CONTENTS

Contributors xvii
Preface xxi

Part I Networks and Systems

Chapter 1. National Transportation Networks and Intermodal Systems *Michael S. Bronzini*

1.3

- 1.1 Introduction / 1.3
- 1.2 National Transportation Network Databases / 1.4
- 1.3 Examples of National Modal Networks / 1.7
- 1.4 Multimodal Networks and Intermodal Connectors / 1.11
- 1.5 Network Model Applications / 1.12

Chapter 2. Transport Network Planning: Theoretical Notions *Ben Immers, Bert Egeter, and Rob van Nes*

2.1

- 2.1 Introduction / 2.1
- 2.2 A Functional Classification of Transport Systems / 2.2
- 2.3 Key Characteristics of the Design Method / 2.2
- 2.4 Dilemmas Encountered in Designing a Transportation Network / 2.6
- 2.5 Feasibility of Design / 2.7
- 2.6 The Design Process / 2.7
- 2.7 Theoretical Background / 2.12
- 2.8 Application of the Design Method / 2.18
- 2.9 Evaluation of the Network Design / 2.29

Chapter 3. Transportation Systems Modeling and Evaluation *Andrew P. Tarko*

3.1

- 3.1 Introduction / 3.1
- 3.2 Types of Transportation Models and Modeling Paradigms / 3.2
- 3.3 Example Studies and Models / 3.5
- 3.4 What Are the Uses of Transportation Models? / 3.8
- 3.5 Selecting a Model / 3.10
- 3.6 Transportation Systems Evaluation / 3.13
- 3.7 Closure / 3.16

Chapter 4. Software Systems and Simulation for Transportation Applications *Elena Shenk Prassas* **4.1**

- 4.1 Computation versus Simulation / 4.1
- 4.2 Sensing Traffic by Virtual Detectors / 4.2
- 4.3 Traffic Software Systems / 4.3
- 4.4 Basics of Simulation / 4.4
- 4.5 Issues in Traffic Simulation / 4.7
- 4.6 Visualization / 4.10
- 4.7 FHWA Next Generation Simulation (*NGSIM*) Program / 4.13
- 4.8 Why Simulate? Advanced Traffic Control Systems, and Other / 4.13
- 4.9 Traffic Simulators / 4.15
- 4.10 Electronic Toll Collection and Smart Cards / 4.16
- 4.11 Planning Tools / 4.22
- 4.12 Resources for Further Information / 4.22

Chapter 5. Applications of GIS in Transportation *Gary S. Spring* **5.1**

- 5.1 Introduction / 5.1
- 5.2 Basic Principles of GIS-T / 5.2
- 5.3 GIS Applications in Transportation / 5.16
- 5.4 Implementation Issues / 5.21
- 5.5 Conclusions / 5.23

Part II Traffic, Streets, and Highways

Chapter 6. Traffic Engineering Analysis *Baher Abdulhai and Lina Kattan* **6.3**

- 6.1 Traffic Engineering Primer / 6.3
- 6.2 Traffic Stream Parameters and Their Measurement / 6.11
- 6.3 Traffic Flow Theory / 6.18
- 6.4 Capacity Analysis / 6.34
- 6.5 Control / 6.52

Chapter 7. Travel Demand Forecasting for Urban Transportation Planning *Arun Chatterjee and Mohan M. Venigalla* **7.1**

- 7.1 Introduction / 7.1
- 7.2 Characteristics of Travel / 7.2
- 7.3 Units for Measuring Travel Demand / 7.5
- 7.4 Measuring Existing Travel / 7.5
- 7.5 Forecasting Future Demand / 7.7
- 7.6 Trip Generation / 7.9
- 7.7 Trip Distribution / 7.13
- 7.8 Other Types of Trip Distribution Models / 7.17
- 7.9 Modal Split / 7.17
- 7.10 Traffic Assignment / 7.20
- 7.11 Model Adjustments and Use of Synthetic/Borrowed Models / 7.26
- 7.12 Travel Demand Modeling Software Packages / 7.27
- 7.13 Applications of Travel Models / 7.27
- 7.14 Transportation and Air Quality Planning / 7.28

