## Part I    Decision Problems

|          |                                                          |           |
|----------|----------------------------------------------------------|-----------|
| <b>1</b> | <b>Introduction</b> .....                                | <b>1</b>  |
| 1.1      | Flow - Line Production .....                             | 1         |
| 1.2      | Basic Terms of Assembly Line Production .....            | 4         |
| 1.3      | Classification of Assembly Line Balancing Problems ..... | 6         |
| 1.3.1    | Number of Products .....                                 | 7         |
| 1.3.2    | Paced and Unpaced Lines .....                            | 8         |
| 1.3.3    | Variability of Operation Times .....                     | 11        |
| 1.3.4    | Assignment Restrictions .....                            | 12        |
| 1.3.5    | Layout of the Production System .....                    | 14        |
| 1.3.6    | Type of Station .....                                    | 16        |
| 1.3.7    | Launching Discipline .....                               | 17        |
| 1.3.8    | Equipment Selection and Processing Alternatives .....    | 18        |
| 1.3.9    | Volume of Production .....                               | 18        |
| 1.3.10   | Objectives .....                                         | 19        |
| <br>     |                                                          |           |
| <b>2</b> | <b>Single - Model Assembly Lines</b> .....               | <b>23</b> |
| 2.1      | Notations and Definitions .....                          | 23        |
| 2.2      | The Simple Assembly Line Balancing Problem (SALBP) ..... | 25        |
| 2.2.1    | The Feasibility Problem (SALBP - F) .....                | 26        |
| 2.2.1.1  | Properties of SALBP - F .....                            | 28        |
| 2.2.1.2  | Mathematical Formulations of SALBP - F .....             | 29        |
| 2.2.1.3  | Different Versions of SALBP .....                        | 32        |

|          |                                                       |           |
|----------|-------------------------------------------------------|-----------|
| 2.2.1.4  | Related Combinatorial Problems .....                  | 33        |
| 2.2.1.5  | Complexity of SALBP .....                             | 34        |
| 2.2.2    | Minimizing the Number of Stations (SALBP-1) .....     | 42        |
| 2.2.2.1  | Lower Bounds of SALBP-1 .....                         | 43        |
| 2.2.2.2  | Upper Bounds of SALBP-1 .....                         | 52        |
| 2.2.2.3  | Mathematical Formulations of SALBP-1 .....            | 53        |
| 2.2.3    | Minimizing the Cycle Time (SALBP-2) .....             | 54        |
| 2.2.3.1  | Lower Bounds of SALBP-2 .....                         | 54        |
| 2.2.3.2  | Upper Bounds of SALBP-2 .....                         | 60        |
| 2.2.3.3  | Mathematical Formulations of SALBP-2 .....            | 61        |
| 2.2.4    | Maximizing the Line Efficiency (SALBP-E) .....        | 61        |
| 2.2.4.1  | Equivalence of Objectives .....                       | 62        |
| 2.2.4.2  | Statement of the Problem .....                        | 62        |
| 2.2.4.3  | Upper and Lower Bounds of SALBP-E .....               | 65        |
| 2.2.4.4  | Mathematical Formulations of SALBP-E .....            | 66        |
| 2.3      | Generalized Single-Model Problems .....               | 66        |
| 2.3.1    | Stochastic Task Times .....                           | 67        |
| 2.3.1.1  | Paced Assembly Systems .....                          | 67        |
| 2.3.1.2  | Unpaced Assembly Systems .....                        | 70        |
| 2.3.2    | Assignment Restrictions .....                         | 70        |
| 2.3.3    | Parallel Lines and Stations .....                     | 71        |
| 2.3.4    | Cost and Profit Oriented Objectives .....             | 73        |
| 2.3.5    | A Critique of SALBP .....                             | 74        |
| <b>3</b> | <b>Mixed-Model Assembly Lines .....</b>               | <b>75</b> |
| 3.1      | Characterization of Mixed-Model Production .....      | 75        |
| 3.2      | Mixed-Model Line Balancing .....                      | 77        |
| 3.2.1    | Description of the Problem .....                      | 77        |
| 3.2.2    | Different Versions of MALBP .....                     | 80        |
| 3.2.2.1  | Relationship of MALBP to Single-Model Problems .....  | 80        |
| 3.2.2.2  | Variations of Station Utilization .....               | 82        |
| 3.2.2.3  | Objectives for Smoothed Station Loads .....           | 85        |
| 3.3      | Mixed-Model Sequencing .....                          | 92        |
| 3.3.1    | Operating Characteristics and Problem Statement ..... | 92        |
| 3.3.2    | Sequencing Objectives .....                           | 98        |
| 3.3.3    | A Mathematical Formulation for MSP-W .....            | 103       |
| 3.4      | A Hierarchical Planning Approach .....                | 104       |

