Springer-Verlag

Berlin Heidelberg New York London Paris Tokyo

## C O N T E N T S

Chapter 1

## **INTRODUCTION . . . . .**

1.1	Database Processing and Conventional Computers	.	.	1			
1.2	The Early Database Machines	.	.	.	.	.	2
1.3	Multiprocessor Architectures	.	.	.	.	.	5
1.4	Functional Decomposition	.	.	.	.	.	7
1.5	Hardware Filters	.	.	.	.	.	10
1.6	Current Trends	.	.	.	.	.	11
1.7	The Performance Evaluation Issue	.	.	.	.	.	12

Chapter 2

## EVALUATION CRITERIA AND PERFORMANCE INDEXES . . . . . 18

F. Cesarin, F. Pippolini, G. Soda

2.1	Introduction . . . . .	18
2.2	Aspects of Performance Evaluation . . . . .	18
2.3	Data Base Machine Analysis . . . . .	21
2.4	Performance Indexes . . . . .	22
2.5	Static Execution Cost . . . . .	23
2.6	Execution Time . . . . .	25
2.7	Response Time . . . . .	27
2.8	Throughput . . . . .	28
2.9	Utilization . . . . .	29
2.10	Some Remarks . . . . .	30

Chapter 3

## **MODELING AND MEASURING METHODOLOGIES**

3.3 Queueing Networks and Stochastic Models . . . . .	38
3.4 Simulation Models . . . . .	41
3.5 Benchmarking . . . . .	43
<b>Chapter 4</b>	
<b>DATABASE WORKLOAD MODELING</b> . . . . .	50
S. Salza, M. Terranova	
4.1 Introduction . . . . .	50
4.2 Statical and Dynamical Workload . . . . .	52
4.3 Statistical Assumptions . . . . .	55
4.4 The Distribution of the Multiplicity . . . . .	57
4.5 The Transformations of the Originality . . . . .	59
4.6 The Transformations of the Parameters . . . . .	65
4.7 Transaction Execution Cost . . . . .	74
4.8 Schema Transformations . . . . .	79
4.9 A Sample Case Analysis . . . . .	82
4.10 Workload Profiles . . . . .	87
4.11 Conclusions . . . . .	92
<b>Chapter 5</b>	
<b>A PROCEDURAL STRATEGY FOR DATA BASE MACHINE ANALYSIS</b> . . . . .	95
F. Cesarini, F. Pippolini, G. Soda	
5.1 Introduction . . . . .	95
5.2 Detail Levels of Analysis . . . . .	96
5.3 Global Analysis of Database Machines . . . . .	98
5.4 A Proposal for a Procedural Policy for Database Machine Analysis . . . . .	101
5.5 Overall Flow Analysis . . . . .	103
5.6 Block Description . . . . .	103
5.7 Static Workload . . . . .	106
5.8 Dynamic Workload . . . . .	108
5.9 Resource Management . . . . .	112
5.10 Performance Evaluation . . . . .	114
5.11 An Example of Performance Evaluation . . . . .	115
5.12 Concluding Remarks . . . . .	126

**Chapter 6**

<b>A PERFORMANCE STUDY ON HOST-BACKEND COMMUNICATIONS</b>	. . . . .	129
---	-----------	-----

M. Drawin, H. Schewpke

6.0 Abstract . . . . .	. . . . .	129
6.1 Introduction . . . . .	. . . . .	129
6.2 A Model of Queries and Query Processing . . . . .	. . . . .	131
6.3 The Simulation Model . . . . .	. . . . .	134
6.4 Experiments and Results . . . . .	. . . . .	136
6.5 Conclusions . . . . .	. . . . .	145

**Chapter 7**

<b>PERFORMANCE MODELING OF THE DBMAC ARCHITECTURE</b>	. . . . .	147
---	-----------	-----

S. Salza, M. Terranova, P. Velardi

7.0 Abstract . . . . .	. . . . .	147
7.1 Introduction . . . . .	. . . . .	147
7.2 The DBMAC System . . . . .	. . . . .	148
7.3 The DBMAC Performance Analysis . . . . .	. . . . .	151
7.4 Workload Representation . . . . .	. . . . .	151
7.5 Internal Analysis . . . . .	. . . . .	154
7.6 Device Utilisation and System Configuration . . . . .	. . . . .	159
7.7 Global Performance Analysis . . . . .	. . . . .	161
7.8 Conclusions . . . . .	. . . . .	164

**Chapter 8**

<b>ANALYSIS OF FILTERING EFFICIENCY IN THE DATABASE MACHINE VERSO</b>	. . . . .	166
---	-----------	-----

S. Gamerman, S. Salza, M. Scholl

8.0 Abstract . . . . .	. . . . .	166
8.1 Introduction . . . . .	. . . . .	166
8.2 The VERSO Architecture . . . . .	. . . . .	167
8.3 The Union Algorithm . . . . .	. . . . .	169
8.4 The Filter Utilization . . . . .	. . . . .	171
8.5 The Probabilistic Performance Model . . . . .	. . . . .	175
8.6 Discussion . . . . .	. . . . .	178
8.7 Summary . . . . .	. . . . .	182

<b>Chapter 9</b>	
<b>A TECHNIQUE FOR ANALYZING QUERY EXECUTION IN A MULTIPROCESSOR</b>	
<b>DATABASE MACHINE</b>	184
F. Cesarini, F. Pippolini, G. Soda	
9.0 Abstract . . . . .	184
9.1 Introduction . . . . .	184
9.2 Hardware and Software Capability of the DBM . . . . .	187
9.3 Query Execution Graphs . . . . .	190
9.4 Properties of Query Execution Graphs . . . . .	192
9.5 Execution Cost of Separable Graphs . . . . .	195
9.6 Processor Partition Criteria . . . . .	195
9.7 An Example . . . . .	197
9.8 Conclusions . . . . .	202
Appendix 9.1 Data Primitives . . . . .	202
Appendix 9.2 Sintax and Semantics of Definition Pseudographs . . . . .	203
Appendix 9.3 Definition Pseudographs . . . . .	205
<b>Chapter 10</b>	
<b>DATA BASE MACHINE DESIGN AND PERFORMANCE EVALUATION</b>	
<b>ANNOTATED BIBLIOGRAPHY</b> . . . . .	208
F. Cesarini, F. Pippolini, G. Soda	
10.1 Introduction . . . . .	208
10.2 Access Keys . . . . .	209
10.3 Annotated References . . . . .	211