Chapter 8. Highway Capacity	<i>Lily Elefteriadou</i>	8.1
<hr/>		
8.1	Introduction / 8.1	
8.2	Capacity Definition and Estimation Methods / 8.2	3
8.3	Fundamental Characteristics of Traffic Flow / 8.6	
8.4	The Three Components of the Traffic System and Their Effects on Capacity / 8.7	
8.5	Capacity of Uninterrupted Flow Facilities / 8.9	
8.6	The Capacity of Interrupted Flow Facilities / 8.12	
8.7	Summary and Closing Remarks / 8.16	
Chapter 9. Traffic Control Systems: Freeway Management and Communications	<i>Richard W. Denney, Jr.</i>	9.1
<hr/>		
9.1	Introduction / 9.1	
9.2	Freeway Management / 9.2	
9.3	Communications / 9.13	
Chapter 10. Traffic Signals	<i>Richard W. Denney, Jr.</i>	10.1
<hr/>		
10.1	Introduction / 10.1	
10.2	Fixed-Time Signals / 10.7	
10.3	Traffic-Actuated Signals / 10.17	
10.4	Traffic Signal Systems / 10.19	
Chapter 11. Highway Sign Visibility	<i>Philip M. Garvey and Beverly T. Kuhn</i>	11.1
<hr/>		
11.1	Measures of Sign Effectiveness / 11.1	
11.2	Visual Perception / 11.1	
11.3	Photometry / 11.3	
11.4	Federal Traffic Sign Regulations / 11.4	
11.5	Sign Visibility Research / 11.6	
11.6	Final Remarks / 11.16	
Chapter 12. Traffic Congestion	<i>Kara Kockelman</i>	12.1
<hr/>		
12.1	Introduction / 12.1	
12.2	Defining Congestion / 12.2	
12.3	The Consequences of Congestion / 12.2	
12.4	Quantifying Congestion / 12.4	
12.5	Solutions to Congestion / 12.13	
12.6	Conclusions / 12.19	
Chapter 13. Geometric Design of Streets and Highways	<i>Brian Wolshon</i>	13.1
<hr/>		
13.1	Introduction / 13.1	
13.2	Highway Function and Design Controls / 13.2	
13.3	Horizontal Alignment Design / 13.7	
13.4	Vertical Alignment Design / 13.10	
13.5	Cross-Section Design / 13.14	

- 13.6 Other Design Considerations / 13.17
- 13.7 Conclusion and Summary / 13.20

Chapter 14. Intersection and Interchange Design *Joseph E. Hummer* **14.1**

- 14.1 Introduction / 14.1
- 14.2 Basic Intersection Elements / 14.1
- 14.3 Intersection Configurations / 14.10
- 14.4 Basic Interchange Elements / 14.13
- 14.5 Interchange Configuration / 14.22

Chapter 15. Pavement Testing and Evaluation *Yongqi Li* **15.1**

- 15.1 Introduction / 15.1
- 15.2 Evaluation of Pavement Structural Capacity / 15.2
- 15.3 Evaluation of Pavement Roughness / 15.14
- 15.4 Evaluation of Skid Resistance / 15.20
- 15.5 Pavement Distress Survey / 15.25
- 15.6 Summary / 15.25

Part III Safety, Noise, and Air Quality

Chapter 16. Traffic Safety *Rune Elvik* **16.3**

- 16.1 Introduction / 16.3
- 16.2 Basic Concepts of Road Accident Statistics / 16.3
- 16.3 Safety Performance Functions: The Empirical Bayes Method for Estimating Road Safety / 16.7
- 16.4 Identifying and Analyzing Hazardous Road Locations / 16.10
- 16.5 Effects on Road Safety of Selected Traffic Engineering Measures / 16.14
- 16.6 How to Assess the Quality of Road Safety Evaluation Studies / 16.14
- 16.7 Formal Techniques for Priority Setting of Road Safety Measures / 16.17

Chapter 17. Transportation Hazards *Thomas J. Cova and Steven M. Conger* **17.1**

- 17.1 Introduction / 17.1
- 17.2 Hazard, Vulnerability, and Risk / 17.2
- 17.3 Hazards to Transportation Systems / 17.6
- 17.4 Transportation as Hazard / 17.15
- 17.5 Transportation in Emergency Management / 17.16
- 17.6 New Technologies / 17.17
- 17.7 Conclusion / 17.19

Chapter 18. Incident Management *Ahmed Abdel-Rahim* **18.1**

- 18.1 Introduction / 18.1
- 18.2 Characteristics of Traffic Incidents / 18.1
- 18.3 Incident Impacts / 18.2
- 18.4 The Incident Management Process / 18.5

- 18.5 Incident Traffic Management / 18.13
- 18.6 Motorist Information / 18.18
- 18.7 Assessing Incident Management Program Benefits / 18.20
- 18.8 Incident Management within National ITS Architecture / 18.21
- 18.9 Planning an Effective Incident Management Program / 18.21
- 18.10 Best Practice in Incident Management Programs / 18.22

Chapter 19. Transportation Noise Issues *Judith L. Rochat* **19.1**

- 19.1 Introduction / 19.1
- 19.2 Sound and Noise / 19.1
- 19.3 Instrumentation for Measuring Noise / 19.7
- 19.4 Prediction of Transportation Noise / 19.8
- 19.5 Highway Traffic Noise / 19.9
- 19.6 Aircraft Noise / 19.11
- 19.7 Rail Noise / 19.13
- 19.8 Other Transportation-Related Noise / 19.14
- 19.9 Other Noise Information / 19.15