## Part II Solution Methods

|          |                                                                                 |            |
|----------|---------------------------------------------------------------------------------|------------|
| <b>4</b> | <b>Exact Procedures for Single - Model Assembly Line Balancing Problems</b>     | <b>111</b> |
| 4.1      | Exact Solution Procedures for SALBP - 1                                         | 111        |
| 4.1.1    | Notations and Definitions                                                       | 112        |
| 4.1.2    | Existing Branch and Bound Procedures - Survey and Discussion                    | 113        |
| 4.1.2.1  | Components of Branch and Bound Procedures                                       | 113        |
| 4.1.2.2  | The Algorithms FABLE and EUREKA                                                 | 116        |
| 4.1.2.3  | Further Branch and Bound Procedures                                             | 124        |
| 4.1.3    | Dynamic Programming Procedures                                                  | 127        |
| 4.1.3.1  | Basic Elements of Dynamic Programming                                           | 127        |
| 4.1.3.2  | Dynamic Programming Procedures for SALBP - 1                                    | 128        |
| 4.1.4    | The Branch and Bound Procedure SALOME - 1                                       | 132        |
| 4.1.4.1  | Combining FABLE and EUREKA - Basic Approach                                     | 133        |
| 4.1.4.2  | Additional Components                                                           | 137        |
| 4.1.4.3  | Bidirectional Branching                                                         | 138        |
| 4.2      | Exact Solution Procedures for SALBP - 2                                         | 142        |
| 4.2.1    | Notations and Definitions                                                       | 142        |
| 4.2.2    | SALBP - 1 Based Search Methods                                                  | 143        |
| 4.2.3    | A Taskoriented Branch and Bound Procedure (TBB-2)                               | 146        |
| 4.2.3.1  | Branching                                                                       | 146        |
| 4.2.3.2  | Bounding and Fathoming                                                          | 148        |
| 4.2.3.3  | Logical Tests                                                                   | 150        |
| 4.2.3.4  | An Example for TBB-2                                                            | 152        |
| 4.2.4    | The Branch and Bound Procedure SALOME - 2                                       | 156        |
| 4.2.4.1  | Local Lower Bound Method                                                        | 156        |
| 4.2.4.2  | Logical Tests and Fathoming                                                     | 162        |
| 4.2.4.3  | Bidirectional Branching                                                         | 164        |
| 4.3      | Exact Solution Procedures for SALBP - E                                         | 167        |
| 4.3.1    | Notations and Definitions                                                       | 167        |
| 4.3.2    | Search Methods for SALBP - E                                                    | 168        |
| <b>5</b> | <b>Heuristic Procedures for Single - Model Assembly Line Balancing Problems</b> | <b>173</b> |
| 5.1      | Constructive Methods                                                            | 173        |
| 5.1.1    | Priority Rule Based Procedures for SALBP - 1                                    | 174        |
| 5.1.1.1  | Static Priority Rules                                                           | 174        |

|          |                                                                                       |            |
