Table of Contents

ACHIEVEMENTS AND ISSUES IN THE PHYSICS OF INJECTION LASERS	1
N.G. Basov, P.G. Eliseev, Yu. M. Popov	
1. New Heterostructures	4
2. Laser Heterostructures with an Ultrathin Active Layer	6
3. Quantum Dimensional Effects	7
4. Increasing the Emission Power of Injection Lasers	9
5. Compound Resonators	11
Bibliography	13
PHENOMENA IN SEMICONDUCTOR LASERS ASSOCIATED WITH NON-LINEAR REFRACTION AND THE INFLUENCE OF CURRENT CARRIERS ON THE REFRACTIVE INDEX	19
P.G. Eliseev, A.P. Bogatov	
1. Introduction	19
2. Resonant Nonlinear Refraction in Semiconductors	20
3. The Influence of Carriers on the Refractive Index	21
4. Optical Bistability and Other Phenomena in Nonlinear Resonators	25
5. Nonlinear Refraction in Photoelectric Absorption and Optical Amplification	28
6. Self Focusing and its Influence on the Optical Structure in Semiconductor Lasers	30
7. Single Dimensional Self-Focusing in an Injection Laser	34
8. Nonlinear Optical Losses in Weak and Asymmetric Active Waveguides	36
9. Bistable Conditions in Lasers with an External Resonator and in a Resonance Amplifier	42
10. C ³ -Lasers and Other Coupled Cavity Designs	45
11. Frequency Self-Modulation and Modulation	50
12. Nonlinear Scattering by Electron Density Waves and Asymmetric Mode Interaction	52
13. The Autostabilization Effect of Single-Frequency Emission	57
14. Conclusion	59
Bibliography	59
MODE INTERACTION AND AUTOSTABILIZATION OF SINGLE-FREQUENCY LASING IN INJECTION LASERS	70
A.P. Bogatov, P.G. Eliseev, O.G. Okhotnikov, M.P. Rakhval'skiy, K.A. Khayretdinov	
1. Introduction	70
2. Theoretical Analysis	72
3. Experiment	85
4. Discussion	88
Bibliography	89
ANALYSIS OF A LASER DIODE AMPLIFIER	91
A.P. Bogatov	
1. Introduction	91
2. Modeling of the Traveling Wave Amplifier	92
3. Linear Amplification	95
4. Amplification Saturation. Phase Self-Modulation	97
Bibliography	100
AN OPTICAL TRAVELING WAVE AMPLIFIER	102
A.P. Bogatov, P.G. Eliseev, O.G. Okhotnikov, M.P. Rakhval'skiy, K.A. Khayretdinov	
1. Introduction	102
2. Experimental Assembly	104
3. Gain	107
4. Saturation Power	109
5. Amplifier Spontaneous Noise	111
6. Spectrally-Matched Modulation of Emission from an Injection Laser in a Traveling Wave Amplifier	116
Bibliography	121

**AN INVESTIGATION OF THE DYNAMICS OF STRIPE LASERS:
SELF-MODULATION, NONLINEAR LOSSES, MODE "CHIRPING"**

Yu. M. Popov, I.A. Skopin

123

1. Introduction. A Brief Survey on the Dynamics of Injection Lasers	123
2. Laser Diode Samples for Research	130
3. An Experimental Set-Up and Measurement Method for Measuring Radiative Characteristics of Injection Lasers	138
4. A Comparative Investigation of the Laser Dynamics of Injection Lasers	140
5. An Investigation of the Spectral Composition of Emission from GaAlAs/GaAs and InGaAsP/InP Injection Lasers	144
6. Frequency Self-Modulation of Emission in Injection Lasers and the Laser Limit Cycle	146
7. A Phenomenological Model of the Nonlinear Volt-Current Characteristic of an Injection Laser	150
8. The Stability Criterion for Steady-State Lasing in an Injection Laser	153
9. The Action of Nonlinear Losses in the Active Region of an Injection Laser on Self-Modulation Emission Pulsation Zones	155
10. An Analysis of Possible Excitation Mechanisms of Spiking in Injection Lasers	158
11. Conclusion	162
Bibliography	163

**MODES AND MODE CONVERSION IN
ACTIVE SEMICONDUCTOR WAVEGUIDES**

Yu. M. Popov, I.A. Skopin

169

Introduction	170
1. An Equation for Emission Propagation in a Lengthwise Inhomogeneous Heterolaser and Schrodinger's Equation	172
2. The Epstein Model and the Reduced Width Parameter of an Active Waveguide	176
3. The Influence of the Active Waveguide Parameters on Emission Distribution in the Far Field	178
4. The Inverse Problem. Determining the Parameters of an Active Waveguide from an Experimentally Observed Electromagnetic Field Distribution	184
5. A Discussion of the Nonlinearities and Anomalies in Stripe Heterolasers without Lateral Optical Confinement	185
6. Experimental Evidence of the Longitudinal Inhomogeneity of a Heterolaser and an Analog of the Franck-Condon Principle	187
7. An Analog of the Ramsauer Effect for a Lengthwise-Inhomogeneous Heterolaser	193
Conclusion	202
Bibliography	203

**INVESTIGATION OF THE WAVEFRONT OF PLANAR STRIPE
GaAlAs/GaAs-HETEROLASERS**

M.A. Man'ko, B.I. Makhsudov, Fam Van Khoy

208

Introduction	208
1. Methodological Issues	210
2. Experimental Measurement of Wavefronts of Planar Stripe GaAlAs/GaAs-Heterolasers and Wavefront Variations with Pumping Current	213
3. A Comparison of Experimental Data to a Theoretical Model with Continuous Variation in the Complex Dielectric Constant in the Form of an Epstein Layer	216
Conclusion	220
Bibliography	220

**INVESTIGATION OF THE SPECTRAL AND SPATIAL CHARACTERISTICS
OF NARROW MESA-STRIFE CONTACT HETEROLASERS**

Yu. L. Bessonov, N.B. Kornilova, V.D. Kurnosov, M.A. Man'ko, V.N. Morozov,
Chan Min'Tkhai, Fam Van Khoy, V.R. Shidlovskiy

224

Introduction	224
1. Methodological Issues	225
2. The Spatial Characteristics of Heterolasers with a Variable Width of the Mesa-Stripe Contact	228
3. Spectral Characteristics of Variable Stripe Contact Width Injection Lasers	231
4. Discussion and Conclusions	233
Bibliography	233

**VOLTAGE SATURATION ACROSS THE INJECTION CONTACT IN A LASER
DIODE AND THE PHENOMENON OF NEGATIVE PHOTO-EMF**

236

Vu Van Lyk, P.G. Eliseev, M.A. Man'ko, G.T. Mikaelyan, O.G. Okhotnikov, G.T. Pak

Introduction

1. The Voltage Saturation Effect Across the Injection Contact and Attendant Phenomena	236
2. An Analysis of a Homogeneous Model	240
3. Threshold Effect Accounting for Modulation of the Cubic Resistance of the Semiconductor	245
4. The Photoresponse of an Optical Amplifier	250
5. A Quasistatic Signal in a Laser with an External Cavity with Mirror Motion on	252
6. Experimental Investigation of the Incremental (Differential) Resistance of Lasers, Including Cleaved Coupled Cavity Lasers	254
7. Experimental Investigation of the Possibility of Electrical Diagnostics of Laser Diode Operating Conditions	259
Conclusion	272
Bibliography	273