Chapter 20. Transportation-Related Air Quality *Sauna L. Hallmark* **20.1**

- 20.1 Introduction / 20.1
- 20.2 National Ambient Air Quality Standards / 20.1
- 20.3 Transportation-Related Pollutants / 20.4
- 20.4 Estimating Transportation-Related Emissions / 20.6
- 20.5 Dispersion Modeling / 20.10
- 20.6 Control of Air Pollution from Vehicles / 20.10

Part IV Non-Automobile Transportation

Chapter 21. Pedestrians *Ronald W. Eck* **21.3**

- 21.1 Introduction and Scope / 21.3
- 21.2 Characteristics of Pedestrians / 21.4
- 21.3 Planning / 21.7
- 21.4 Pedestrian Safety / 21.12
- 21.5 Pedestrian Facility Design / 21.15
- 21.6 Operations and Maintenance / 21.28

Chapter 22. Bicycle Transportation *Lisa Aultman-Hall* **22.1**

- 22.1 Are Bicycles Really Transportation in America Today? / 22.1
- 22.2 Standards and Regulations for Bicycle Transportation / 22.2
- 22.3 Types of Bicycle Facilities / 22.3
- 22.4 The Bicycle as a Design Vehicle—Defining Parameters / 22.5
- 22.5 How Bicycles Should Operate as Vehicles / 22.5
- 22.6 Designing Bicycle Lanes / 22.7
- 22.7 Designing Shared Roadways / 22.11
- 22.8 Designing Shared-Use Paths / 22.15
- 22.9 Bicycle Parking and Intermodalism / 22.19
- 22.10 Conclusion / 22.21

Chapter 23. Railway Engineering	Keith L. Hawthorne and V. Terrey Hawthorne	23.1
<hr/>		
23.1 Diesel-Electric Locomotives /	23.1	
23.2 Electric Locomotives /	23.13	
23.3 Freight Cars /	23.16	
23.4 Passenger Equipment /	23.29	
23.5 Vehicle-Track Interaction /	23.35	
Chapter 24. Railway Track Design	Ernest T. Selig	24.1
<hr/>		
24.1 Introduction /	24.1	
24.2 Functions of Track Components /	24.1	
24.3 Track Forces /	24.4	
24.4 Track System Characteristics /	24.6	
24.5 Rails /	24.7	
24.6 Ties /	24.9	
24.7 Fastening Systems /	24.10	
24.8 Ballast /	24.11	
24.9 Subballast /	24.14	
24.10 Subgrade /	24.16	
24.11 Track Drainage /	24.20	
24.12 Maintenance Implications /	24.23	
Chapter 25. Improvement of Railroad Yard Operations	Sudhir Kumar	25.1
<hr/>		
25.1 Introduction /	25.1	
25.2 Recent Improvements in Yard Equipment and Operations /	25.9	
25.3 Theoretical Considerations for Classification Yard Design and Operation /	25.10	
25.4 Yard Friction Modifiers Solve Many Problems /	25.19	
25.5 New Rail Switch Enhancer Improves Yard Operation and Safety /	25.23	
Chapter 26. Modern Aircraft Design Techniques	William H. Mason	26.1
<hr/>		
26.1 Introduction to Aircraft Design /	26.1	
26.2 Essential Physics and Technology of Aircraft Flight /	26.2	
26.3 Transport Aircraft Design Considerations and Requirements /	26.9	
26.4 Vehicle Options: Driving Concepts—What Does It Look Like? /	26.11	
26.5 Vehicle Sizing—How Big Is It? /	26.16	
26.6 Current Typical Design Process /	26.20	
26.7 MDO—The Modern Computational Design Approach /	26.22	
Chapter 27. Airport Planning and Design	William R. Graves and Ballard M. Barker	27.1
<hr/>		
27.1 Introduction /	27.1	
27.2 Airport Planning /	27.1	
27.3 Airport Design /	27.3	
27.4 Conclusion /	27.21	

Chapter 28. Air Traffic Control System Design *Robert Britcher* **28.1**

Part V Operations and Economics

Chapter 29. Transportation Planning and Modeling *Konstadinos G. Goulias* **29.3**

- 29.1 Overview / 29.3
- 29.2 Model Attributes and Innovations in Modeling / 29.7
- 29.3 Summary and Next Steps / 29.18

