II. Ethylbenzene and Paraethyltoluene 214
   A. Ethylbenzene Synthesis (Mobil/Badger EB Process) 214
   B. Para-Ethyltoluene Synthesis (PET) 215
   References 217

7. Applications in Alternate Fuels and Light Olefins 219
   I. Methanol to Gasoline (MTG) 221
      A. Commercial Fixed-Bed Plant 222
      B. Fluid-Bed Development 225
   II. Methanol to Light Olefins (MTO) 233
   III. Synthesis Gas Conversion 238
      A. Composite Catalysts for Direct Synthesis Gas Conversion 238
      B. Mobil Two-Stage Slurry Fischer-Tropsch/ZSM-5 Process 239
   References 247

8. New Opportunities in Shape Selective Catalysis 251
   I. Upgrading Waxy Crudes 253
   II. Upgrading Shale Oils 254
   III. Dewaxing Hydrogen Donor Solvent for Coal Liquefaction 257
   IV. Converting Natural Gas to Liquid Hydrocarbons 257
   V. Pre-Engine Converter 259
   VI. Liquid Fuel from Biomass 261
      A. Direct Conversion of Carbohydrates 261
      B. Biomass Pyrolysis 264
   VII. Applications in Other Industries 265
      A. Fermentation 265
      B. Chemicals 265
      C. Polymer Waste Recovery 266
   References 267

9. Conclusions 273