Chapter 30. Transportation Economics *Anthony M. Pagano* **30.1**

- 30.1 Introduction / 30.1
- 30.2 The Methodology of Project Appraisal / 30.1
- 30.3 Objectives of Proposed Investments / 30.2
- 30.4 Alternatives / 30.2
- 30.5 Costs / 30.2
- 30.6 Uncertainty / 30.4
- 30.7 Benefits—Quantification and Evaluation / 30.5
- 30.8 Expert Opinion / 30.6
- 30.9 The Model / 30.7
- 30.10 Discounting / 30.7
- 30.11 Criteria for Choice Among Alternatives / 30.9
- 30.12 Suboptimization / 30.15
- 30.13 Advantages and Limitations of Benefit-Cost Analysis / 30.16
- 30.14 Quantification and Evaluation of Benefits of Transportation Projects / 30.16
- 30.15 Road User Benefits / 30.17
- 30.16 Conclusions / 30.21

Chapter 31. Innovative Information Technology Applications in Public Transportation *John Collura* **31.1**

- 31.1 Introduction / 31.1
- 31.2 Systems Engineering Concepts / 31.2
- 31.3 Public Transportation Management and Operations / 31.3
- 31.4 Traveler Information / 31.8
- 31.5 Transit Signal Priority / 31.11
- 31.6 Electronic Payments / 31.15
- 31.7 Challenges and Future Directions / 31.19

Chapter 32. Parking Management *P. Buxton Williams and Jon Ross* **32.1**

- 32.1 Overview / 32.1
- 32.2 Survey Affirms Many Parking Management Operations Are Marginalized / 32.2
- 32.3 What Is Comprehensive Parking Management? / 32.3
- 32.4 Comprehensive Parking Management—Systems and Operations / 32.4
- 32.5 Functional Parking Management Requirements / 32.9
- 32.6 Growing the Parking Management System into a Comprehensive Citation Management Solution / 32.13

- 32.7 Customer Relations / 32.21
- 32.8 System Validation and Verification Methods / 32.23
- 32.9 Measuring the Impact and Efficiency of the Parking Management System / 32.23
- 32.10 Benchmarks and Industry Trends / 32.24
- 32.11 Summary / 32.25

Chapter 33. Trucking Operations *Amelia Regan* **33.1**

- 33.1 Introduction / 33.1
- 33.2 A Brief History of the Trucking Industry in the United States / 33.1
- 33.3 Classification of Trucking Operations / 33.2
- 33.4 The Evolution and Impacts of Regulation / 33.2
- 33.5 The Industry and Unions / 33.3
- 33.6 Truckload Trucking / 33.4
- 33.7 Less-than-Truckload / 33.4
- 33.8 Express Services / 33.5
- 33.9 Private Fleets / 33.6
- 33.10 Third-Party Logistics / 33.6
- 33.11 Major Industry Issues / 33.7
- 33.12 Conclusion / 33.9

Chapter 34. The Economics of Railroad Operations: Resurgence of a Declining Industry *Wesley W. Wilson and Mark L. Burton* **34.1**

- 34.1 Introduction / 34.1
- 34.2 Railroad Operations / 34.3
- 34.3 The Definition and Evolution of Railroad Markets / 34.5
- 34.4 Regulation and Partial Deregulation / 34.17
- 34.5 Models of Railroad Decision-Making / 34.20
- 34.6 Summary and Conclusions / 34.26

Chapter 35. Airline Management and Operations *Saad Laraqui* **35.1**

- 35.1 Executive Summary / 35.1
- 35.2 Introduction / 35.1
- 35.3 Operating Environment among Airlines in Different Regions / 35.4
- 35.4 The Changing Airline Business Environment / 35.14
- 35.5 An Era of Change in the Airline Industry / 35.18
- 35.6 Conclusion / 35.20

Chapter 36. The Marine Transportation System *James J. Corbett* **36.1**

- 36.1 Introduction / 36.1
- 36.2 Overview of Marine Transportation / 36.1
- 36.3 Vessels / 36.7
- 36.4 Ports / 36.9
- 36.5 Trends, Opportunities, and Challenges / 36.14

Chapter 37. Freight Transportation Planning *Kathleen Hancock* 37.1

- 37.1 Introduction / 37.1
- 37.2 Freight Transportation Operations Today / 37.4
- 37.3 Planning / 37.9
- 37.4 The Future / 37.19
- 37.5 Conclusion / 37.20

Chapter 38. Transportation Management *George L. Whaley* 38.1

- 38.1 Definition of Transportation / 38.1
- 38.2 Influence of Mixed Transportation Sectors / 38.1
- 38.3 The External Environment / 38.2
- 38.4 The Internal Environment: Organizations / 38.5
- 38.5 What Is Management? / 38.5
- 38.6 Are Management Functions and Activities Generic? / 38.9
- 38.7 Transportation Management / 38.10
- 38.8 Organizational Goals / 38.10
- 38.9 Managerial Roles / 38.11
- 38.10 Managerial Levels / 38.12
- 38.11 Leadership in Transportation Management / 38.14
- 38.12 Typical Challenges Faced by New Managers in Transportation / 38.18
- 38.13 The Future of Transportation Management / 38.20

Index 1.1
